UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

International General Certificate of Secondary Education

MARK SCHEME for the October/November 2009 question paper for the guidance of teachers

0680 ENVIRONMENTAL MANAGEMENT

0680/01

Paper 1, maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2009 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Page 2	Mark Scheme: Teachers' version	Syllabus
	IGCSE – October/November 2009	0680

1 (a) (i) a gas in the atmosphere which absorbs (reflected) heat from earth/ idea of re sun's heat; warming up atmosphere;

(ii) carbon dioxide/ CO₂/CO;

(b) rises;

sensible figures quoted;

supported with correct figures;

but fluctuates up and down as does so;

fossil fuel burning/eq emissions account for rise;

deforestation/eq;

seasonal changes in plant uptake for fluctuations;

NOTE Max 2 for description OR explanation points

[3]

(c) (i) CFC-

aerosols/fridges/air conditioning (units)/fire extinguisher;

[1]

(ii) methane-

rice paddies/cattle/grazing/decomposition in landfill/pockets in crust/sea bed;

[1]

(iii) CFC-

use alternatives/ban/HCFC;

methane-

give cows more digestible diet/anti 'wind' agents in food/develop rice which can grow in drier conditions:

reject references to burning

[2]

2 (a) (i) plates moving towards each other (label not needed but arrows/eq to show direction are needed);

oceanic/one plate shown going over other/subduction;

one plate labelled (then other implied)

volcano shown on continental shelf (labelled or accept suitable shape);

MAX 2 if one or no labels

[4]

(ii) volcanic ash/eq contains nutrients/eq OR is fertile/eq;

needed for crop/plant growth;

[2]

			IGCSE – October/November 2009 0680	20
	(b)	(i)	ENVIRONMENT land covered in deposits; air polluted/eq; deforestation; AVP; HOUSES destroyed; burnt; buried; by lava; possessions lost;	a Cambridge
			FARM destroyed; by burying; TRANSPORT roads covered/eq; poor visibility; cars burned;	
			tyres melted; airport destroyed;	[2]
	(ii)	ban houses near volcano (zoning); monitor and; warn; evacuate; food/water/medical aid; training in emergency procedures; good communications; channelling lava; bombing to divert;	[2]
3	(a) ((i)	400 million	[1]
	(ii)	6400 million MAX 1 if no units	[1]
	(i	ii)	death rate lower; due to: better medical attention; better sanitation; better water supply; better food production/supply; preventive medicine (vaccination)/ eq; AVP;; Any 2 × 2	[4]
	(b)	(i)	unemployment; high crime rate; war; poverty; lack of services; security; ½ each round down	[2]
	(ii)	possibility of having better: housing/health services/education/water supply/electricity supply/source of food employment; AVP

4	(a) (i)	B - C - D - E - F - G -	Humboldt/Peruvian; Benguela; Gulf Stream/NAD; Canaries; N. Atlantic Drift; Labrador, Brazil; Mozambique;		Syllabus 0680	Cambridge [2]
	(ii)	cold	toward equator (or a	way from pole); warm from equa	ntor (towards poles);	[1]
	(iii)		ent F makes Labrado of same latitude, diff	•		[2]
	(b) (i)		stal winds push surfac warm water is replac	ce water out to sea; ed by rising of colder, nutrient ric	ch water;	[2]
	(ii)	this so w fish mine whice	coastal winds weaker ses evaporation; causes reversal in surarm water moves too migrate/move away; erals used by algae; ch feed fish; gen reduced in warm	wards the coast;		[3]
5	(a) (i)	Y–ca Z–w	ght/sunlight/sun/eq; arbon dioxide; ater; ept formulae			[3]
	(ii)	nutri	ents/minerals/fertilise	ers;		[1]
	(iii)	too a	r in oxygen/air/waterlo acid/alkaline; hin/ eroded/ compac salty/polluted;			
		AVP	•			[2]
	(b) (i)	tree- cate	– rpillar AND birds–	producer; consumer;		[1] [1]
	(ii)	pred	lation/carnivore;			[1]
	(iii)	polli	nation/symbiosis;			[1]

• () () () ()			S

6 (a) (i) (high sea temp), causes air above to be heated; convection currents;

this warm air rises;

clouds form;

low pressure develops;

this sucks up more air from sea surface;

air sinks in middle;

wind speeds increase;

spiral winds;

(ii) Y; [1]

- (b) (i) spread of malaria/cholera/other water related disease/breathing problems;
 - (ii) total destruction of (any sensible aspect of infrastructure)/crops/livestock/vegetation; [2]
- (c) (i) period of dry weather/low or no rainfall; lasting longer than expected/where such weather not the norm; [2]
 - (ii) dam building to conserve water/storing water/irrigation; plant trees; improve soil with compost; drought resistant strains; desalination plant;
