	3
(i)	The carbon monoxide in the blood of these taxi drivers comes from two source is from vehicle exhaust fumes.
	3 The carbon monoxide in the blood of these taxi drivers comes from two source is from vehicle exhaust fumes. Name the other source of carbon monoxide that may be inhaled by drivers. [1]
(ii)	Using data from Table 2.1, suggest which of these two sources contributes most to the inactivation of the haemoglobin.
	Explain your choice.
	source
	explanation
	[3]
(iii)	Calculate the difference in the percentage of haemoglobin inactivated by carbon monoxide in day and night time taxi drivers and suggest a reason for the difference.
	difference
	reason
	[2]
b) (i)	Name two other harmful components of cigarette smoke, apart from carbon monoxide.
	For each, describe an effect it can have on the body of a person who smokes.
	1. component
	effect
	2. component
	effect
	[4]
(ii)	Suggest a possible effect that might happen to the fetus of a pregnant woman who smokes.
	[1]

4	Choose words from the list to complete each of the spaces in the paragraph.
	Each word may be used once only and some words are not used at all.
	allele diploid dominant gene haploid
	heterozygous homozygous meiosis mitosis recessive
	In humans there is a condition known as cystic fibrosis.
	This is controlled by a single which has two forms. One form causes
	cystic fibrosis while the other does not.
	Gametes are formed by When two humans reproduce, their gametes
	fuse at fertilisation to form azygote.
	Neither of the two humans has cystic fibrosis but one of their three children does have the
	condition. This means that cystic fibrosis is controlled by a allele and
	that each of the parents is [5]

- Expecte ticks that (a) Cape buffalo graze on grass. While the buffalo are grazing, two or three oxpecks are often seen standing on the backs of each buffalo. These birds eat ticks that 6 parasites on the buffalo's skin.
 - (i) Draw a pyramid of numbers to represent these feeding relationships.

Label the pyramid with the names of the organisms.

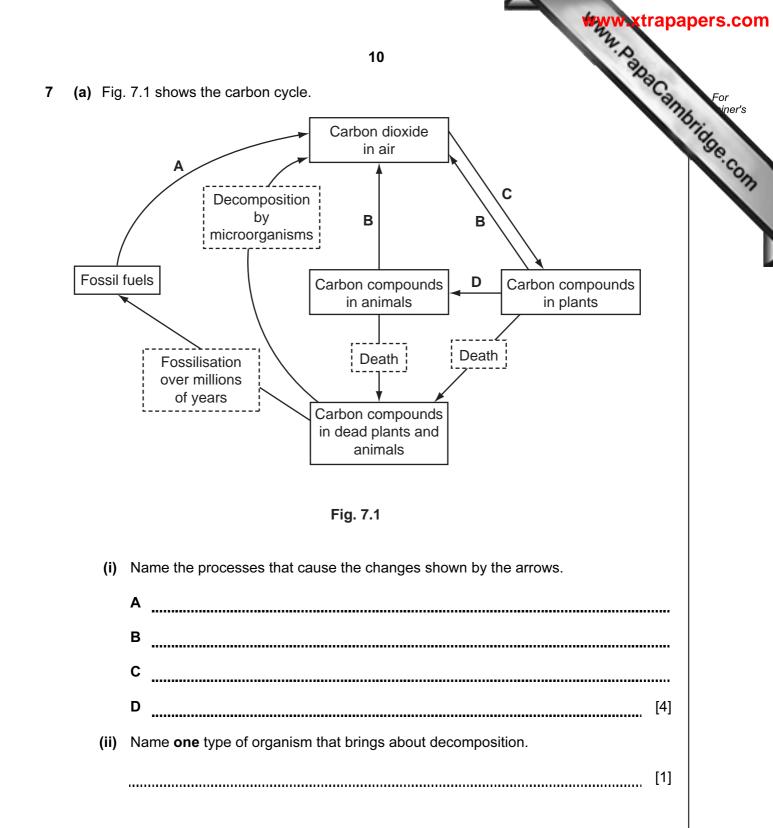

[3]

(ii) Draw a pyramid of biomass to represent the same feeding relationships.

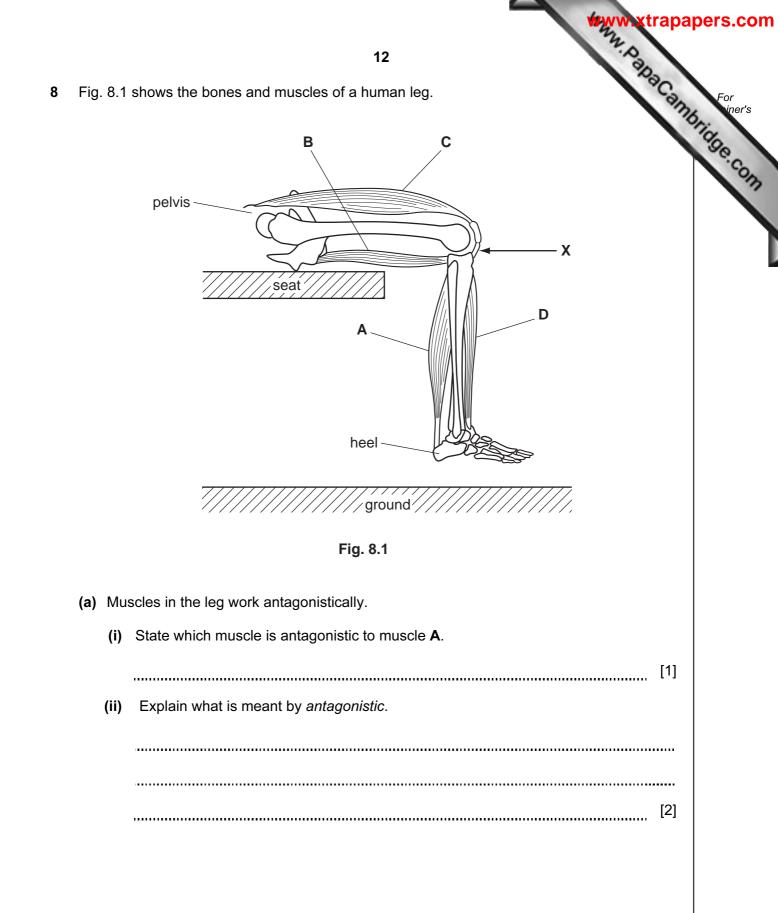

Label the trophic levels on this pyramid.
