

Candidates answer on the Question Paper. No Additional Materials are required.

## **READ THESE INSTRUCTIONS FIRST**

Write your Center number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use a pencil for any diagrams or graphs.

Do not use staples, paper clips, highlighters, glue or correction fluid.

DO NOT WRITE IN ANY BARCODES.

Answer all questions.

Electronic calculators may be used. You may lose marks if you do not show your working or if you do not use appropriate units.

At the end of the examination, fasten all your work securely together. The number of marks is given in brackets [] at the end of each question or part question.

This document consists of 19 printed pages and 1 blank page.

- Www.PapaCambridge.com Flowering plants are classified into two groups, the monocotyledons and the eudicoty 1 (dicotyledons).
  - (a) Complete Table 1.1 to show differences between these two groups.

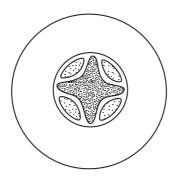

## Table 1.1

	monocotyledons	eudicotyledons
number of cotyledons in seed		
pattern of veins in leaf		
number of flower parts e.g. petals		

[4]

[2]

- (b) State two environmental stimuli that flowering plants can detect.
  - 1 ..... 2 [2]
- (c) Fig. 1.1 shows a cross section of part of a eudicotyledonous (dicotyledonous) plant as seen through a microscope.

(i) Name the part of a plant through which the section has been cut.

[1] ..... (ii) On Fig. 1.1, draw a line to label the phloem tissue and a line to label the xylem

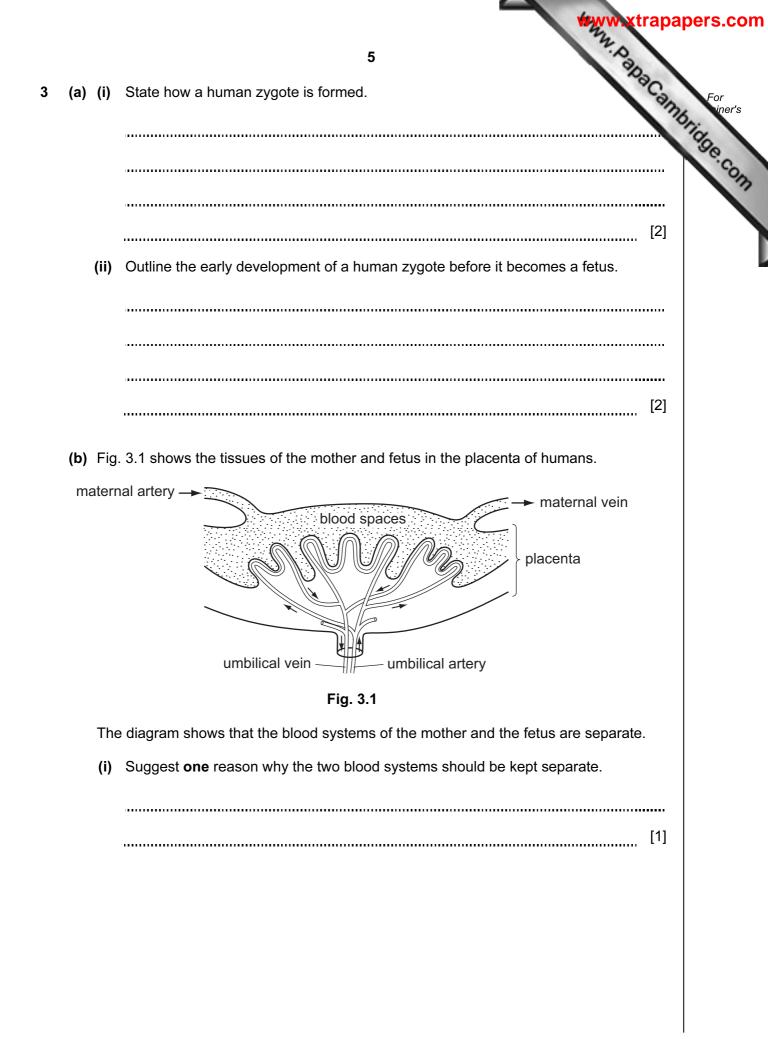

Label the phloem and xylem tissues.
