Paper 1

May/June 2012

2 hours 30 minutes

Candidates answer on the Question Paper.

No Additional Materials are required.

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use a soft pencil for any diagrams, graphs or rough working.

Do not use staples, paper clips, highlighters, glue or correction fluid.

DO **NOT** WRITE IN ANY BARCODES.

Answer all questions.

No marks will be awarded for using brand names of software packages or hardware.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

| For Examiner's Use |

4 A list of four printers and four different applications which use printers is shown below

(a) Using arrows, link each printer to the most appropriate application.

Printing documents in a factory environment which is dusty and damp

High quality printing of 30 000 colour booklets per day

Producing prototypes in resin of a new design

Producing a colour poster

3D printer

Dot matrix printer

Colour inkjet printer

Colour laser printer

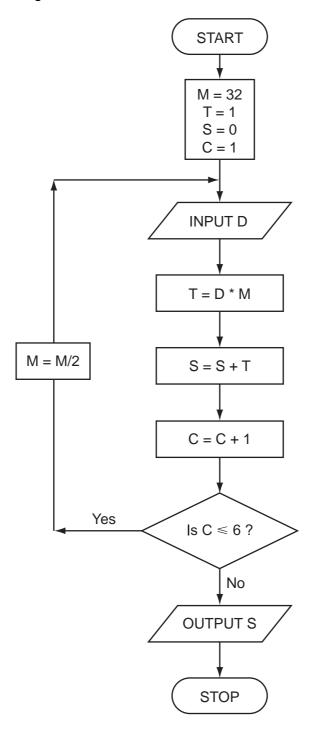

[4]

| (b) | Give one feature of each printer which makes it appropriate for the application. | For iner's |
|-----|--|------------|
| | 3D printer | Andie |
| | | Se. COM |
| | | |
| | Dot matrix printer | 1 |
| | | |
| | | |
| | Colour inkjet printer | |
| | | |
| | | |
| | Colour laser printer | |
| | | |
| | [4] | |

| (a) | Give three features you would expect to see in a typical Computer Aided Design program. |
|-----|---|
| | 1 |
| | |
| | |
| | 2 |
| | |
| | 3 |
| | <u> </u> |
| | [3] |
| | |
| (b) | Describe three specialist output devices which could be used with a CAD program when developing a new product. |
| | 1 |
| | |
| | 2 |
| | |
| | |
| | 3 |
| | |
| | [3] |

| (c) | Describe two potential health risks and one potential safety risk when using consystems. Health risk 1 | For iner's |
|-----|---|---------------|
| | Health risk 1 | de.co |
| | | 1 |
| | Health risk 2 | |
| | | |
| | Safety risk | |
| | [3] | |

Carefully study the following flowchart:

[4]

1, 0, 1, 1, 0, 1

| М | Т | S | С | D |
|---|---|---|---|---|
| | | | | |
| | | | | |
| | | | | |
| | | | | |
| | | | | |
| | | | | |
| | | | | |
| | | | | |
| | | | | |
| | | | | |

| (b) | What process does this flowchart perform? | |
|-----|--|---------|
| | | [1] |
| (c) | Predict the output from the flowchart for an input of 1, 1, 1, 1, 0, 0 | |
| | | [1] |

- 7 An expert system is being developed to diagnose faults in electronic equipment. Each of equipment is made up of the following components:
 - screen
 - keypad (containing F1 to F9 keys)
 - sound card and speakers
 - RAM and ROM
 - microphone
 - (a) The following series of questions were asked by the expert system. The responses by the user are also shown:

| | Question | Response | |
|--------|---|--------------------|--------------|
| ls th | e screen operating? | Yes | |
| If the | e F2 key is pressed, does the screen go green? | Yes | |
| If the | e F1 key is pressed, can sound output be heard? | No | |
| (i) | In which component is the fault likely to be? | | |
| | | | • |
| | | [1] |] |
| (ii) | What would the expert system do next to help diagnose the component(s)? | exact fault in the |) |
| | | | • |
| | | | |
| | | | |
| | | [2 |] |
| (iii) | What output would the expert system produce? | | |
| | | | |
| | | [1] |] |

| (b) | An expert system has an input-output interface. State three other parts that man typical expert system. |
|-----|--|
| | 1 |
| | 2 |
| | 3 [3] |
| (c) | The electronic equipment contains RAM and ROM. |
| | Give one use of each type of memory. |
| | RAM |
| | |
| | ROM |
| | [2] |

