Describe the type of production system used to manufacture a seasonal high street fashion top.

Explain how manufacturers ensure that processes, systems and the workforce keep up with changes in demand.

[6 marks]

Turn over ►

0 5 . 2

The high street fashion top includes standardised components.

Give **three** advantages of using standardised components when manufacturing a garment.

[3 marks]

1 _____

2 _____

3 _____

0 5 . 3

A manufacturer produces fashion tops. In a batch of 2600 fashion tops, 9% are faulty.

The manufacturer introduces further training for the workforce in order to reduce the number of faulty fashion tops.

A new batch of 1250 is now produced. The percentage of faulty fashion tops in this batch is reduced by 12%

Work out the number of faulty fashion tops in each batch, to the nearest whole number. Show your working.

1 2

A fancy dress costume includes a witch's hat made of felt.

- One piece of felt is used for the cone shape (excluding the base of the cone).
- Two rings of felt are used for the brim as it is a double thickness.

Work out the amount of felt used for each hat, excluding the waste fabric. Give your answer to two significant figures.

Curved surface area of cone = $\pi r \sqrt{h^2 + r^2}$ where r is the radius of the cone base and h is the vertical height of the cone.

Show your working.
