4		·	

#### **READ THESE INSTRUCTIONS FIRST**

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use a pencil for any diagrams or graphs.

Do not use staples, paper clips, highlighters, glue or correction fluid.

DO NOT WRITE IN ANY BARCODES.

Answer all questions.

Electronic calculators may be used.

You may lose marks if you do not show your working or if you do not use appropriate units.

At the end of the examination, fasten all your work securely together. The number of marks is given in brackets [] at the end of each question or part question.

This document consists of 18 printed pages and 2 blank pages.

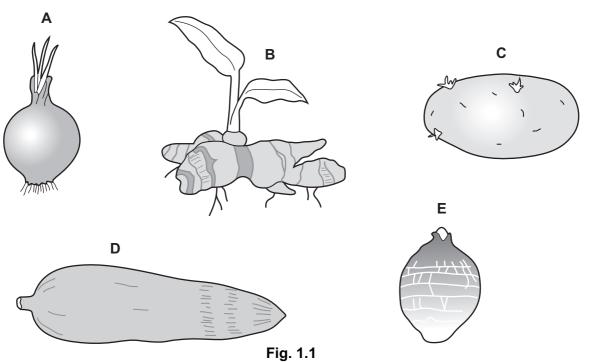

1	(a)	Def	ine the term <i>photosynthesis</i> .	For Examiner's
				Use
		•••••	[3]	
	(b)	Sor	ne plants store starch in underground storage organs.	
		(i)	Explain how starch in a leaf is transported to an underground storage organ.	
			[2]	
		(ii)	Suggest <b>one</b> advantage to the plant of storing starch in an underground storage organ.	
			[1]	

For Examiner's

Use

(c) Fig. 1.1 shows the underground storage organs of five plants.

Use the key to identify which storage organ, shown in Fig. 1.1, is produced by which plant.

Write the letter of each storage organ on the correct line in the key.

	name of plant	letter of storage organ
1 (a) Approximately round	go to 2	
(b) Longer than it is wide	go to 3	
2 (a) Has a ring of roots at the base	Allium	
(b) No ring of roots	Colocasia	
3 (a) Has shoots or leaves	go to 4	
(b) No shoots or leaves	Cassava	
4 (a) Branched	Zingiber	
(b) Not branched	Solanum	

[Total: 10]

### **BLANK PAGE**

[1]

[1]

For Examiner's Use

2 Fig. 2.1 shows an external view of a human heart seen from the front. Δ В right side of left side of the heart the heart Fig. 2.1 (a) (i) Name blood vessel A. ..... (ii) Blood vessel B supplies blood to the muscle of the heart wall. Name blood vessel B. ..... (iii) State what happens if blood vessel B becomes blocked. ......[1] (iv) Describe and explain how the structure of the left ventricle differs from the structure of the right ventricle. .....

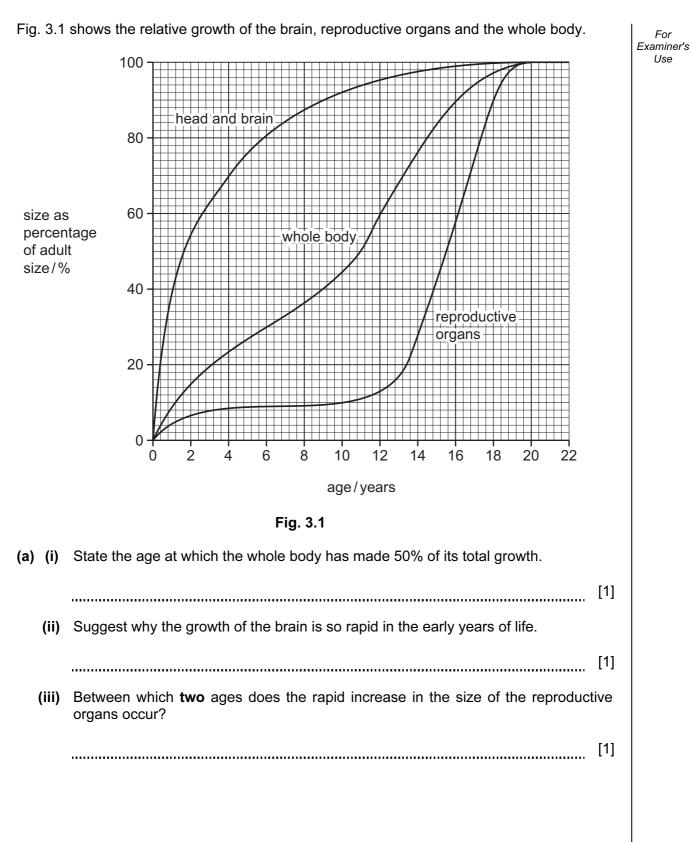

[2]

.....

