Paper 3 Alternative to Coursework

October/November 2013

1 hour 30 minutes

Candidates answer on the Question Paper.

No Additional Materials are required.

#### **READ THESE INSTRUCTIONS FIRST**

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use a soft pencil for any diagrams, graphs or rough working.

Do not use staples, paper clips, highlighters, glue or correction fluid.

DO **NOT** WRITE IN ANY BARCODES.

There is one compulsory question on this paper.

Each part must be answered in the space provided.

No marks will be awarded for using brand names of software packages or hardware.

You are advised to spend at least 20 minutes reading the information at the start of question 1 since this information is needed to answer all the sections in this question.

All answers must refer to this information system.

The number of marks is given in brackets [] at the end of each part question.

The maximum number of marks is 60.

For Examiner's Use

This document consists of 13 printed pages and 3 blank pages.

In this question you are asked to read about:

an existing manual, paper-based system for parents to book and pay for their child to take part in a school trip,

ir child to take be introduced a web-based semi-automatic booking and payment system that is intended to be introduced as a replacement.

You are given a description of both the existing and the intended new web-based computerised system.

### **Description of the existing system**

Students wishing to go on a school trip take a form home for their parents to complete. There is a standard form that gives details of the trip, asks for the parent's consent and shows a record of payments made.

WANN. Patra Cambridge. Com In addition a record of payments received from each student is kept in an accounts book school office. When a student brings in a payment it is recorded in the accounts book and the consent form. If the full amount has not been received 4 weeks before the start of the to then a reminder letter is sent to the parent.

# Description of the proposed computer-based system

The intention is to replace all the paperwork by introducing a web-based semi-automatic booking and payment system which will contain all the information described above, but will allow parents to log on securely to the school's intranet from a computer at home.

In the new system, a parent is given a unique secure logon to complete the online consent form and to make payments using a credit/debit card. Every payment is confirmed by email and, once confirmed, shown on the online form. If the full amount has not been received 4 weeks before the start of the trip then an email reminder is sent to the parent. The record of payments is automatically transferred to the spreadsheet kept on the school office computer.

A systems analyst is to be employed to review the existing manual method. The systems analyst will be responsible for drawing up an action plan for the new web-based system. This will then be designed, built, tested and implemented. Technical and user documentation will be produced. Six months after the introduction of the new system, a full evaluation of its performance will be made.

[3]

- (e) Draw a systems flowchart, with a key, to show how the web-based school trip be and payment system should work.
  - (i) Include in the key:
    - 4 symbols used in your flowchart
    - A description of the purpose of each of these symbols

Key		
Symbol	Description	

[4]

- (ii) Include in your systems flowchart:
  - Completing the consent form
  - Making a payment
  - Checking for final payment

[6]

- **(f)** Write an algorithm, using pseudocode or a flowchart, which:
  - inputs the amount to be paid by a parent (AmountToPay)
  - adds this to the total amount already paid by that parent
  - checks the total amount paid does not exceed the total price of the trip
  - exits if this is the case
  - outputs the amount now outstanding
  - outputs appropriate prompts and messages
