Paper 1

October/November 2006

2 hour 30 minutes

Candidates answer on the Question Paper. No Additional Materials required.

Candidate Name					
Centre		Candidate			
Number		Number			
READ THESE	INSTRUCTIONS FIRST				
Write your Cer	ntre number, candidate numbe	er and name on all the work you han	d in.		
Write in dark b	olue or black pen.				
You may use a	a pencil for any diagrams, gra	phs or rough working.			
Do not use sta	aples, paper clips, highlighters	, glue or correction fluid.			
DO NOT WRI	TE IN THE BARCODE.				
DO NOT WRI	TE IN THE GREY AREAS BE	TWEEN THE PAGES.			
Answer all que	estions.				
No marks will	be awarded for using brand na	ames of software packages or hardw	/are.		
			For Examiner's Use		
At the end of t	he examination, fasten all you	r work securely together.			
The number of marks is given in brackets [] at the end of each question					
or part question	n.				

This document consists of 18 printed pages and 2 blank pages.

7	(a)	Describe how a scientist might use an expert system to help identify mineral deposits.
		[3]
	(h)	Give another example of an area where an expert system could be used.
	(U)	OIVE another example of all area where all expert system could be used.
		[4]

	national company has changed from a manual filing system to a computer
usir 1 2	en compared with the manual filing system, state two benefits to the company of the computer-based system.
1	te two effects on the staff due to the introduction of a computer-based system.
 (i)	Give one reason why the company used parallel running as the method of changing from the manual system to the computer-based system.
(ii)	Give one example of an application for which parallel running would not be a suitable method of changeover.
	tem. Whousir 1 2 Sta 1 2 (i)

A c	A computer program is required which inputs 10 numbers, multiplies them together finally outputs the answer (the product). The following algorithm has been written to do				
1 2 3 4 5 6 7 8	<pre>count = 0 product = 0 while count <= 10 do input number product = product * number count = count + 1 print product endwhile</pre>				
(a)	There are three errors in the algorithm. Locate and describe these errors.				
	1				
	2				
	3				
	[3]				
(b)	A while do loop has been used in the algorithm. State another type of loop that could have been used.				
	[4]				

10 A robot arm is to be used to move some objects which are positioned on the grid Object "X" is located at A7 and is to be moved to F7. Object "Y" is located at C6 and is moved to G5.

ne grid 26 and is and right along en) so that the The START position for the robot arm is shown. The robot arm can travel left and right along the top of the grid, and the robot arm can extend (lengthen) and retract (shorten) so that the gripper at the end of the arm can reach any grid square.

The following commands must be used:

	Instructions for Robot Arm
Right n	Moves <i>n</i> squares to the right
Left n	Moves <i>n</i> squares to the left

Instructions for Robot Arm				
Down n	Moves <i>n</i> squares down (extend)			
Up n	Moves <i>n</i> squares up (retract)			
Close	Closes the gripper			
Open	Opens the gripper			

For example, to move block "X" from square A7 to F7 (beginning at START) would the following instructions:

Left 8
Down 6
Close
Up 6

Right 5 Down 6 Open

Write a set of instructions to transfer block "Y" from C6 to G5 (beginning at START).