(b)	Exercise affects pulse rate.			
	Describe how you would measure a person's pulse rate.	Examiner's Use		
	[2]			
	[Total: 7]			

For

Use

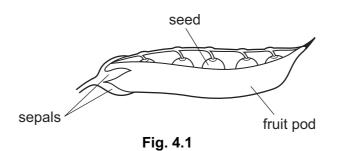

7

(b)	Nai	me the hormone which controls the start of puberty in:	For Examiner's
	(i)	males;	Use
		[1]	
	(ii)	females.	
		[1]	
	(iii)	Reproductive organs are affected by an increase of the male sex hormone.	
		Name two other structures affected by this increase.	
		1	
		2[2]	
	-		
(c)	Sor	ne athletes use the male sex hormone as a drug.	
	The	ey inject this hormone.	
	The use of such drugs is banned in athletics.		
	Suggest <b>two</b> ways that the male sex hormone could improve the performance of an athlete.		
	1		
	2		
		[2]	
		[Total: 9]	

For Examiner's Use

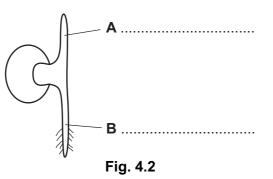

4 Fig. 4.1 is a section through the fruit of a pea plant showing some of its seeds.

(a) Explain why the cells of the fruit pod, as shown in Fig. 4.1, are genetically different from the cells of the embryo in the seeds.

[3]

(b) (i) Fig. 4.2 shows a pea seedling after germination has begun.

Name the structures labelled **A** and **B**. Write your answers on Fig. 4.2.

[2]

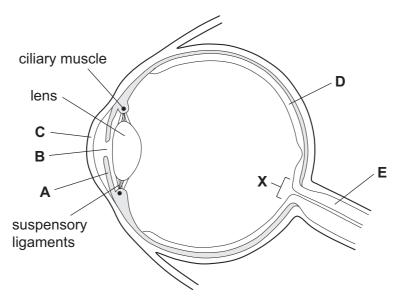

(ii) State three external conditions that are always required for germination.

1	 
2	 
3	[3]

(c)	Define the terms growth and development.	For Examiner's
	growth	Use
	development	
	[3]	
	[Total: 11]	

For Examiner's Use

**5** Fig. 5.1 shows a section through the human eye.

(a) (i) Name the structures labelled **A**, **B**, **C** and **D**, shown in Fig. 5.1.

	[4]
ate the function of structure <b>E</b> .	
	[1]
ve <b>one</b> reason why area <b>X</b> is called the blind spot.	
	[1]
	ve <b>one</b> reason why area <b>X</b> is called the blind spot.

For Examiner's Use

(b) A girl looks at a distant tree and then looks at a small plant very close to her.

Describe the changes that take place in the ciliary muscles, the suspensory ligaments and the lens to allow the girl to focus on the small plant.

[Total: 9]

For Examiner's Use

**6** Fig. 6.1 shows a section through human skin.

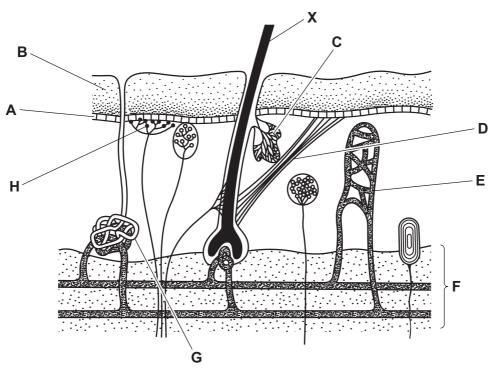

Fig. 6.1

(a) In Table 6.1, write the letter from Fig. 6.1 which labels the structure that carries out each of the functions.

One has been completed for you.

Table	6.1
-------	-----

function	letter
helps to prevent dehydration of the body	В
detects changes in the external temperature	
dilates when body temperature rises	
prevents most heat loss from the body	
produces a fluid to help the body lose heat	

[4]

[1]

(b) Name the structure labelled **X** on Fig. 6.1.

X .....

