UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

International General Certificate of Secondary Education

MARK SCHEME for the May/June 2010 question paper for the guidance of teachers

0680 ENVIRONMENTAL MANAGEMENT

0680/41 Paper 41 (Alternative to Coursework), maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the May/June 2010 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

	Page 2)	Mark Scheme: Teachers' version	Syllabus	Y					
				IGCSE – May/June 2010	0680	8					
1	(a)		Mark Scheme: Teachers' version IGCSE – May/June 2010 some products used for food/personal use; timber used for building; no spare products used for high value; export/eq; not profitable/not of high value; country gains foreign exchange/revenue/eq;								
	(b)	(b) country gains foreign exchange/revenue/eq; can be used to pay for imports; sensible reference to balance of payments/contr national budget/debt/company profits; helps government spending on infrastructure maintains/ creates jobs;									
	(c)	(i)	20 p	lants on each row (+/-1); even spacing;		[2]					
		(ii)	; plots;;	[4]							
		(iii)	allov	v correct figure from drawn graph; (58–62 usually)		[1]					
		(iv)		ncrease in yield compared to 70 thousand; so pro k for no return/eq; more work to harvest; more expe		ible; more [2]					
	(d)	 (d) (i) as planting density increases reduction of soil erosion increases/eq; not much of soil erosion between 60–80 planting density/eq; 									
		(ii)		or 60 max yield (per Ha)/profit compared to planting ds/eq;	g costs; nutrients retain	ed to help [2]					
		(iii)	remo	oval of topsoil/eq;		[1]					
		(iv)	inter	oval of plant cover; overcropping; loss of root reption/described; infiltration/soil saturation; remover; erosion by water; wind; reference to flooding;	_						
	(e)	(i)	ntative/eq; only diamete	er [2]							
		(ii)		able table, rows/columns for 25 items of data; den dings;	sities/field number; and	l diameter [3]					
		(iii)		e measurements for each pineapple to see change eral densities sampled to see pattern/could be prese		growth/eq; [2]					
2	(a)	(i)	4000	0;;		[2]					

(ii) so government could gain more revenue form HEP/eq; people would not object to

(b) generate <u>more</u> power/electricity; unlikely to dry out/eq; allow one of – does not release carbon dioxide/so does not contribute to greenhouse effect/ low running costs/renewable

scheme;

source of energy;

Page 3				Mark Scheme: Teachers' version		Syllabus	T. D.	
				IGCSE – May/June 2010		0680	Tage 1	
	(c)	so r	ng/eq;					
	(d)	(i)	readings close [3]					
		(ii) Sample point 1: nitrate/55; much higher than the others; a measuring e occurred; ignore this reading as it's the only one not in close agreement/ed						
		(iii)	to m	ake it more reliable;			[1]	
	(e)	(e) algal bloom; blocks out light so plants die; bacteria multiply; use up ox reference to eutrophication;						
	(f)	 (i) overall bromacil passes through soil to water; 50 m in 60 days; breaks after 180 days/eq; enters the water; from both fields; reference to absence; 						
		(ii)	P – 3	S cross <i>and</i> T tick;			[1]	
		(iii)	•	n with a larger soil barrier) bromacil ente age bromacil might do to water; not worth ta			lo not know what [2]	
3	(a)	(i)	adva	antage must be a statement amplified in cand	didate's d	own words;	[1]	
		(ii)	disa	dvantage must be a statement amplified in c	andidate	's own words	[1]	
		(iii)	disa	dvantage must be a statement amplified in c	andidate	's own words	; [1]	
	(b)	(i)	non	polluting/oxygen not a greenhouse gas/eq/u	ses rene	wable energy	; [1]	
		(ii)	jobs	<i>vour</i> : could develop aluminium processing in ; raises standard of living; not polluting; trans se own bauxite later if price rises; AVP;				

against: too much electricity used so not enough for the country; country will not make much money/company will make most money; country needs to invest heavily for

several years/other things to spend money on; AVP;

MAX 4 for an argument only in favour or against
