

### MARK SCHEME for the May/June 2013 series

# 0460 GEOGRAPHY

0460/13

Paper 1, maximum raw mark 75

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

|         | IGCSE – May/June 2013 | 0460       |

#### (c) Levels marking

ambridge.com Level 1 (1–3 marks) Statements including limited detail explaining the factors which have attracted high technology industries.

Level 2 (4–6 marks) Uses named example More developed statements describing explaining the factors which have attracted high technology industries.

(NB MAX 5 MARKS WITH NO EXAMPLE)

Level 3 (7 marks) Uses named example Comprehensive and accurate statements including some place specific reference.

Answers are likely to refer to factors such as: transport environment cost of land proximity to universities for research workers availability of land/space
