MARK SCHEME

Maximum Mark: 80

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the October/November 2017 series for most Cambridge IGCSE[®], Cambridge International A and AS Level components and some Cambridge O Level components.

This syllabus is approved for use in England, Wales and Northern Ireland as a Cambridge International Level 1/Level 2 Certificate.

However, the information may have been gathered for another purpose and may be of little use when trying to predict the pet owner requirements at the different locations. Level 2 – 4 marks plus one application mark for referring to the pet owners at the new locations)</p> <p>Level 3 – For L3 to be awarded there needs to be at least two L2 marks awarded and then a recommendation of which method to choose.</p> <p>Award up to 2 additional marks for relevant application.</p> <p>Possible application marks: Animals; dogs; cats; pets; pet owners; washing and brushing animals; New City; expand and move to larger site; information on the three sites; information from Appendix 1 on the AH advert; complaint on the social media message; information from Appendix 3 on the costs and revenue of AH.</p> <p>There may be other examples in context that have not been included here.</p>	

Question	Answer	Marks
2(a)(i)	<p>Calculate the profit per day for AH using the information in Appendix 3.</p> <p>Revenue per day = $(25 \times \\$5) + (25 \times \\$10)$ (1) = \$375 (1) (Award 1 mark for method of calculating revenue but incorrect answer)</p> <p>\$375 – \$325 (1) (Award 1 mark for method of calculating profit but incorrect answer)</p> <p>Profit per day = \$50 (1)</p> <p>If \$50 with no working shown then award 4 marks.</p>	4

Question	Answer	Marks
2(a)(ii)	<p>Identify and explain <u>one</u> way AH could use to increase profit from the existing site.</p> <p>Knowledge – 1 mark for correctly identifying one way profit can be increased.</p> <p>Possible ways:</p> <ul style="list-style-type: none"> • Increase revenue (1) e.g. by increasing prices/advertising more/introducing a new service (1) • Reduce costs/expenses (1) e.g. by finding cheaper suppliers/improving efficiency (1) <p>Analysis award up to 3 marks – 2 of which must be applied to this context – for a relevant explanation of one way AH could increase profit.</p> <p>Indicative response:</p> <p>Elsie could increase her revenue (1) by promoting her existing services to attract more customers.(1) This will lead to more pet owners using her services and paying for their animals to be washed and groomed. (1) If costs increase by less than the increase in revenue then profit will increase. (1)</p> <p>Possible application marks: Animals; dogs; cats; pets; pet owners; washing and brushing animals; qualified animal nurse; set up 2 years ago; \$10 000 from grandfather; \$10 000 from bank loan; 12 adults and 6 children workers; paid legal minimum wage; shampoo and brushes purchased from wholesaler; expand and move to larger site; needs to recruit a new manager; information on the three sites; information from Appendix 1 on the AH advert; complaint on the social media message; information from Appendix 3 on the costs and revenue of AH.</p> <p>There may be other examples in context that have not been included here</p>	4
2(b)	<p>Consider why a cash flow forecast, an income statement and a balance sheet are important to AH. Which one of these do you think is most important to Elsie’s decision about how to finance the new site? Justify your answer.</p> <p>Relevant points might include:</p> <p>Cash flow forecast – predicts cash in-flows and outflows – to avoid liquidity problem – is there sufficient working capital for the larger premises? Income statement – records revenue and costs or shows profit and loss – profit available to reinvest into the new premises – indicator of success of the business – will there be sufficient revenue from larger premises to make profit?</p> <p>Balance sheet – records assets and liabilities – liquidity ratios – stability of the business – amount of liabilities – value of the existing business – assets to sell if necessary</p>	12
