

MARK SCHEME for the October/November 2012 series

0420 COMPUTER STUDIES

0420/12

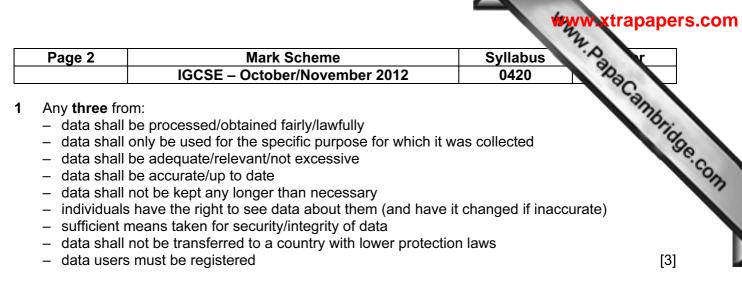

Paper 1, maximum raw mark 100

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2012 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

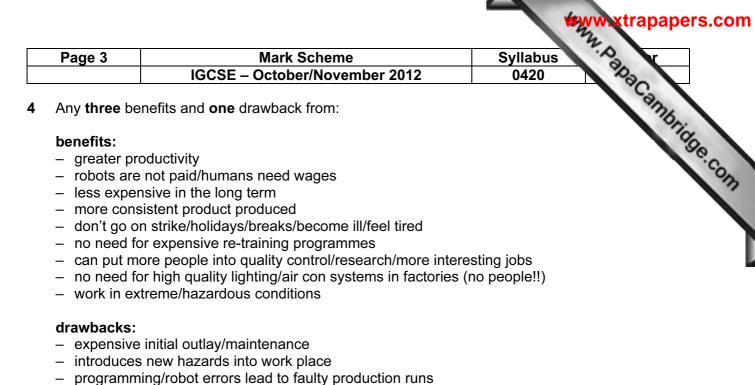

- 2 Any four from:
 - gather information from human experts
 - populate/create/design the knowledge base
 - create/design the inference engine
 - create/design the rules base
 - create/design the user interface
 - create/design output formats
 - create expert system shell
 - -- test system with data with known outcomes

3

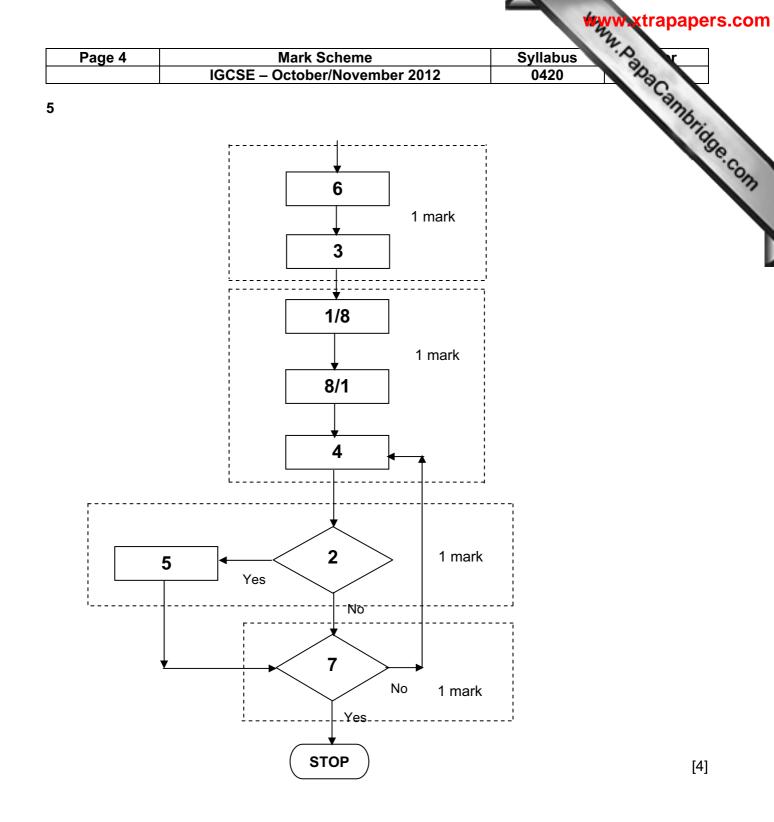

List of hardware items	Application
webcam, microphone, speakers	 video conferencing/chat
barcode reader, POS terminal	e.g. – supermarket checkout – shop sales point – stock control system – library systems
pressure sensor, ADC, lights, siren	 <u>burglar/intruder</u> alarm
data gloves, data goggles	 virtual reality (applications) (NOT VR) simulation e.g. motor racing simulator
light pen, plotter, 3D printer	 CAD (applications) e.g. <u>designing</u> buildings/cars

