UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS International General Certificate of Secondary Education

WANN, PapaCambridge.com MARK SCHEME for the October/November 2010 question paper

for the guidance of teachers

0445 DESIGN AND TECHNOLOGY

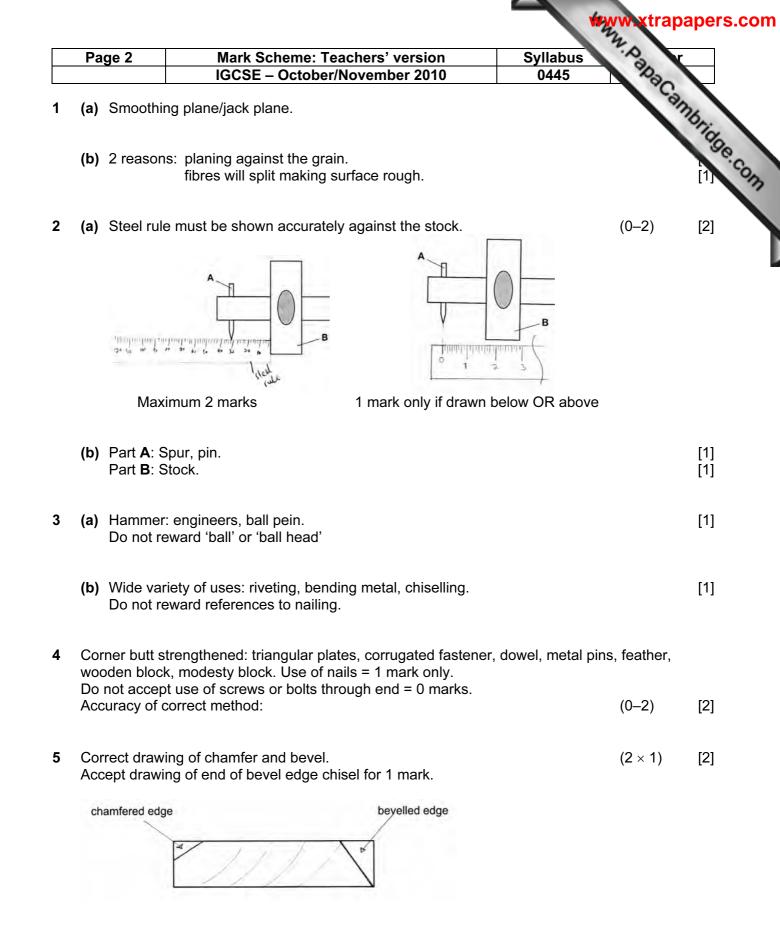

0445/33 Paper 3 (Resistant Materials), maximum raw mark 50

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2010 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

	Page 3	Mark Scheme: Teachers' version IGCSE – October/November 2010	Syllabus 0445	
	(a) Gear wh	eels: nylon, polythene.	0443	aCambri
	(b) Property	: hard, tough, good bearing surface, self-lubricating,	Syllabus 0445 wear and friction resist	ant.
	(c) Manufac	turing process: injection moulding.		[1]
	(a) Process:	sand casting/die cast/stamped sheet steel. Accept	'casting'.	[1]
	• •	metal: aluminium, brass alloys. linked/suitable for process named in (a) .		[1]
	Two reasons	for scrapwood: guide for saw cut, protect surface of increase surface area of cramping p		[1] [1]
	A: surface pla B: surface ga	ate. auge. Accept scribing block.		[1] [1]
0	Accurate cor	ner halving joint:	(0-3)) [3]
	uni-			

11	(a)	Suitable width: Suitable thickness:		[1] [1]

(b)	(i)	Countersunk head shown: Clearance hole shown:	(1) (1)	[2]
	(ii)	Two advantages of screws over nails: can be removed, stronger, unlikely to be pulled out, no sharp heads, nails can split near end of wood	I,	[1]
		holds tighter.	,	[1]
	(iii)	Advantage of brass over steel: does not rust.		[1]
