Cambridge IGCSE[™]

PHYSICAL SCIENCE 0652/22

Paper 2 Multiple Choice (Extended)

October/November 2020

45 minutes

You must answer on the multiple choice answer sheet.

You will need: Multiple choice answer sheet

Soft clean eraser

Soft pencil (type B or HB is recommended)

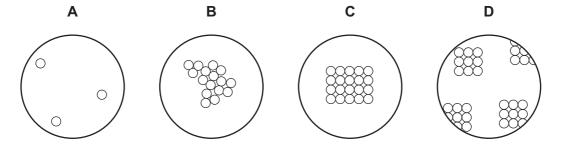

INSTRUCTIONS

- There are forty questions on this paper. Answer all questions.
- For each question there are four possible answers **A**, **B**, **C** and **D**. Choose the **one** you consider correct and record your choice in soft pencil on the multiple choice answer sheet.
- Follow the instructions on the multiple choice answer sheet.
- Write in soft pencil.
- Write your name, centre number and candidate number on the multiple choice answer sheet in the spaces provided unless this has been done for you.
- Do not use correction fluid.
- Do not write on any bar codes.
- You may use a calculator.

INFORMATION

- The total mark for this paper is 40.
- Each correct answer will score one mark. A mark will not be deducted for a wrong answer.
- Any rough working should be done on this question paper.
- The Periodic Table is printed in the question paper.

1 Which diagram represents the arrangement of particles in a liquid?

2 A bottle of a solid is labelled as shown.

CITRIC ACID (anhydrous)
melting point: 153°C

The melting point of a sample from the bottle is measured.

The sample melts over a temperature range from 140 °C to 150 °C.

Which statement explains this observation?

- A The sample contains a mixture of citric acid and other solids.
- **B** The sample is too large.
- **C** The sample has a pH less than 7.
- **D** The sample is too small.
- 3 Which statement describes a compound?
 - A It is a mixture of two or more elements.
 - **B** It is a substance containing two or more elements chemically combined.
 - **C** It is a substance that can be easily separated by physical means.
 - **D** It is a substance that cannot be broken down by chemical means.
- **4** Which molecule does **not** contain an atom which shares more than two electrons with one other atom?

 \mathbf{A} C_2H_4

B CH₃OH

 \mathbf{C} CO_2

 $D N_2$

5	Whi	ch stateme	nt explain	s why grap	hite is a	good cor	ductor o	f el	ectricity?				
	Α	It has movi	ng electro	ons.									
	В	It has movi	ng ions.										
	С	It has stron	g bonds	within its la	yers of a	itoms.							
	D	It has weak	bonds b	etween its	layers of	atoms.							
•	Б.	, .				·	., .						
6	Pota	otassium nitride is an ionic compound. The charges on its ions are shown.											
	K^{+} N^{3-}												
	Wha	at is the forr	nula of po	otassium ni	tride?								
	Α	KN	В	K_2N	С	K ₃ N		D	KN ₃				
7	The	formula of	aluminiur	n sulfata is	A1.(SO.	١.							
'					`	, -							
	Whi	ch row shov	ws the nu	mber of ato	oms of e	ach eleme	ent in alu	ımiı	nium sulfate?				
		Al	S	0									
	Α	2	1	4									
	В	2	1	12									
	С	2	3	4									
	D	2	3	12									
8	Ethy	/l ethanoate	has the	formula CF	$I_3CO_2C_2$	H ₅ .							
	Wha	at is the rela	itive mole	cular mass	$M_{\rm r}$ of th	is compo	und?						
	Α	48	В	72	С	88	١	D	124				
0	Mag	un o oiu maio o	addad ta l	ovdro oblori	o ooid								
9		nesium is a											
	The	temperatur	e of the r	nixture incr	eases.								
	Whi	ch statemei	nt describ	es and exp	olains thi	s observa	ition?						
	A	The reaction the energy				•	y needed	d to	make the bonds is greater than				
	В	The reaction the energy				the energ	y releas	ed	in making bonds is greater than				
	С	The reaction the energy				•••	needed	l to	make the bonds is greater than				

energy needed to break bonds.

The reaction is exothermic because the energy released in making bonds is greater than the

10 Word equations for two reactions are shown.

zinc oxide + carbon
$$\rightarrow$$
 zinc + carbon monoxide
iron + copper oxide \rightarrow copper + iron oxide

Which statement about the two reactions is correct?