[4]

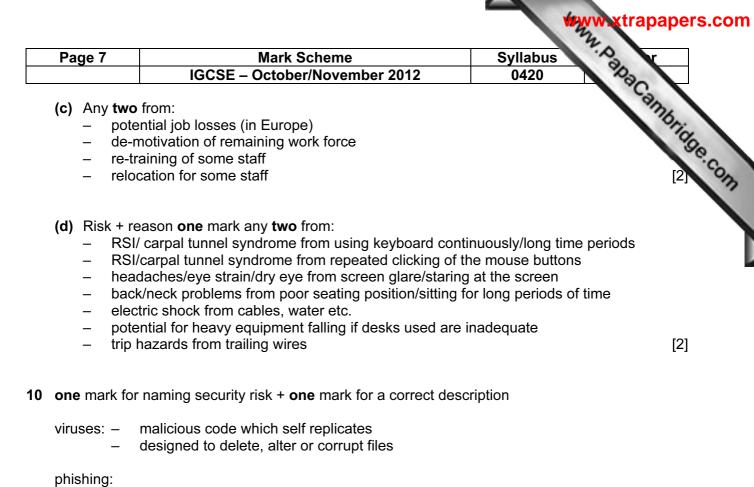

- cost of redundancies/retraining
- robot breaks down production is halted

one ma	ark fo	or name of method + one mark for corresponding benefit		www.xtrapapers.co
emails:	_	fast delivery of messages (to recipient's mail box)		High
	_	able to send attachments		.C.
	-	can store messages for later use		9
	_	auto-translation no language problems can open email at a convenient time		
video c	onfe	rencing/calling/chat:		
114000	_	removes need to travel (saves time and money)		
	_	allows face to face discussions		
	-	works in real time (only allow once)		
VoIP:	_	much cheaper than normal international calls		
	—	direct communication between people		
	-	works in real time (only allow once)		
chat ro	oms/	instant messaging:		
	-	instantaneous reply		
	-	anyone can join in		
social r	netwo	•		
	-	can ensure only your "friends" are in communication		
	-	usually free to join and use		501
	_	talk to (multiple) friends at the same time		[6]
(a) An	1 1 1 1	a from:		
(a) All	•	had actually described <i>verification</i>		
_		a could be incorrect, therefore same incorrect data typed in	twice	
_		cept description of validation process e.g. range check		[2]
(b) (i)	An	y one from: the computer appears to "freeze"/"hang"		
	_	computer won't respond		
	_	failure of hardware (stops computer normal functioning)		
	-	failure of software (stops computer normal functioning)		[1]
(ii)	An	y one from:		
()	_	back up her files (onto CD/DVD/memory stick)		
	_	send files to a central database on the Internet		
	-	cloud computing		[1]
(c) An	-	e from: too large		
_		e didn't have correct software on her computer to open the a	attachme	nt
_		file was somehow corrupted during transfer		
_		son forgot to attach file		
_	•	ssword protected		
_		crypted		
_		alid digital signature		
_	reje	ected by virus checker		[1]

