

Candidates answer on the Question Paper.

Additional Materials: As listed in the Confidential Instructions.

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name in the spaces at the top of the page. Write in dark blue or black pen.

You may use a pencil for any diagrams, graphs or rough working. Do not use staples, paper clips, highlighters, glue or correction fluid. DO **NOT** WRITE IN ANY BARCODES.

Answer **all** questions. Electronic calculators may be used. You may lose marks if you do not show your working or if you do not use appropriate units.

At the end of the examination, fasten all your work securely together. The number of marks is given in brackets [] at the end of each question or part question.

1 In this experiment, you will investigate the stretching of a spring.

Www.PapaCambridge.com Carry out the following instructions, referring to Fig. 1.1 and Fig. 1.2. Do not move the large load that is on the bench. At the start of the experiment, the spring should not be attached to the forcemeter.

Gently raise the forcemeter until it reads 1.0 N. Clamp the forcemeter in this position. (iv)

Record the forcemeter reading F in Table 1.1. Measure, and record in the table, the new length *l* of the spring.

(v) Calculate the extension *e* of the spring using the equation $e = (l - l_0)$. Record the value of *e* in the table.

2

Many, Babacambridge.com (vi) Repeat steps (iv) and (v) using forcemeter readings of 2.0 N, 3.0 N, 4.0 N and Record all the readings and results in the table.

Га	bl	е	1	.1	l
	~	-		•	•

F/N	<i>l/</i> mm	<i>e</i> /mm

(b) Plot a graph of e/mm (y-axis) against F/N (x-axis).

Place the thermometer in the beaker of hot water, as shown in Fig. 2.1.

(a) (i) When the thermometer reading stops rising, record the temperature $\theta_{\rm H}$ of the hot water.

*θ*_H =[1]

- (ii) Quickly move the thermometer until the thermometer bulb is in position **A**, just above the beaker, as shown in Fig. 2.2. Immediately start the stopclock.
- (iii) After 30 s, measure the temperature θ shown on the thermometer. Record the time t = 30 s and the temperature reading in Table 2.1.
- (iv) Continue recording the time and temperature readings every 30s until you have six sets of readings.
