[3]

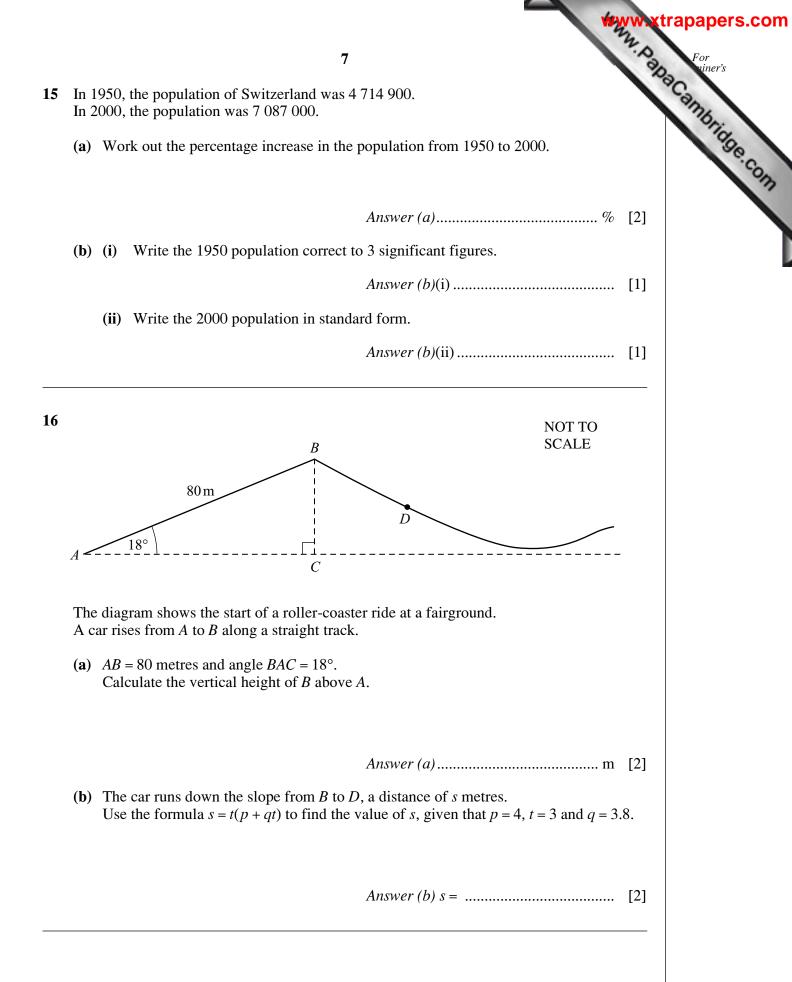

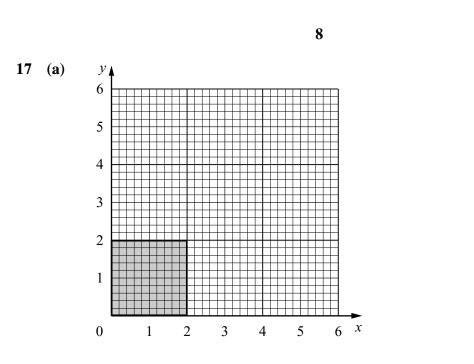

[4]

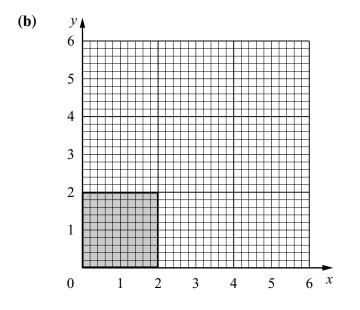

Draw the shear of the shaded square with the x-axis invariant and the point (0, 2) mapping onto the point (3, 2). [2]

(i) Draw the one-way stretch of the shaded square with the x-axis invariant and the point (0, 2) mapping onto the point (0, 6).

