CAMBRIDGE INTERNATIONAL EXAMINATIONS

International General Certificate of Secondary Education

MARK SCHEME for the October/November 2013 series

0625 PHYSICS

0625/53   Paper 5 (Practical), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

1 **(a)** $m < 250$
  V_1 value = m
  unit <u>cm^3</u>

(b) V_2 within 10% of V_1 [1]

(c) d_1, d_2, h all present <u>and</u> $d_1 > d_2$ [1]
  D calculation correct to at least 1 d.p. [1]
  V_3 calculated correctly <u>and</u> > V_1 and V_2 <u>and</u> 2 or 3 significant figures only [1]

(d) method 2 – any one from:
  some water left in cup/spilt
  measuring cylinder not read at eye level/perpendicularly/bottom of meniscus
  parallax explained [1]

  method 3 – any one from:
  d_1 not at liquid level
  d_1 and d_2 not inside diameters
  difficult to measure h (because of sloping side)
  h not measured at eye level/perpendicularly/parallax explained [1]

(e) mass of cup / zero reading on balance [1]

  [Total: 10]

2 **(a)** units correct (symbols or words) [1]
  times correct (<u>0</u>, 30, 60, 90,120,150,180) [1]
  θ beaker **A** <u>and</u> θ beaker **B** decreasing [1]
  θ to at least $1^{o}C$ [1]
  smaller/same change in 180 s in beaker **B** compared to **A** [1]

(b) statement matching temperature changes (accept 'no significant difference' if justified)
  <u>and</u> justification matching statement (<u>comparison</u> of temperature changes) [1]
  including <u>specific</u> mention of temperature <u>change</u> in <u>same time</u> [1]

(c) appropriate condition relating to <u>comparison</u>, any one from:
  same size/thickness of beaker
  same volume of water
  same initial temperature
  same room temperature / appropriate environmental condition
  same time for cooling [1]

(d) any sensible alteration e.g.:
put lid on/cover top of **A**
extra experiment without insulation or lid / take lid off **B**

matching explanation e.g.:
most thermal energy loss by convection o.w.t.t.e.
have only changed one factor o.w.t.t.e. [1]

[Total: 10]

3 (a) potential differences all < 2.5 V <u>and</u> to at least 1 d.p. [1]
currents all < 1.50 A <u>and</u> to at least 2 d.p. [1]

(b) axes labelled, with units [1]
appropriate scales (plots occupying at least ½ grid) [1]
plots correct to ½ square [1]
best-fit line <u>and</u> thin, neat line, neat plots [1]

(c) (i) triangle method seen <u>on graph</u> [1]
large triangle (at least 1/2 candidate's line) [1]

(ii) $R = M$ <u>and</u> < 2.0 [1]
2 or 3 significant figures <u>and</u> unit Ω (symbol or word) [1]

[Total: 10]

4 (a) (i) ray trace:
normal correct [1]
CD at 20° within 1° and equivalent reflected line in correct place [1]
CD at 30° within 1° and equivalent reflected line in correct place [1]
all lines thin and neat [1]
$P_1 – P_2$ pin separation at least 5 cm [1]

table:
$\theta = 40^o$ <u>and</u> 60° within 2° (e.c.f. from candidate's α) [1]

(j) definite statement matching results (expect YES but allow e.c.f. if difference >10%)
<u>and</u> justification matching statement
(expect 'within the range of experimental accuracy' o.w.t.t.e.) [1]
values from results shown/used (<u>correctly</u> w.r.t. statement) [1]

(k) any two suitable precautions:
thin lines / fine pencil
view protractor perpendicularly / parallax explained
lines through centre of pin holes
pins well separated
pins vertical/not bent/viewed at base
place mirror so that reflecting surface is on line o.w.t.t.e. [2]

[Total: 10]
