Paper 1 Multiple Choice (Core)

0439/13 May/June 2018

45 minutes

Additional Materials: Multiple Choice Answer Sheet Soft clean eraser Soft pencil (type B or HB is recommended)

READ THESE INSTRUCTIONS FIRST

Write in soft pencil.

Do not use staples, paper clips, glue or correction fluid. Write your name, Center number and candidate number on the Answer Sheet in the spaces provided unless this has been done for you. DO **NOT** WRITE IN ANY BARCODES.

There are **forty** questions on this paper. Answer **all** questions. For each question there are four possible answers **A**, **B**, **C** and **D**.

Choose the **one** you consider correct and record your choice in **soft pencil** on the separate Answer Sheet.

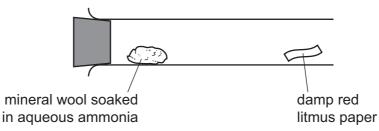

Read the instructions on the Answer Sheet very carefully.

Each correct answer will score one mark. A mark will not be deducted for a wrong answer. Any rough working should be done in this booklet. A copy of the Periodic Table is printed on page 16. Electronic calculators may be used.

This document consists of 15 printed pages and 1 blank page.

1 Mineral wool soaked in aqueous ammonia is placed in the apparatus shown.

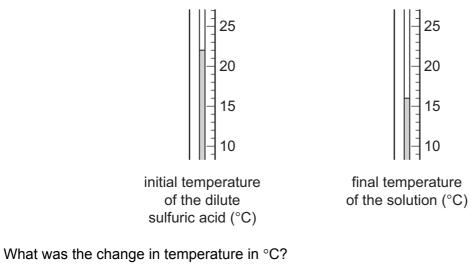

After five minutes, the damp red litmus paper turned blue.

Which process led to this change?

- A crystallization
- B diffusion
- C distillation
- **D** sublimation
- 2 Solid R reacted with dilute sulfuric acid.

The initial temperature of the dilute sulfuric acid and the final temperature of the solution are shown.

| A -6 B -4 C 4 E |) | 6 |
|-----------------|---|---|
|-----------------|---|---|

3 The melting points of four impure samples of lead(II) bromide were measured. The results are shown.

Which sample is the most pure?

| | temperature when the sample started to melt/°C | temperature when the sample finished melting/°C |
|---|--|---|
| Α | 342 | 355 |
| В | 353 | 360 |
| С | 365 | 371 |
| D | 372 | 373 |

4 Symbols representing four particles are shown.

| 4011/ | 41 🗸 2+ | 37 🗸 | 37 – |
|-------------------------------|----------------------|-------------------------------|-------------|
| ⁴⁰ ₂₀ W | ${}^{41}_{20}X^{2+}$ | ³⁷ ₁₈ Y | 17 – |

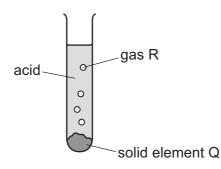

The letters are not the chemical symbols.

Which particles have the same number of neutrons?

| Α | W and X ²⁺ | В | W and Z | C X^{2+} and Y | D | Y and Z |
|---|-----------------------|---|---------|-------------------------|---|---------|
|---|-----------------------|---|---------|-------------------------|---|---------|

- **5** Which name is given to a pure substance made from more than one type of atom?
 - A alloy
 - B compound
 - C element
 - **D** mixture

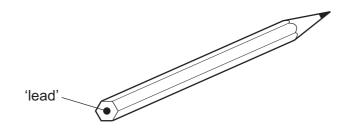

6 The diagram shows solid element Q reacting with an acid to produce gas R.

Which row describes Q and R?

| | Q | R |
|---|----------|------------------------------|
| Α | metal | element with covalent bonds |
| В | metal | element with ionic bonds |
| С | nonmetal | compound with covalent bonds |
| D | nonmetal | compound with ionic bonds |

7 The 'lead' in a pencil is made of a mixture of graphite and clay.

When the percentage of graphite is increased, the pencil slides across the paper more easily.

Which statement explains this observation?

- **A** Graphite has a high melting point.
- **B** Graphite is a form of carbon.
- **C** Graphite is a lubricant.
- **D** Graphite is a nonmetal.
- 8 The equation for the reaction between magnesium and dilute sulfuric acid is shown.

