CAMBRIDGE INTERNATIONAL EXAMINATIONS International General Certificate of Secondary Education

#### MARK SCHEME for the October/November 2012 series

# 0610 BIOLOGY

0610/22

Paper 2 (Core Theory), maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2012 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

#### General notes

Do not exceed the section sub-totals or question maxima.

Symbols used in mark scheme and guidance notes.

| 1       | separates alternatives for a marking point   |
|---------|--|
| ;       | separates points for the award of a mark   |
| MP      | mark point - used in guidance notes when referring to numbered marking points  |
| А       | accept - as a correct response   |
| R       | reject – this is marked with a cross and any following correct statements do not gain any marks  |
| I       | ignore / irrelevant / inadequate – this<br>response gains no mark, but any following<br>correct answers can gain marks.  |
| ( )     | the word / phrase in brackets is not required<br>to gain marks but sets the context of the<br>response for credit.<br>e.g. (waxy) cuticle. Waxy not needed but if<br>it was described as a cellulose cuticle then<br>no mark is awarded. |
| Mitesia |  |

Mitosis underlined words – this word only