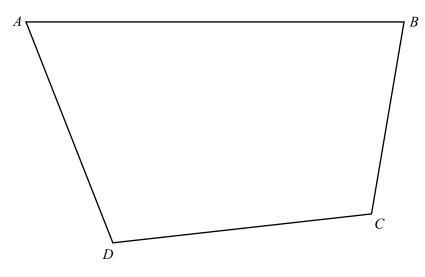

[2]

For iner's

(ii) Write down the matrix of this stretch.

Answer (b)(ii) 
$$\left(\begin{array}{c} \\ \end{array}\right)$$
 [1]

For niner's etres. 18 The diagram is a scale drawing of a field. The actual length of the side AB is 100 metres.

(a) Write the scale of the drawing in the form 1 : n, where n is an integer.

Answer (a) 1 : ..... [1]

- (b) In this part use a straight edge and compasses only. Leave in your construction lines.
  - (i) A tree in the field is equidistant from the point A and the point D. Construct the line on which the tree stands. [2]
  - (ii) The tree is also equidistant from the sides BC and CD. After constructing another line, mark the position of the tree and label it *T*. [3]

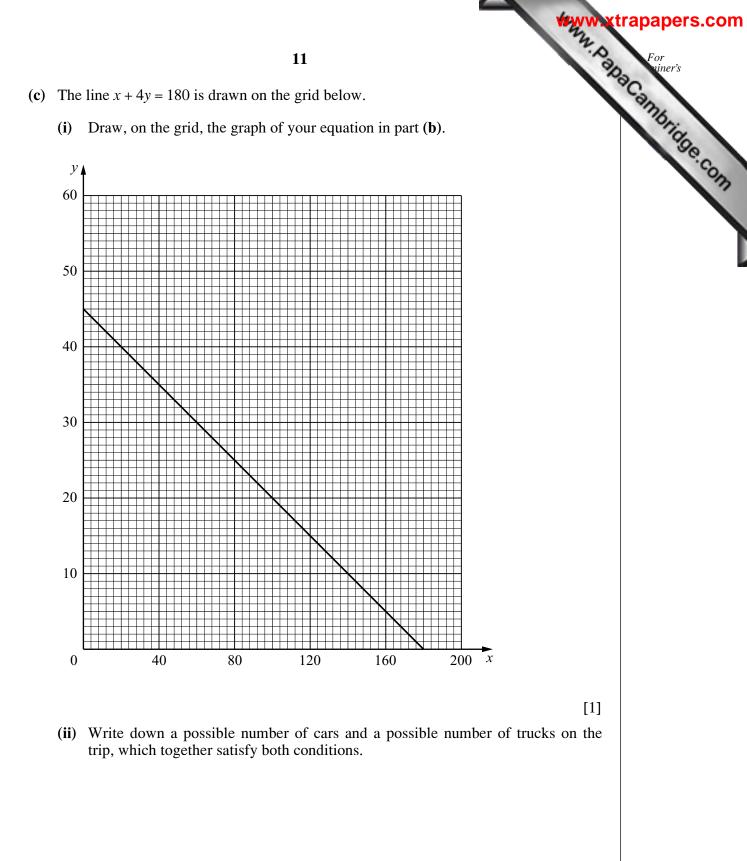

- **19** A ferry has a deck area of  $3600 \text{ m}^2$  for parking cars and trucks. Each car takes up 20 m<sup>2</sup> of deck area and each truck takes up 80 m<sup>2</sup>. On one trip, the ferry carries *x* cars and *y* trucks.
  - (a) Show that this information leads to the inequality  $x + 4y \le 180$ .

(b) The charge for the trip is \$25 for a car and \$50 for a truck. The total amount of money taken is \$3000. Write down an equation to represent this information and simplify it.

Answer (b)..... [2]

[2]

For iner's

*Answer* (*c*)(ii) ...... cars,..... trucks [1]
