UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

International General Certificate of Secondary Education

MARK SCHEME for the May/June 2012 question paper for the guidance of teachers

0680 ENVIRONMENTAL MANAGEMENT

0680/43

Paper 4 (Alternative to Coursework), maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2012 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

General notes

Symbols used in Environmental Management mark schemes.

/ separates alternatives for a marking point - other valid ways of expressing the same idea are also credited

separates points for the award of a mark

[3] indicates the number of marks available

[max 3] the number shows the maximum number of marks available for the question where there are more marking points than total marks available

when part of the marks of a question must come from part of the mark scheme, this is [max 3] indicated by non-bold marks showing the internal maxima for different parts of the question

these non-bold marks are also used to show marks for bands where banded mark schemes are used

italic indicates that this is information about the marking points and is not required to gain

italic text is also used for comments about alternatives that should be accepted, ignored

or rejected

or reverse argument - shows that an argument from an alternative viewpoint will be ora

credited

AW alternative wording, sometimes called 'or words to that effect' -

AW is used when there are many different ways of expressing the same idea

() the word / phrase in brackets is not required to gain marks but sets the context of the

response for credit

e.g. (nuclear) waste - nuclear is not needed but if it was described as a domestic waste

then no mark is awarded

underlined words - the answer must contain exactly this word volcanic

error carried forward - if an incorrect answer is given to part of a question, and this ecf answer is subsequently used by a candidate in later parts of the question, this indicates

that the candidate's incorrect answer will be used as a starting point for marking the later

parts of the question

2 (a) (i) (2000 ÷ 25 =) 80 (buckets);; if answer incorrect, credit correct working to make

(ii) use of renewable wooden boats / reuse of rice bags / waste materials for sail / AW sand replenished by river system / AW;

collection unlikely to exceed replenishment;

mechanical dredging may do more damage / ora;

AVP; e.g. no fuel burnt / no oil released / no emissions of greenhouse gases;

(iii) government not making any money;

collect no tax from extraction / AW;

no selling of licences;

government wants to control resource / environment;

ref. to worker safety;

(b) (i) best and worst months named

December / January AND June;

reasons

least rainfall / fewest wet days AND highest rainfall / most wet days;

[2]

[max 2]

[max 2]

(ii) lack of room;

cash flow / too much money needed to hold / produce stock / AW;

fear of being stolen;

limited water supply;

investment too expensive / too much money needed for machinery;

too much money for sand / cement / materials;

accept ora [2]

(iii) hollow

insulation;

ref. to easier transport / weight;

waste rice husks

good use of agricultural waste;

no disposal problem of rice husks;

rice husks a cheap resource;

accept in either, once only

less materials / sand / cement used (per block);

lower cost of sand;

lower cost of cement; [max 3]

[max 1]

(d) developments

control of cement dust;

more crops;

mixed cropping;

comment on supply of vitamins;

sustainable block production using rice husks;

allow some / controlled mining for wealth of nation / employment / reduce poverty;

AVP; [max 5]

restrictions:

development of more cement factories;

control of sawmill waste into rivers;

alternative uses e.g. fuel;

strict controls on mining to prevent environmental damage;

ref. to family planning;

AVP; [max 5] [max 7]
