CAMBRIDGE INTERNATIONAL EXAMINATIONS

International General Certificate of Secondary Education

MARK SCHEME for the October/November 2013 series

0625 PHYSICS

0625/63

Paper 6 (Alternative to Practical), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

		J -	IGCSE – October/November 2013	Syllabus 0625	20
1	(a)	<i>m</i> = 180. <i>V</i> ₁ value unit <u>cm</u> ³			A. Papa Cambridge
	(b)	V ₂ = 170	c.a.o.		[1]
	(c)	D = 6.2 t	to 7.4, d_2 = 5.0 to 5.1, h = 7.9 o 6.3 allow e.c.f. to 246 and 2 or 3 significant figures only allow e.c.f.		[1] [1] [1]
	(d)	some wa measurir	2 – one from: ater left in cup/spilt ng cylinder not read at eye level/perpendicularly/bottor explained	m of meniscus	[1]
		d_1 not at d_1 and d_2 difficult to	3 – one from: liquid level 2 not inside diameters 3 measure <i>h</i> (because of sloping side) 4 sasured at eye level/perpendicularly/parallax explained	i	[1]
	(e)	mass of	cup / zero reading on balance		[1] [Total: 10]
2	(a)	A = 87(°0	C) <u>and</u> B = 88(°C)		[1]
	(b)		rect (symbols or words) rrect (<u>0,</u> 30, 60, 90, 120, 150, 180)		[1] [1]
	(c)	and justif	nt matching temperature changes (accept 'no signification matching statement (comparison of temperature change in same times)	ire changes)	if justified) [1] [1]
	(d)	i.e. any o same siz same vol same init same roo	ate condition relating to <u>comparison</u> one from: te/thickness of beaker lume of water tial temperature om temperature / appropriate environmental condition ne for cooling		[1]

` '	sible alteration e.g.	Camp

(e) any sensible alteration e.g. put lid on/cover top of A extra experiment without insulation or lid / take lid off B matching explanation e.g. most thermal energy loss by convection or o.w.t.t.e. have only changed one factor or o.w.t.t.e.

(e) any two suitable precautions: thin lines / fine pencil

pins well separated

lines through centre of pin holes

pins vertical/not bent/viewed at base

view protractor perpendicularly/parallax explained

place mirror so that reflecting surface is on line o.w.t.t.e.

- -

			[Total: 8]
3	(a) cor	[1]	
	(b) (i)	axes labelled, with units appropriate scales (plots occupying at least ½ grid) plots correct to ½ square best-fit line and thin, neat line, neat plots	[1] [1] [1] [1]
	(ii)	triangle method seen <u>on graph</u> large triangle (at least 1/2 candidate's line)	[1] [1]
	(iii)	R correct from M <u>and</u> in range 0.7 to 0.8 2 or 3 significant figures <u>and</u> unit Ω (symbol or word)	[1] [1]
			[Total: 9]
4	(a) normal correct and pin separation at least 5 cm		[1]
	(b)(c)	both reflected lines in correct place (through P_3 , P_4 / P_5 , P_6) and thin/neat θ = 40° within 1° θ = 62° within 1°	[1] [1] [1]
	and (ex	finite statement matching results (expect 'Yes' but allow e.c.f. if difference >10%) d justification matching statement spect 'within the range of experimental accuracy' or o.w.t.t.e.) ues from results shown/used (correctly w.r.t statement)	[1] [1]

[Total: 8]

	IGCSE – October/November 2013	0625	800	

- (a) neat, clear table with column headings and correct units 5 results arranged in order
 - (b) (i) 40°
 - (ii) plot a line graph reading will clearly not lie on line allow suggestion of appropriate mathematical treatment