The M_r of MgSO₄ is 120.

$$Mg + H_2SO_4 \rightarrow MgSO_4 + H_2$$

Which mass of magnesium sulfate is formed when 12g of magnesium completely reacts with dilute sulfuric acid?

A 5g **B** 10g **C** 60g **D** 120g

9 What is produced at each electrode when molten rubidium chloride is electrolyzed using platinum electrodes?

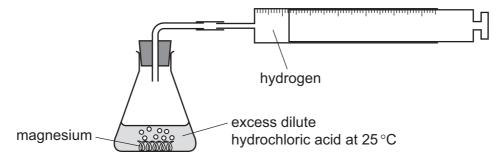

| | positive electrode | negative electrode |
|---|--------------------|--------------------|
| Α | chlorine | hydrogen |
| в | chlorine | rubidium |
| С | hydrogen | chlorine |
| D | rubidium | chlorine |

- 10 What is released when any fuel is burned?
 - A carbon dioxide
 - B heat energy
 - C smoke
 - D water
- **11** Group I metals react vigorously with water and release heat.

Which statement about this reaction is correct?

- **A** The reaction is endothermic and the energy change is negative.
- **B** The reaction is endothermic and the energy change is positive.
- **C** The reaction is exothermic and the energy change is negative.
- **D** The reaction is exothermic and the energy change is positive.

12 The diagram shows a rate of reaction experiment.

Increasing the concentration of the acid and increasing the temperature both affect the rate of reaction.

Which row is correct?

| | increase the concentration of acid | increase the temperature |
|---|------------------------------------|---------------------------|
| Α | decrease rate of reaction | decrease rate of reaction |
| В | decrease rate of reaction | increase rate of reaction |
| С | increase rate of reaction | decrease rate of reaction |
| D | increase rate of reaction | increase rate of reaction |

13 In a chemical reaction, blue compound X changed into white compound Y.

$$X \rightarrow Y$$

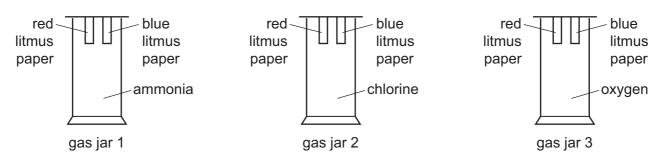

Which statement describes this reaction?

- **A** Hydrated cobalt(II) chloride is heated.
- **B** Hydrated copper(II) sulfate is heated.
- **C** Water is added to anhydrous cobalt(II) chloride.
- **D** Water is added to anhydrous copper(II) sulfate.
- 14 Which equation shows an oxidation reaction?

 $\textbf{A} \quad \textbf{C} \ \textbf{+} \ \textbf{O}_2 \ \rightarrow \ \textbf{CO}_2$

- $\textbf{B} \quad \text{CaCO}_3 \ \rightarrow \ \text{CaO} \ + \ \text{CO}_2$
- $\textbf{C} \quad \text{CaO} \ \textbf{+} \ \textbf{2}\text{HC}\textit{l} \ \rightarrow \ \textbf{CaC}\textit{l}_2 \ \textbf{+} \ \textbf{H}_2\textbf{O}$
- $\textbf{D} \quad N_2O_4 \ \rightarrow \ 2NO_2$

In which gas jars does at least one piece of litmus paper change color?

A 1, 2 and 3 **B** 1 and 2 **C** 1 and 3 **D** 2 and 3

- **16** Which statement about oxides is correct?
 - **A** A solution of magnesium oxide has a pH less than pH 7.
 - **B** A solution of sulfur dioxide has a pH greater than pH 7.
 - C Magnesium oxide reacts with nitric acid to make a salt.
 - **D** Sulfur dioxide reacts with hydrochloric acid to make a salt.
- 17 Which methods are suitable for preparing both zinc sulfate and copper(II) sulfate?
 - 1 reacting the metal oxide with warm dilute aqueous sulfuric acid
 - 2 reacting the metal with dilute aqueous sulfuric acid
 - 3 reacting the metal carbonate with dilute aqueous sulfuric acid

A 1, 2 and 3 **B** 1 and 2 only **C** 1 and 3 only **D** 2 and 3 only

18 A white crystalline solid is dissolved in distilled water.

A small amount of dilute nitric acid is added followed by aqueous silver nitrate.