- **A** Carbon and copper oxide have been oxidised.
- **B** Carbon and iron have been reduced.
- **C** Zinc oxide and copper oxide have been oxidised.
- **D** Zinc oxide and copper oxide have been reduced.
- 11 Wasp stings contain an alkali.

The pH values of some substances are shown.

substance	pH value
saliva	7.4
lime	12.4
salt solution	7.0
vinegar	3.5

Which substance could be used to neutralise a wasp sting?

- A lime
- **B** saliva
- C salt solution
- **D** vinegar

- **12** Four methods of preparing salts are shown.
 - 1 adding an excess of an insoluble carbonate to a dilute acid and removing the excess by filtration
 - 2 adding an excess of an insoluble metal oxide to a dilute acid and removing the excess by filtration
 - 3 precipitation
 - 4 titration using an acid and a metal hydroxide

The solubilities of some lead compounds are shown.

compound	solubility
lead carbonate	insoluble
lead hydroxide	insoluble
lead oxide	insoluble
lead nitrate	soluble
lead sulfate	insoluble

Which of the methods could be used to make lead sulfate?

A 1 and 3

B 1 and 2

C 3 only

D 4 only

13 Elements W, X, Y and Z are all in the same period of the Periodic Table.

Which element has the fewest electrons in its outer shell?

- **A** Element W, which has the largest relative atomic mass.
- **B** Element X, which has the largest atomic number.
- **C** Element Y, which has the most metallic character.
- **D** Element Z, which forms an acidic oxide.
- 14 Chlorine, bromine and iodine are three of the elements in Group VII of the Periodic Table.

They show a trend in reactivity.

Which reaction does **not** take place when a halogen reacts with an aqueous halide ion?

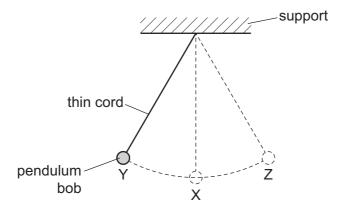

- A bromine + potassium chloride → chlorine + potassium bromide
- **B** bromine + potassium iodide → iodine + potassium bromide
- **C** chlorine + potassium bromide → bromine + potassium chloride
- **D** chlorine + potassium iodide → iodine + potassium chloride

15	Wh	ich state	ment descr	ibes and expla	ains a p	property of	metals?		
	Α	Metals a	are good el	ectrical condu	ctors a	s they cont	ain a sea	of mobile e	lectrons.
	В	Metals a	are good el	ectrical condu	ctors a	s they cont	ain a sea	of mobile ic	ons.
	С	Metals a	are malleat	ole because m	etallic	bonds are s	strong.		
	D	Metals a	are malleat	ole because m	etallic	bonds are v	veak.		
40	\	د داد د داد د				40			
16	vvn			s about water		rrect?			
		1		sed as a solve					
		2		sed to preven					
		3	Water is a	compound th	at con	tains two pa	arts of oxy	gen to one	part of hydrogen.
	Α	1 only	В	2 only	С	1 and 3	D	2 and 3	
17	Nitr	rogen oxi	des are pro	oduced in a ca	r engir	ne			
			-	catalytically re			vides fron	n the exhau	st fumes?
	Α	combus		odiary nodiny 10	1110 000	introgen o	AIGCS II OI	ii tilo oxilaa	ot rumes:
	В	oxidatio							
	С	reduction							
	D		decompos	ition					
18	Wh	at is not	a characte	ristic of a hom	ologou	s series?			
	Α	consecu	utive memb	ers differ by a	CH ₂ g	roup			
	В	the sam	ne boiling p	oint					
	С	the sam	ne functiona	al group					
	D	the sam	ne general f	ormula					
40	0					::-	: حاجة حاديد	d	final .
19				ane homologo					tuei.
	Wh	at are the	e products	of combustion	when	butane is b	urned in (excess air?	
	Α	carbon	and water						
	В		dioxide and						
	С		dioxide and						
	D	carbon	monoxide a	and water					

20 Alkenes are identified by reacting them with bromine.

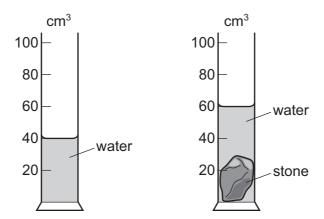

Which type of reaction is this?

- A addition
- **B** combustion
- **C** neutralisation
- **D** polymerisation
- **21** A student determines the period of the pendulum shown in the diagram.

