Paper 2 Core

May/June 2006

1 hour 15 minutes

Candidates answer on the Question Paper. No Additional Materials are required.

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use a pencil for any diagrams or graphs.

Do not use staples, paper clips, highlighters, glue or correction fluid.

Answer all questions.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

Answer **all** the questions.

For Examiner's Use (a) Three characteristics of living organisms and four possible descriptions are show 1 below.

Draw a straight line to match each characteristic to its description.

	characteristic	description	
		pumping air in and out of the lungs	
	respiration		
		producing new individuals of the same species	
	nutrition		
		obtaining organic chemicals for the repair of tissues	
	reproduction		
		the release of energy from sugars	
			[3]
(b) १	State two other characteris	tics of living organisms.

www.papacambridge.com 4 Two pea plants with red flowers were crossed and produced 177 seeds. 44 of these grew into white flowered pea plants and 133 seeds grew into red flowered pea plants. (a) (i) Which flower colour is controlled by the recessive allele?

6

(ii) Using the symbols **R** and **r** to represent the alleles, state the genotype of the parent pea plants.

[1]

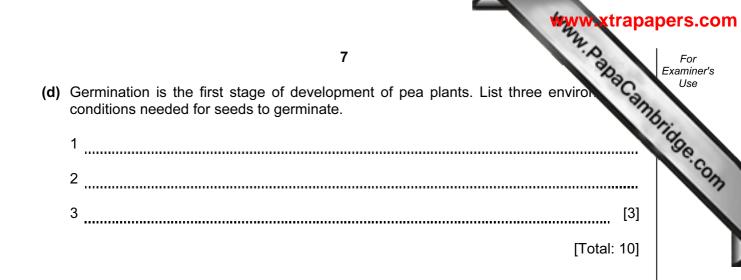

(b) By means of a labelled genetic diagram explain the inheritance of flower colour in this cross.

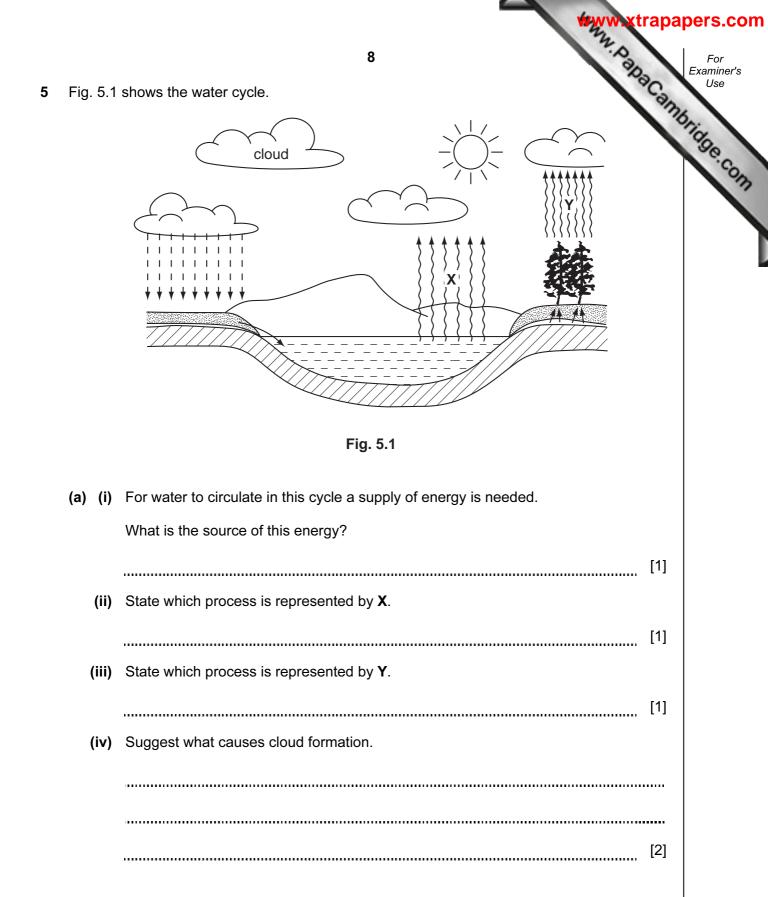

[4]

(c) A red flowered pea plant, genetically identical to the original parent, was crossed with a white flowered plant. Predict the ratio of red flowered to white flowered plants expected from this cross.

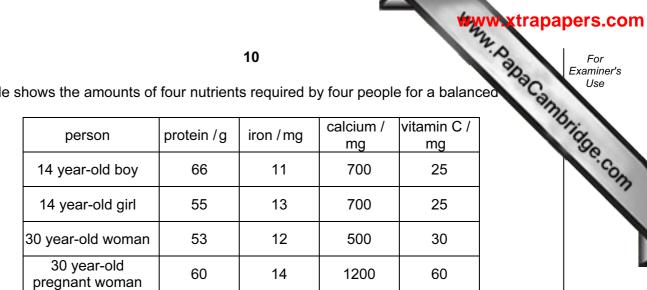

You may use this space for any working.

..... 2 red flowered plants white flowered plants
