

MARK SCHEME for the May/June 2013 series

0460 GEOGRAPHY

0460/43

Paper 4 (Alternative to Coursework), maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

 (ii) Being unable to count accurately at <u>busy</u> times/lots of traffic/traffic going too fast/too many lanes to count. Students losing concentration/bored/no break Breathing difficulties/breathing exhaust fumes Timings is hard to synchronise Specific weather difficulty – e.g. rain ruins paper/sunstroke Keep returning to do count/meet at different times (3 @ 1) [3] (b) (i) 158 [1] (ii) Completion of divided bar graph – van/minibus to 140 & lorry/bus to 158 for 1 mark each. Don't need V & L [2] (iii) Pie Chart [1] (iv) Hypothesis is true – 1 mark reserve Total number of vehicles decreases during day Bikes also decreases during day Cars/vans/lorries slightly increase then decrease/decrease overall Paired data to show changes to 2 mark max – need 2 times of day & figures e.g. at 08.00 total was 160 & at 14.00 total was 126 e.g. at 08.00 there were 8 bikes and 2 bikes at 17.00 [4] (v) Number: less vehicles at site 7/more at site 3 Type: more lorries/vans/less cars at site 7 	Pa	ge 2	Mark Scheme	Syllabus	r
 Synchronising timing/start & finish at same time Agree vehicle categories Information to include on recording sheet/put location or date Method – tally count/automatic counters [4 (ii) Being unable to count accurately at <u>busy</u> times/lots of traffic/traffic going too fast/too many lanes to count. Students losing concentration/bored/no break Breathing difficulties/breathing exhaust fumes Timings is hard to synchronise Specific weather difficulty – e.g. rain ruins paper/sunstroke Keep returning to do count/meet at different times (3 @ 1) (b) (i) 158 (ii) Completion of divided bar graph – van/minibus to 140 & lorry/bus to 158 for 1 mark each. Don't need V & L (iii) Pie Chart (iv) Hypothesis is true – 1 mark reserve Total number of vehicles decreases during day Bikes also decreases during day Cars/vans/lorries slightly increase then decrease/decrease overall Paired data to show changes to 2 mark max – need 2 times of day & figures e.g. at 08.00 total was 160 & at 14.00 total was 126 e.g. at 08.00 there were 8 bikes and 2 bikes at 17.00 (v) Number: less vehicles at site 7/more at site 3 Type: more lorries/vans/less cars at site 7 			IGCSE – May/June 2013	0460 230	
 fast/too many lanes to count. Students losing concentration/bored/no break Breathing difficulties/breathing exhaust fumes Timings is hard to synchronise Specific weather difficulty – e.g. rain ruins paper/sunstroke Keep returning to do count/meet at different times (3 @ 1) [3 (b) (i) 158 [1 (ii) Completion of divided bar graph – van/minibus to 140 & lorry/bus to 158 for 1 mark each. Don't need V & L [2 (iii) Pie Chart [1 (iv) Hypothesis is true – 1 mark reserve Total number of vehicles decreases during day Bikes also decreases during day Cars/vans/lorries slightly increase then decrease/decrease overall Paired data to show changes to 2 mark max – need 2 times of day & figures e.g. at 08.00 total was 160 & at 14.00 total was 126 e.g. at 08.00 there were 8 bikes and 2 bikes at 17.00 [4 (v) Number: less vehicles at site 7/more at site 3 Type: more lorries/vans/less cars at site 7 	(a)		Split into groups/pairs Organise tasks within group Which points on the roads to do the survey Which day/when to do the survey What equipment they would need – stopwatch/clock/con Synchronising timing/start & finish at same time Agree vehicle categories Information to include on recording sheet/put location on		mbrie [4
 (ii) Completion of divided bar graph – van/minibus to 140 & lorry/bus to 158 for 1 mark each. Don't need V & L (iii) Pie Chart (iv) Hypothesis is true – 1 mark reserve Total number of vehicles decreases during day Bikes also decreases during day Cars/vans/lorries slightly increase then decrease/decrease overall Paired data to show changes to 2 mark max – need 2 times of day & figures e.g. at 08.00 total was 160 & at 14.00 total was 126 e.g. at 08.00 there were 8 bikes and 2 bikes at 17.00 (v) Number: less vehicles at site 7/more at site 3 Type: more lorries/vans/less cars at site 7 			fast/too many lanes to count. Students losing concentration/bored/no break Breathing difficulties/breathing exhaust fumes Timings is hard to synchronise Specific weather difficulty – e.g. rain ruins paper/sunstro	oke	[3
 each. Don't need V & L (iii) Pie Chart (iv) Hypothesis is true – 1 mark reserve Total number of vehicles decreases during day Bikes also decreases during day Cars/vans/lorries slightly increase then decrease/decrease overall Paired data to show changes to 2 mark max – need 2 times of day & figures e.g. at 08.00 total was 160 & at 14.00 total was 126 e.g. at 08.00 there were 8 bikes and 2 bikes at 17.00 (v) Number: less vehicles at site 7/more at site 3 Type: more lorries/vans/less cars at site 7 	(b)	(i)	158		[1
Don't need V & L[2](iii) Pie Chart[1](iv) Hypothesis is true – 1 mark reserve Total number of vehicles decreases during day Bikes also decreases during day Cars/vans/lorries slightly increase then decrease/decrease overall Paired data to show changes to 2 mark max – need 2 times of day & figures e.g. at 08.00 total was 160 & at 14.00 total was 126 e.g. at 08.00 there were 8 bikes and 2 bikes at 17.00[4](v) Number: less vehicles at site 7/more at site 3 Type: more lorries/vans/less cars at site 7[4]		• •		& lorry/bus to 158 for 1 mark	
 (iv) Hypothesis is true – 1 mark reserve Total number of vehicles decreases during day Bikes also decreases during day Cars/vans/lorries slightly increase then decrease/decrease overall Paired data to show changes to 2 mark max – need 2 times of day & figures e.g. at 08.00 total was 160 & at 14.00 total was 126 e.g. at 08.00 there were 8 bikes and 2 bikes at 17.00 [4 (v) Number: less vehicles at site 7/more at site 3 Type: more lorries/vans/less cars at site 7 					[2
 Total number of vehicles decreases during day Bikes also decreases during day Cars/vans/lorries slightly increase then decrease/decrease overall Paired data to show changes to 2 mark max – need 2 times of day & figures e.g. at 08.00 total was 160 & at 14.00 total was 126 e.g. at 08.00 there were 8 bikes and 2 bikes at 17.00 [4 (v) Number: less vehicles at site 7/more at site 3 Type: more lorries/vans/less cars at site 7 		(iii)	Pie Chart		[1
Type: more lorries/vans/less cars at site 7			Total number of vehicles decreases during day Bikes also decreases during day Cars/vans/lorries slightly increase then decrease/decrea Paired data to show changes to 2 mark max – need 2 ti e.g. at 08.00 total was 160 & at 14.00 total was 126		[4
		. ,	Type: more lorries/vans/less cars at site 7	(2 @ 1)	[2