Which method gives the most accurate value for the period?

- A Measure the time for ten swings from Y to Z and back to Y, and divide the time by ten.
- **B** Measure the time taken to swing from Y to X and multiply the time by four.
- **C** Measure the time taken to swing from Y to Z and multiply the time by two.
- **D** Measure the time taken to swing from Y to Z and back to Y.
- **22** A stone of mass 120 g is lowered slowly into a measuring cylinder containing water. The diagrams show the measuring cylinder before and after the stone is lowered into it.

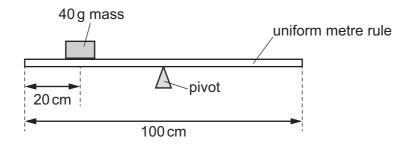

What is the density of the stone?

- \mathbf{A} 1.2 g/cm³
- **B** $2.0 \,\mathrm{g/cm^3}$
- **C** $3.0 \,\mathrm{g/cm^3}$
- \mathbf{D} 6.0 g/cm³

23 A pivot is placed under the centre of a uniform metre rule.

A 40 g mass is placed at the 20 cm mark.

A 50 g mass is placed on the rule to balance it.

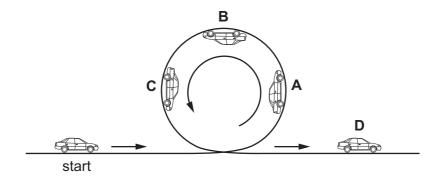

Where is the 50 g mass placed?

- A at the 16 cm mark
- B at the 24 cm mark
- C at the 66 cm mark
- **D** at the 74 cm mark
- 24 A resultant force of 4.0 N acts on an object of mass 2.0 kg. The force does 32 J of work.

What distance does the object move?

- **A** 8.0 m
- **B** 16 m
- **C** 128 m
- **D** 256 m
- **25** A toy car without a motor is pushed, then follows the looped track shown.

At which labelled point on the track is the kinetic energy (energy of motion) of the car decreasing and the potential energy (energy of position) increasing?

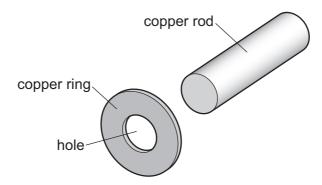

26 Two liquid-in-glass thermometers P and Q are both designed to measure temperatures between 0 °C and 100 °C. The lengths of their liquid columns at different temperatures are shown in the table.

temperature/°C	length of liquid column in P/cm	length of liquid column in Q/cm
0	4.0	2.0
50	16.5	9.5
100	29.0	17.0

Which statement about the thermometers is correct?

- A P has a larger range than Q.
- **B** P is more sensitive than Q.
- C Q has a larger range than P.
- **D** Q is more sensitive than P.
- **27** The diagram shows a copper ring and a copper rod.

The diameter of the copper rod is too big to fit the rod into the hole in the ring.

What enables the rod to fit into the hole?

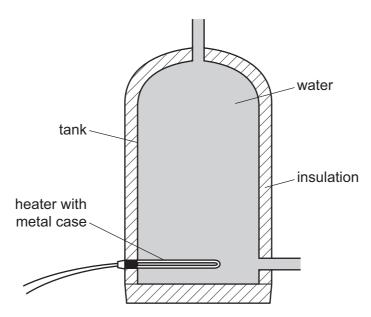

- A cooling the ring and heating the rod
- **B** cooling the rod and heating the ring
- **C** heating the rod and keeping the ring at room temperature
- **D** heating the rod and the ring to the same high temperature

28 Which row states the temperatures at which evaporation occurs and at which boiling of water occurs?

	evaporation	boiling
Α	at 100°C only	at 100 °C only
В	at 100°C only	between 0 °C to 100 °C
С	between 0 °C to 100 °C	at 100°C only
D	between 0 °C to 100 °C	between 0 °C to 100 °C

29 The diagram shows an insulated tank of water fitted with an electric heater that has a metal case.

The water is cold. The heater is not switched on.

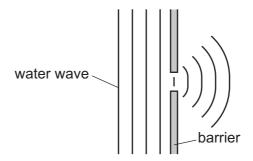

The heater is now switched on.