No visible change occurs.

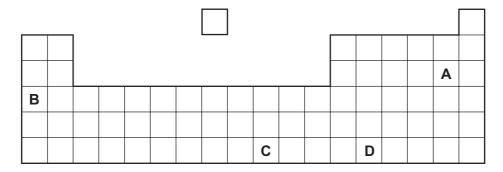

What can be deduced about the white crystalline solid?

- A It contains chloride ions.
- **B** It does not contain ammonium ions.
- **C** It does not contain carbonate ions.
- **D** It must contain either sulfate or nitrate ions.

- **19** Which element is classified as a nonmetal in the Periodic Table?
 - A calcium
 - **B** chlorine
 - **C** chromium
 - **D** copper
- 20 Part of the Periodic Table is shown.

Element Q has a low boiling point, low density and does not conduct electricity.

Which element is Q?

21 Which row describes a typical transition element?

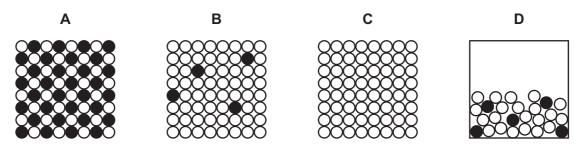

| | density in g/cm ³ | melting point in °C | boiling point in °C | color of oxide |
|---|---------------------------------|------------------------|------------------------|-------------------|
| Α | 0.97 | 98 | 883 | white |
| в | 2.64 | 769 | 1382 | white |
| С | 3.10 | -7 | 59 | yellow |
| D | 8.96 | 1085 | 2562 | red |

22 Helium is a noble gas.

Which statement is correct?

- **A** A helium atom has eight electrons in its outer shell.
- **B** Helium exists as diatomic molecules.
- **C** Helium is used as an inert atmosphere in lamps.
- **D** There are no naturally occurring chemical compounds of helium.

23 Which diagram represents a solid alloy?

24 Some reactions of three metals and their oxides are shown.

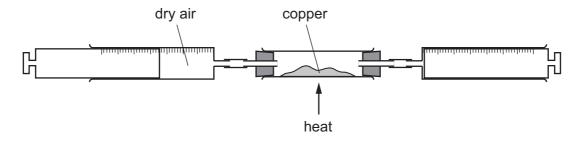

| metal | metal reacts with steam | metal oxide reacts with carbon |
|-------|----------------------------|-----------------------------------|
| х | no | yes |
| Y | yes | no |
| Z | yes | yes |

What is the order of reactivity of the metals?

| | most reactive | | least reactive |
|---|------------------|---|-------------------|
| Α | Х | Z | Y |
| В | Y | Х | Z |
| С | Y | Z | х |
| D | Z | Y | Х |

- 25 Which statement about the extraction of metals is correct?
 - **A** Aluminum is extracted from bauxite by electrolysis.
 - **B** Aluminum is extracted from hematite by heating with carbon.
 - **C** Iron is extracted from bauxite by heating with carbon.
 - **D** Iron is extracted from hematite by electrolysis.
- 26 Which statement explains why aluminum is used to manufacture aircraft?
 - **A** It has a low density.
 - **B** It is a good conductor of electricity.
 - **C** It is a good conductor of heat.
 - D It is ductile.

27 Dry air is passed over hot copper until all the oxygen has reacted.

The volume of gas at the end of the reaction is 120 cm^3 .

What is the starting volume of dry air?

A 132 cm³ **B** 152 cm³ **C** 180 cm³ **D** 570 cm³

28 A steel bicycle which had been left outdoors for several months was starting to rust.

What would not reduce the rate of corrosion?

- A Remove the rust and paint the bicycle.
- **B** Remove the rust and store the bicycle in a dry shed.
- **C** Remove the rust and wipe the bicycle with a clean, damp cloth.
- **D** Remove the rust and wipe the bicycle with an oily cloth.
- 29 Which statements about water are correct?
 - 1 Household water contains dissolved salts.
 - 2 Water for household use is filtered to remove soluble impurities.
 - 3 Water is treated with chlorine to kill bacteria.
 - 4 Water is used in industry for cooling.
 - **A** 1, 2, 3 and 4
 - **B** 1, 2 and 3 only
 - **C** 1, 3 and 4 only
 - **D** 2, 3 and 4 only

www.xtrapapers.com

30 Fertilizers are often mixtures of solid compounds.

Which compounds can be mixed to provide the three elements needed for healthy plant growth?