Paç	ge 4	Mark Scheme IGCSE – May/June 2013	Syllabus 0460	B.	_
		1003E - May/Julie 2013	0400	Se	
	Check depth/don't go in deep water Wear shoes/wellingtons Don't do fieldwork alone – at least two preferably three people per group Wear waterproofs/warm clothing/appropriate clothing/gloves/hats Keep a look out for dangerous animals/mosquito spray Don't do fieldwork if river is badly polluted Tell someone where you are going/take a mobile phone Beware of slippery rocks				
	Wea	ar sunblock		(2 @ 1)	[2]
(b)	(i)	Ranging poles/poles Tape measure/metre rule Float/orange/dog biscuit/a floating object Stopwatch/watch/clock		(3 @ 1)	[3]
	(ii)	Average length of time = 56.4 (secs) Distance/Time = 10 (m)/56.4 (secs) or calculated figure =0.18 m/sec/0.177			[3]
(iii)		Measurements taken at different times/different flow cond Floats got stuck/obstacles blocking floats Student error/timing error/measuring error Measurements taken at different points across river/insid Use of different types of float		(2 @ 1)	[2]
(iv)	Two <u>vertical</u> surveying poles <u>Distance</u> apart/at least 5 m apart Line up clinometer between <u>same points</u> on the poles Measuring <u>angle</u>			[3]
(v)		Hypothesis is incorrect – 1 mark reserve Steeper gradient = lower velocity/gentler gradient = highe Use of paired data from 2 sites – to 1 mark max e.g. at site 1 gradient = 8 degrees & velocity = 0.29, at s & velocity = 0.43	-	= 6 degrees	[3]

Page 5	Mark Scheme S	yllabus	r
	IGCSE – May/June 2013	0460	
	Tape/rope & tape Pole	(2 @ 1)	ambric
• •	Completion of cross-section 2.5 m = 0.30 m = 1 mark Completion of line = 1 mark	(2 @ 1)	[2]
	Completion of scatter graph 3.5 m – 0.29 m/s Don't need point 1		[1]
	Hypothesis 2 is correct/partially correct – 1 mark reserve Anomaly at site 2 or 3 Use of paired data from 2 sites – to 1 mark max e.g. site 1 w.p. = 3.5 & velocity = 0.29 & at site 5 w.p. = 12.1 a Credit data to show anomaly	and velocity = 0.47	[3]
([Too deep to reach the bed/cannot reach river bed Tape may not be long enough Current may move tape/pull tape downstream/lift it from bed Dangerous <u>because</u> too deep/fast flowing	(2 @ 1)	[2]
-	act People pollute the river with waste water from a factory ple throw household rubbish into the river – 1 mark reserve		
Decia Devis Test Test Surva Meas Sam Sites Com	stigation ide how many sites to investigate and where ise a data collection sheet to record results of visual survey a acidity of water/use pH paper a clarity/colour of water see if can see through water vey water life, using a species indicator (Biotic Index) usure water temperature apling technique s before & after pollutant apare results at different sites vey types of litter vey people about change		
Bank	er possible investigations into human impact on flow: k strengthening reduces bank erosion r or dam construction decreases flow nnel straightening or dredging increases velocity		[4]
Char	nnei siraionienino or oregoino increases veiociiv
