CAMBRIDGE INTERNATIONAL EXAMINATIONS

International General Certificate of Secondary Education

MARK SCHEME for the May/June 2014 series

0625 PHYSICS

0625/21 Paper 2 (Core Theory), maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2014 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

NOTES ABOUT MARK SCHEME SYMBOLS & OTHER MATTERS

B marks are independent marks, which do not depend on any other marks. For a B mark to be scored, the point to which it refers must actually be seen in the candidate's answer.

M marks are method marks upon which accuracy marks (A marks) later depend. For an M mark to be scored, the point to which it refers **must** be seen in a candidate's answer. If a candidate fails to score a particular M mark, then none of the dependent A marks can be scored.

C marks are compensatory method marks which can be scored even if the points to which they refer are not written down by the candidate, provided subsequent working gives evidence that they must have known it, e.g. if an equation carries a C mark and the candidate does not write down the actual equation but does correct working which shows he knew the equation, then the C mark is scored.

A marks are accuracy or answer marks which either depend on an M mark, or which are one of the ways which allow a C mark to be scored.

c.a.o. means "correct answer only".

e.c.f. means "error carried forward". This indicates that if a candidate has made an earlier mistake and has carried his incorrect value forward to subsequent stages of working, he may be given marks indicated by e.c.f. provided his subsequent working is correct, bearing in mind his earlier mistake. This prevents a candidate being penalised more than once for a particular mistake, but **only** applies to marks annotated "e.c.f."

e.e.o.o. means "each error or omission".

o.w.t.t.e. means "or words to that effect".

Brackets () around words or units in the mark scheme are intended to indicate wording used to clarify the mark scheme, but the marks do not depend on seeing the words or units in brackets, e.g. 10 (J) means that the mark is scored for 10, regardless of the unit given.

<u>Underlining</u> indicates that this <u>must</u> be seen in the answer offered, or something very similar.

OR / or indicates alternative answers, any one of which is satisfactory for scoring the marks.

Spelling Be generous about spelling and use of English. If an answer can be understood to mean what we want, give credit.

Significant figures

Answers are acceptable to any number of significant figures \geq 2, except if specified otherwise, or if only 1 sig. fig. is appropriate.

Units Incorrect units are not penalised, except where specified. More commonly, marks are allocated for specific units.

Fractions These are only acceptable where specified.

Extras Ignore extras in answers if they are irrelevant; if they contradict an otherwise correct response or are forbidden by mark scheme, use right + wrong = 0.

Ignore indicates that something which is not correct is disregarded and does not cause a right plus wrong penalty.

Not/NOT indicates that an incorrect answer is not to be disregarded, but cancels another otherwise correct alternative offered by the candidate, i.e. right plus wrong penalty applies.

Paper

Syllabus

			IGCSE – May/June 2014	0625	21
1 (a)	(sp	eed =	e) distance/time in words, symbols or numbers		C1
	(37	.1 – 2	2.1 =) 35		C1
	35/	7			C1
	5(.0)) (cn	n/day)		A1
(b)	(i)	3 ро	ints correctly plotted to ½ square		B2
	(ii)		tical) spacing not uniform/equal OR points not on a points do not line up OR difference in gradients bet		В1
					[Total: 7]
2 (a)			/change/difference in length OR new length – originally originally or the length of the length of the length or the length or the length of	inal length	B1
(b)	(i)	1.	2 seen OR used		C1
			11(.0)(cm)		A1
		2.	0.8 (cm)		B1
	(ii)		$m \times g$ in words, symbols or numbers correct conversion used, e.g. 1 kg = 10 N		C1
		200	g/0.2 <u>kg</u>		A1
					[Total: 6]
3 (a)	brig	jht sp	ecks OR spots/dots OR flashes of light		B1

Mark Scheme

Page 3

(d) Brownian B1

[Total: 7]

moving randomly **OR** jerky movements **OR** zig zag/jiggling

line is straight with at least 2 changes of direction

(with) air atoms/molecules/particles

(c) collisions/bombardment

(b) line representing a smoke particle moving with a change of direction

Page 4	Mark Scheme	Syllabus	Paper

4	(a)	grea	ater pressure from man OR man will fall through ice OR ice will break/crack	B1
	(b)	idea	a of increasing area OR spreading load	M1
		larg load less	three from: er (surface) area d /weight/force more spread out s pressure of $P = F/A$	А3
				[Total: 5]
5	(a)	74 (°C)	B1
	(b)	part war hot	three from: icles move further apart/heating causes expansion m air less dense OR cold air more dense air rises OR cold air falls vection (current)	В3
	(c)	moν	ves/goes down (tube) OR gives a lower reading	B1
		con	tracts/decreases in volume/shrinks	B1
	(d)	any	indication between –10 °C and centre of bulb	B1
				[Total: 7]
6	(a)	(i)	i and r both clearly correct	B1
		(ii)	i = r	B1
		(iii)	seeing over/around an obstacle	B1
		(iv)	image/ray moves/misses eye OR viewer can no longer see image/ray/anything OR viewer sees inside of tube OR angle of incidence/reflection changes	B1
	(b)	(i)	2 focal lengths indicated	B1
		(ii)	ray parallel to axis AND emergent ray goes through F1	B1
			refraction shown at centre line OR at each surface	B1
	((iii)	incident ray through principal focus AND emergent ray parallel to axis	B1
				[Total: 8]

Page 5	Mark Scheme	Syllabus	Paper
	IGCSE – May/June 2014	0625	21

7	(a)	(mi	lli)ammeter OR galvanometer NOT ampmeter	B1
	(b)	(i)	nothing/stays the same/half-way	B1
		(ii)	nothing/stays the same/half-way	B1
		(iii)	nothing/stays the same/half-way	B1
		(iv)	it/arrow/pointer moves/goes/flicks OR current changes	M1
			left and right OR backwards and forwards	A1
	(c)		generator OR dynamo OR microphone	B1
				[Total: 7]
8	(a)	(i)	nothing/zero/0	B1
		(ii)	V = IR or V/R in words, symbols or numbers	C1
			6/10	C1
			0.6	A1
			A OR amp(s) OR ampere(s)	B1
		(iii)	candidate's (a)(ii)	B1
	(b)	(i)	variable resistor OR rheostat	
			OR potential divider	B1
		(ii)	neat, correct circuit with one added component in series with lamp	B1
			correct symbol for <u>variable</u> resistor	B1
			,	[Total: 9]
9	(a)	ide	a of points to north (pole of Earth)	M1
		whe	en freely suspended/floating on water	A1
		OR		
		rep	els	(M1)
		a (k	known) N pole	(A1)