- A ammonium nitrate and calcium phosphate
- **B** ammonium nitrate and potassium chloride
- **C** ammonium phosphate and potassium chloride
- **D** potassium chloride and calcium phosphate
- **31** Carbon dioxide and methane are both greenhouse gases which contribute to climate change.

Which statement explains how greenhouse gases contribute to climate change?

- **A** They absorb heat radiation from the Earth.
- **B** They absorb heat radiation from the Sun.
- **C** They absorb light radiation from the Sun.
- **D** They cause acid rain.
- **32** Element Z forms an oxide, ZO₂. Three uses of ZO₂ are listed.
 - bleaching agent
 - killing bacteria
 - manufacturing an important acid

What is Z?

- A carbon
- B lead
- **C** nitrogen
- D sulfur

33 Limestone is an important material with many uses.

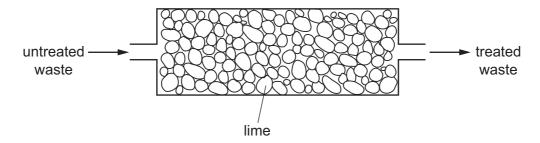

Limestone is heated to produce1..... and carbon dioxide.

This reaction is called2.....

Which words correctly complete gaps 1 and 2?

| | 1 | 2 |
|---|-------------|-----------------------|
| Α | lime | neutralization |
| в | lime | thermal decomposition |
| С | slaked lime | neutralization |
| D | slaked lime | thermal decomposition |

34 Lime is used to treat an industrial waste.

Which change occurs in the treatment?

| | untreated waste | | treated waste |
|---|-----------------|---------------|---------------|
| Α | acidic | \rightarrow | neutral |
| в | alkaline | \rightarrow | acidic |
| С | alkaline | \rightarrow | neutral |
| D | neutral | \rightarrow | acidic |

35 What is **not** the correct use of the fraction named?

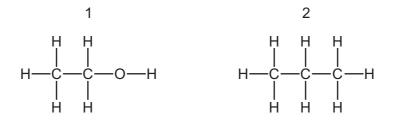

| | name of fraction | use |
|---|------------------|------------------------|
| Α | fuel oil | making waxes |
| в | gas oil | fuel in diesel engines |
| С | kerosene | jet fuel |
| D | naphtha | making chemicals |

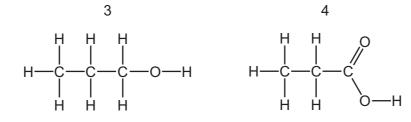

36 Four organic compounds are listed.

| ethane | | | | | | | | |
|---------------|--|--|--|--|--|--|--|--|
| ethanoic acid | | | | | | | | |
| ethanol | | | | | | | | |
| ethene | | | | | | | | |

Which bond do all four compounds contain?

- **A** C–C **B** C–H **C** C–O **D** O–H
- **37** The structures of some organic compounds are shown.

Which compounds belong to the same homologous series?

A 1 and 2 B 1 and 3 C 2 and 3 D 3 and 4

- 38 Which substances can be obtained by cracking hydrocarbons?
 - A ethanol and ethene
 - B ethanol and hydrogen
 - **C** ethene and hydrogen
 - **D** ethene and poly(ethene)

39 Sugars and ethene can both be made into ethanol using different reactions.

Which type of reaction is used in each case?

| | sugars to ethanol | ethene to ethanol |
|---|-----------------------|-------------------|
| Α | fermentation | addition |
| В | fermentation | cracking |
| С | incomplete combustion | addition |
| D | incomplete combustion | cracking |

40 Which substances are natural polymers?

| | ethanol | protein | starch | vinegar |
|---|--------------|--------------|--------------|--------------|
| Α | \checkmark | \checkmark | \checkmark | 1 |
| в | \checkmark | x | \checkmark | x |
| С | x | \checkmark | \checkmark | X |
| D | × | × | × | \checkmark |