(d) A	Any one	benefit and one drawback		ana Cambrid
k	penefit:			1
-	- no tr	ailing wires		
-		estriction on movement of mouse		
-	- can	work anywhere (as long as in range)		
dr	awback			
-		icted range of operation		
-		ds batteries		
-	•	sible interference		[2]
	ΝΟΤ	WiFi security		
(a) A	Any two	from:		
-	- poor	/low resolution		
-		bit map image		
-	- insuf	fficient pixel density/picture has less pixels		[2]
(h) /	Any two	from		
(0) /	•	icture is enlarged covers larger area		
_	•	so pixel density gets smaller and sharpness of ima	ane is lost	
_		Is become too big		[2
	P			L-
(c) A	Any one	from:		
-		er (e.g. dot matrix)		
-		vision/monitor/screen		
-	- proje	ector		[1
(പ)		un large emplant of memory (atorgae encod		
(d) –		s up large amount of memory/ <u>storage</u> space nload/upload takes longer		[1
_	- 0000	nioad/upioad takes longer		Ĺ
(2) /	Nov two	from		
(a) /	Any two - Jowe	er costs in wages		
_		er rental costs (for office)		
_		er coverage of time zones		
_		can be done in the developing counties when the	re are strikes in Europe	Э
-		tion of new jobs in the developing counties	·	[2
(b) A	Any two			
-		lems with dialects/accents/language		
-		rent cultures		
-		to "scripts" so can be frustrating to the customer		
-	-	distances may lead to poor reception		
_	-	ative public reaction to overseas call centres		
_		e.g. to set up centres, train staff of setting up new centres/training staff		
_		ware of European legislation (e.g. Data Protection	Acts)	[2
_			, (0(0)	[2

- sending emails to recipients claiming to be a legitimate company
- when email opened, recipient is directed to a bogus website/gets details about customer

pharming:

- malicious code installed on PC or a server
- code misdirects user to a fraudulent website (without their knowledge)

hacking:

- unauthorised access to a computer system
- in an effort to use data illegally (e.g. fraud)
- to change/delete/corrupt data on a computer

key logging/spyware

- program installed on a computer to monitor all key presses
- each key press is relayed back to the program writer
- or spyware
 - scan files on hard drive
 - 'snoop' applications

shoulder surfing:

- the act of watching a person key in secure data (e.g. PIN, password, etc.)
- stealing security data by using binoculars, CCTV near ATMs etc. to watch key presses etc.

war driving:

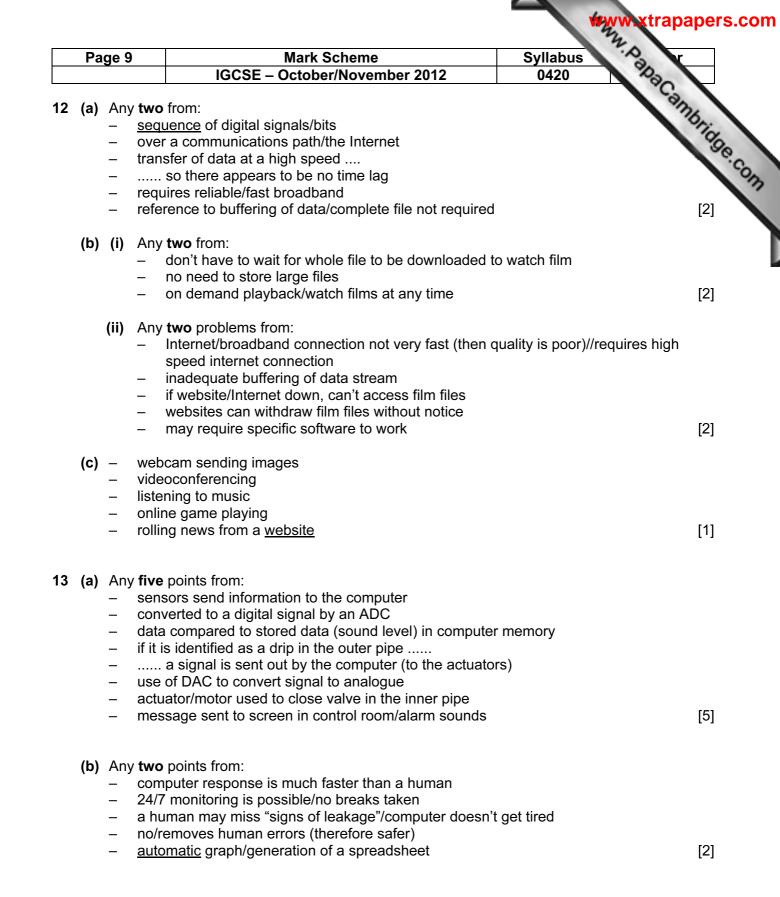

- locating a wireless network by touring round an area
- requires a laptop, special software and an antenna
