Paper 3 (Core) May/June 2011

Geometrical instruments

2 hours

Candidates answer on the Question Paper.

Additional Materials: Electronic calculator

Mathematical tables (optional) Tracing paper (optional)

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use a pencil for any diagrams or graphs.

Do not use staples, paper clips, highlighters, glue or correction fluid.

DO NOT WRITE IN ANY BARCODES.

Answer all questions.

If working is needed for any question it must be shown below that question.

Electronic calculators should be used.

If the degree of accuracy is not specified in the question, and if the answer is not exact, give the answer to three significant figures. Give answers in degrees to one decimal place.

For π , use either your calculator value or 3.142.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

The total of the marks for this paper is 104.

1	Falla buys 3000 square metres of land for a house and garden.
	The garden is divided into areas for flowers, vegetables and grass.

He divides the land in the following ratio.

house: flowers: vegetables: grass = 4:7:8:5

(a) (i) Show that the area of land used for flowers is 875 m².

Answer(a)(i)

(ii) Calculate the area of land used for the house.

Answer(a)(ii) m^2 [2]

(b) Write down the fraction of land used for vegetables. Give your answer in its simplest form.

Answer(b) [2]
