11 Brad traveled from his home in New York to Chamonix.

- He left his home at 16 30 and traveled by taxi to the airport in New York. This journey took 55 minutes and had an average speed of 18 km/h.
- He then traveled by plane to Geneva, departing from New York at 22 15. The flight path can be taken as an arc of a circle of radius 6400 km with a sector angle of  $55.5^\circ$ . The local time in Geneva is 6 hours ahead of the local time in New York. Brad arrived in Geneva at 11 25 the next day.
- To complete his journey, Brad traveled by bus from Geneva to Chamonix. This journey started at 13 00 and took 1 hour 36 minutes. The average speed was 65 km/h. The local time in Chamonix is the same as the local time in Geneva.

Find the overall average speed of Brad's journey from his home in New York to Chamonix. Show all your working and give your answer in km/h.
