## MARK SCHEME for the June 2005 question paper

## 0625 PHYSICS

0625/05

Paper 5 (Practical Test), maximum mark 40

Www.strapapers.com

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which Examiners were initially instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began. Any substantial changes to the mark scheme that arose from these discussions will be recorded in the published *Report on the Examination*.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the *Report on the Examination*.

• CIE will not enter into discussion or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the June 2005 question papers for most IGCSE and GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Grade threshold	<b>ds</b> for Syllabus	s 0625 (Physic	s) in the June	2005 examina	tion.	apapers.com
	maximum	mir	nimum mark re	equired for gra	de:	
	mark available	A	С	E	F	
Component 5	40	33	26	20	15	

The threshold (minimum mark) for B is set halfway between those for Grades A and C. The threshold (minimum mark) for D is set halfway between those for Grades C and E. The threshold (minimum mark) for G is set as many marks below the F threshold as the E threshold is above it.

Grade A\* does not exist at the level of an individual component.

June 2005

IGCSE

MARK SCHEME

MAXIMUM MARK: 40

SYLLABUS/COMPONENT: 0625/05

PHYSICS Practical Test

Page 1	Mark Scheme	Syllabus
	IGCSE - June 2005	0625
a) (i)	record of room temp (sensible value)	1
(ii	• - (v) $\theta$ in °C, V in cm <sup>3</sup> 6 sets of readings with correct V 0, 2 Temps decreasing	0, 40, 60, 80, 100
(v	<ul> <li>y axis labelled</li> <li>y axis suitable (e.g. not '3' scale) and all plots correct (-1 each error) (bette well judged best fit line</li> </ul>	l plots occupy more than ½ gi r than ½ sq)
(b)	a sensible comment about heat loss	to the surroundings
		[To
(a) - (f	<i>l</i> values 50, 75, 100 <i>I</i> in A, <i>V</i> in V, <i>R</i> in $\Omega$ , <i>l</i> in cm or m all <i>I</i> to 1 dp or better all <i>V</i> to 1 dp or better all <i>R</i> values correct consistent 2 or 3 sf for <i>R</i> AC <i>R</i> value 2 x AB = AD ( $\pm 1\Omega$ ) AD <i>R</i> value 2 x AC = AB + AD ( $\pm 1\Omega$ )	2)
(g)	> AD 2 x AC ( <u>+</u> 1Ω )	ITo
		[10]
(a) - (e	) 3 complete sets average correct correct <i>T</i> values from average <i>t</i> correct <i>T/m</i> values consistent 2 or 3 sf for <i>T/m</i> <i>T/m</i> in s/g	
(f)	No <i>T/m</i> not constant	
(g)	time 10 oscillations then divide by 10 <u>or</u> two <i>t</i> values	
	aiviae by 2	[To <sup>,</sup>

Page 2	Mark Scheme	Syllabus	\$.
	IGCSE - June 2005	0625	DaC.
(a) - (l)	Traces		
(a) - (i)	3 traces, blocks correct positions		[1]
	neat lines all present		[1]
	all r less than I and correct side of norr	nal	[1]
	all emergent rays in approx correct pos	sitions (i.e. opposite s	side
	of normal to incident ray and approx pa	arallel to incident ray)	) [1]
	For Block Position 1:		
	M/M distance at least C and and M/ and C	· –	F43
	WX distance at least 5 cm and W on E	F	[1]
	WX distance at least 5 cm and W on E YZ distance at least 5 cm	F	[1] [1]
(i) - (n)	WX distance at least 5 cm and W on E YZ distance at least 5 cm first <i>r</i> value within + $2^{\circ}$ of trace	F	[1] [1] [1]
(i) - (n)	WX distance at least 5 cm and W on E YZ distance at least 5 cm first <i>r</i> value within $\pm 2^{\circ}$ of trace three <i>r</i> values equal to each other $\pm 2^{\circ}$	F	[1] [1] [1] [1]
(i) - (n)	WX distance at least 5 cm and W on E YZ distance at least 5 cm first <i>r</i> value within $\pm 2^{\circ}$ of trace three <i>r</i> values equal to each other $\pm 2^{\circ}$ all <i>r</i> values $18^{\circ} - 22^{\circ}$	F	[1] [1] [1] [1] [1]
(i) - (n)	WX distance at least 5 cm and W on E YZ distance at least 5 cm first <i>r</i> value within $\pm 2^{\circ}$ of trace three <i>r</i> values equal to each other $\pm 2^{\circ}$ all <i>r</i> values $18^{\circ} - 22^{\circ}$	F	[1] [1] [1] [1] [1]