[Total: 5]

14

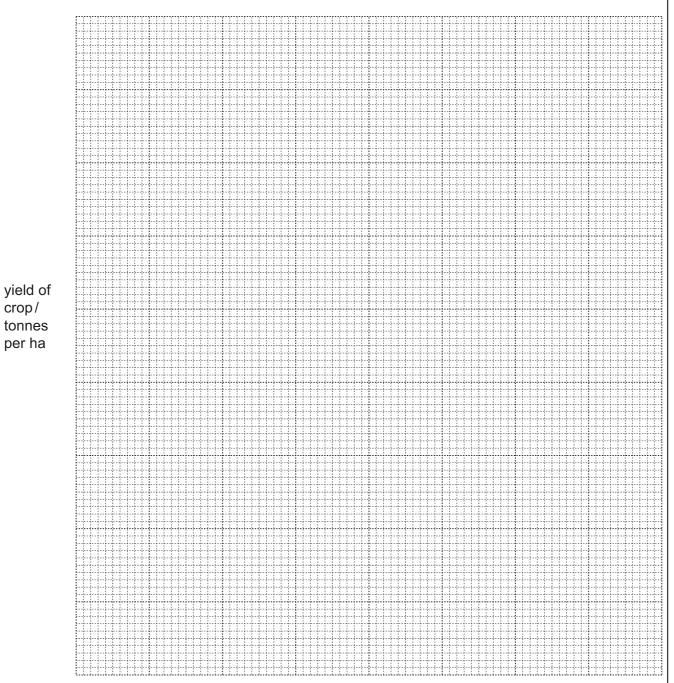

(a) Explain what is shown by a food web. 7 For Examiner's Use ..... [2] ..... (b) Fig. 7.1 shows part of the food web in the arctic tundra. arctic wolf brown bear arctic fox snowy owl caribou musk ox lemming arctic hare pika moss grass liverwort lichen Fig. 7.1 (i) Name one organism, shown in Fig. 7.1, that feeds on both animals and plants. [1] ..... (ii) The arctic wolf is sometimes described as a top carnivore. Define the term carnivore. [1] .....

15			
	(iii)	Suggest why top carnivores, such as the arctic wolf, are usually only present in very small numbers in an area.	For Examiner's Use
		[2]	
(c)	The	e number of lemmings in an area undergoes a rapid decrease every few years.	
	Explain how a decrease in lemmings may affect the number of arctic foxes <b>and</b> arctic hares.		
	(i)	arctic foxes	
	(ii)	arctic hares	
		101	
		[3]	

[Total: 9]

- 8 Table 8.1 shows the effect of the use of nitrate fertilisers on the yield of a crop.
  - (a) Plot the data from Table 8.1 as a line graph using the axes provided on Fig. 8.1.

For Examiner's Use

## nitrate fertiliser added/kg per ha

[4]

For Examiner's Use

		nitrate fertiliser added	yield of crop		
		/ kg per ha	/ tonnes per ha		
		0	3.0		
		50	4.8		
		100	7.0		
		150	8.6		
		200	8.2		
(b) (i)	Calculate by how much the crop yield increased when 50kg per ha of nitrate fertiliser was added.				
	tonnes per ha [1]				
(ii)	Use your graph to determine how much nitrate fertiliser must be added to double the unfertilised crop yield.				
	kg per ha [1]				
(iii)	Some farmers add more than 150 kg per ha of nitrate fertiliser.				
	Suggest <b>two</b> reasons why this is <b>not</b> a good idea.				
	1				
	-				
	2				
				[2]	
(iv)	A farmer has only 100 kg of nitrate fertiliser available, but 2 ha of land.				
	He has to decide whether to put all of the fertiliser on one field of 1 ha or to spread it evenly over both fields of 1 ha each.				
	Use the data in Table 8.1 to calculate which decision would give the farmer the highest yield, in total.				
	calculatio	on			
	decision			[2]	

For Examiner's Use

(c) Explain why the yield of a crop can be increased by adding nitrate fertilisers. ..... [3] [Total: 13] When a mass of still air becomes trapped over a city, pollutants build up in the air next to the ground. (a) (i) Name two chemical pollutants that might build up over a busy city centre. 1 2 [2] ..... (ii) Vehicles such as cars burn fossil fuels. Explain why vehicles may be banned from the city if pollution becomes severe. ..... ..... [3] .....

9

(b) If air pollution is very severe, warnings may be given not to take young babies into the city centre and for any people with heart and respiratory problems to stay inside.

Suggest **two** reasons for this advice.
