- (d) The support for the neck of the guitar is plastic coated.
 - (i) Give one reason why the support is plastic coated.

......[1]

(ii) Use sketches and notes to show how the support could be plastic coated.

Use sketches and notes to show a design for a jig that could be used when drilling the holes in the back plate.

The drilling jig must:

- secure the back plate when it is being drilled;
- position the two holes accurately.

(f) The neck support must be capable of being moved up or down to take different heights of guitar.

Use sketches and notes to show how the design of the guitar stand could be modified so that the neck support could be made to move up or down.