**www.xtrapapers.com

For iner's

8 Body mass index (bmi) is calculated using the following formula:

$$bmi = \frac{weight}{(height)^2}$$

Six people's data are shown in the spreadsheet below:

| | Α | В | С | D | E | F |
|---|----------|----------------|---------------|------|---|---|
| 1 | name | weight (kg) | height (m) | bmi | underweight, normal or overweight | |
| 2 | Theo | 70.0 | 1.87 | 20.0 | | |
| 3 | Sujatmi | 63.6 | 2.03 | 15.4 | | |
| 4 | Angela | 72.4 | 1.70 | 25.1 | | |
| 5 | Juan | 110.0 | 1.90 | 30.5 | | |
| 6 | Jatinder | 76.4 | 1.65 | 28.1 | | |
| 7 | lgor | 70.5 | 1.98 | 18.0 | | |
| 8 | | | | | | |

(a) What formulas must be in column D to calculate each person's bmi?

| | D |
|---|-----|
| 1 | bmi |
| 2 | |
| 3 | |
| 4 | |
| 5 | |
| 6 | |
| 7 | |

[2]

- (b) Column E indicates whether the person is underweight, normal or overweight.
 - (i) The following formula was typed into E2:

= IF(D2<18.5, "underweight", IF(D2>25, "overweight", "normal"))

What output would appear in E2?

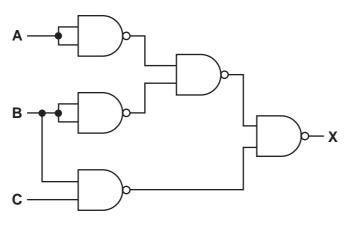

[1

(ii) What formula needs to be placed in D8 to find the average (mean) bmi?

[1

| (iii | If the formula in E2 were replicated down to E8, what formula would appear | 30 |
|-------|--|---|
| | [2 | |
| | | |
| | | } |
| Wh | nat formula needs to be placed in F2? | |
| | [1 |] |
| | | |
|) Giv | ve a suitable application for each of the following data capture devices: | |

| | [4 |] |
| | c) Cocal Wr ban rac ma n) Sta sho Ch Us Ch | Column F was added to the spreadsheet to show each person's ideal weight. This is calculated using twenty times the square of a person's height. What formula needs to be placed in F2? [1] Give a suitable application for each of the following data capture devices: barcode reader radio frequency identification (RFID) reader magnetic stripe reader [3] State two different validation checks and give an example of their use. Each example should be different. Check 1 Use Check 2 |

10 (a) Complete the truth table for the following logic circuit, which is made up of gates:

| Α | В | С | X |
|---|---|---|---|
| 0 | 0 | 0 | |
| 0 | 0 | 1 | |
| 0 | 1 | 0 | |
| 0 | 1 | 1 | |
| 1 | 0 | 0 | |
| 1 | 0 | 1 | |
| 1 | 1 | 0 | |
| 1 | 1 | 1 | |

(b) Name two other types of logic gate and complete their associated truth tables:

Gate 1: _____

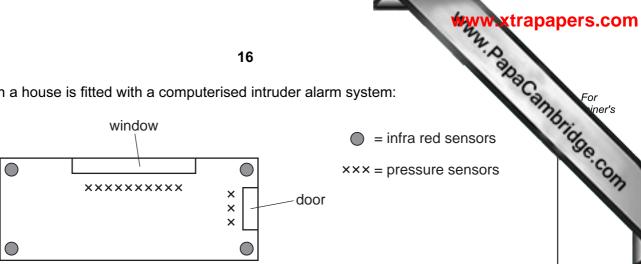

| Α | В | X |
|---|---|---|
| 0 | 0 | |
| 0 | 1 | |
| 1 | 0 | |
| 1 | 1 | |

| Gate 2: | | | | | | | | | | | | | | | |

15 An estate agent advertises houses for sale. The customer enquiries for a 7-day week are entered weekly into a computer.

Write an algorithm, using pseudocode or a program flowchart only, which:

- inputs the number of customer enquiries each day,
- inputs the house price each customer enquires about,
- outputs how many customers enquired each day about houses costing less than \$100 000,

outputs the percentage of all enquiries made during the week about houses costing

| more than \$500 000. | |