What are the main methods of transfer of thermal energy through the metal case of the heater, and throughout the water in the tank?

	through the metal case of the heater	throughout the water in the tank
Α	conduction	conduction
В	conduction	convection
С	convection	conduction
D	convection	convection

30 The diagram shows a water wave being diffracted.

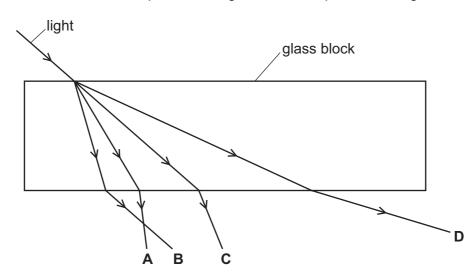

Which diagram shows water waves of half the frequency being diffracted?

(All five diagrams are drawn to the same scale.)

31 The diagram shows light incident on a glass block.

Which labelled arrow shows the path of the light after it has passed through the block?

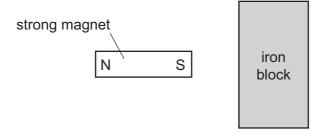

32 Light from the Sun takes 8.3 minutes to reach the Earth.

How far apart are the Sun and the Earth?

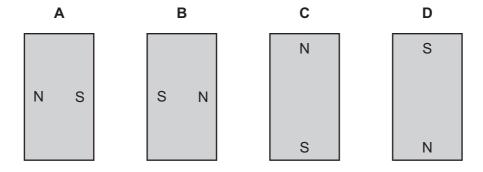

- **A** $6.0 \times 10^5 \,\mathrm{m}$
- $3.6 \times 10^{7} \, \text{m}$ В
- **C** $2.5 \times 10^9 \text{ m}$ **D** $1.5 \times 10^{11} \text{ m}$

- 33 What is the approximate range of frequencies of sound that can be heard by the human ear?
 - **A** 2 Hz to 2000 Hz
 - **B** 2 kHz to 2000 kHz
 - C 20 Hz to 20 000 Hz
 - **D** 20 kHz to 20 000 kHz
- 34 A strong permanent magnet is placed close to an iron block, as shown in the diagram.

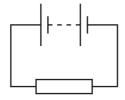

Magnetic poles are induced in the iron block.

What is the arrangement of the induced poles?

35 The diagram shows a resistor connected to a battery.

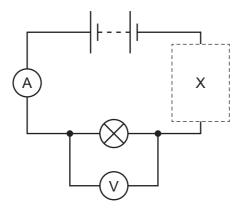

The current in the circuit is 2.0 A.

In 20 s, a total of 120 J of energy is transferred from the battery.

What is the electromotive force (e.m.f.) of the battery?

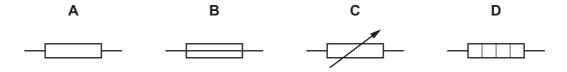

- **A** 1.5 V
- **B** 3.0 V
- **C** 6.0 V
- **D** 12 V

36 The diagram shows a circuit that can be used to investigate how the current in a lamp varies with the potential difference across it.

The current in the lamp needs to be varied.

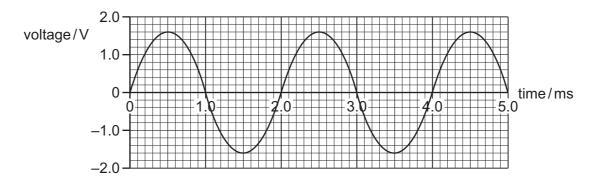

Which component is connected in the circuit at position X?

37 Overheating of a cable in an electric circuit is a safety hazard.

How can overheating of the cable be prevented?

- **A** Do not switch off the circuit with damp hands.
- **B** Make sure that the current does not become too large.
- **C** Use thicker insulation on the cable.
- **D** Use a thinner cable.
- **38** The graph shows the variation with time of the voltage output of an a.c. generator.

What is the frequency of the a.c. voltage?

- **A** 0.50 Hz
- **B** 1.0 Hz
- **C** 500 Hz
- **D** 1000 Hz

39 The emissions from a radioactive source pass through a sheet of lead that is 10 mm thick.

Which type of radiation is emitted and how is it affected by an electric field?

	type of emission	effect of electric field
Α	α	deflected from positive to negative
В	α	no deflection
С	γ	deflected from positive to negative
D	γ	no deflection

40 A radioactive nucleus emits a β -particle.

What happens to the nucleus?

- **A** Its nucleon number decreases.
- **B** Its nucleon number stays the same.
- **C** Its proton number decreases.
- **D** Its proton number stays the same.
