## PHYSICS

0625/31
Paper 3 Core Theory
May/June 2018
MARK SCHEME
Maximum Mark: 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.
Cambridge International is publishing the mark schemes for the May/June 2018 series for most Cambridge IGCSE ${ }^{\text {TM }}$, Cambridge International A and AS Level and Cambridge Pre-U components, and some Cambridge O Level components.

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

## GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

## GENERIC MARKING PRINCIPLE 2:

Marks awarded are always whole marks (not half marks, or other fractions).

## GENERIC MARKING PRINCIPLE 3:

Marks must be awarded positively:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

## GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

## GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:
Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

| Question | Answer | Marks |
| :---: | :---: | :---: |
| 1(a) | 72 (s) | 1 |
| 1(b) | (average speed $=$ ) distance $\div$ time | 1 |
|  | $120 \div 54$ | 1 |
|  | 2.2(2) (m/s) | 1 |
| 1(c) | area under line OR three areas indicated $\mathbf{O R}$ (dist $=$ ) (av.) speed $\times$ time OR $1 / 2(b+h) \times \mathrm{L}$ | 1 |
|  | $\frac{1}{2} \times 3.5 \times 4.0$ OR $7(\mathrm{~m})$ seen OR $6 \times 3.5$ OR $21(\mathrm{~m})$ | 1 |
|  | $6 \times 3.5$ OR $21(\mathrm{~m}) \underline{\text { AND }\left\{\frac{1}{2} \times 3.5 \times 4.0 \text { OR } 7(\mathrm{~m})\right\} \text { OR } 14(\mathrm{~m}) ~}$ | 1 |
|  | $(21+14=) 35(\mathrm{~m})$ | 1 |

| Question | Answer | Marks |
| :---: | :---: | :---: |
| 2(a)(i) | measure mass of empty measuring cylinder/beaker <br> add measured/fixed volume of liquid <br> measure mass of measuring cylinder/beaker and liquid <br> determine mass of liquid (by subtracting mass empty from mass when full) <br> use of $D=M / V$ | 5 |
| 2(a)(ii) | $\mathrm{g} / \mathrm{cm}^{3} \mathbf{O R} \mathrm{~kg} / \mathrm{m}^{3}$ | 1 |
| 2(b)(i) | (polythene is) less dense (than water) | 1 |
| 2(b)(ii) | $W=m \times g$ in any form OR $(m=) W \div g$ OR 100 g weighs 1 N | 1 |
|  | $0.84 \div 10$ OR $100(\mathrm{~g}) \times 0.84$ | 1 |
|  | 0.084 (kg) OR 84 g | 1 |

| Question | Answer |  | Marks |
| :---: | :---: | :---: | :---: |
| 3(a) | $43.0+2.4=45.4(\mathrm{~N})$ |  | 1 |
|  | $(74.2-45.4=) 28.8(\mathrm{~N})$ |  | 1 |
|  | upwards |  | 1 |
| 3(b) |  |  | 1 |

| Question | Answer | Marks |
| :---: | :---: | :---: |
| $4(\mathrm{a})$ | Any four from: <br> specs/dots (of light) <br> (smoke/air particles) moving <br> (smoke/air particles) randomly <br> (because fast moving ) air molecules collide with smoke particles <br> (producing)Brownian motion | $\mathbf{4}$ |
| $4(\mathrm{~b})$ | evaporate/evaporation | $\mathbf{1}$ |
|  | high(er) energy/enough energy/fast(er) moving molecules OR molecules with great(er) KE |  |

| Question | Answer | Marks |
| :---: | :---: | :---: |
| 5(a) | $\begin{aligned} & \mathrm{Q} \\ & \mathrm{~S} \\ & \mathrm{P} \\ & \mathrm{R} \end{aligned}$ | 3 |
| 5(b) | any one advantage from: <br> continuous supply/steady supply or reverse argument <br> any one disadvantage from: only available in certain areas/thin crust/near geysers or can damage water table OR limited lifespan/rocks can cool | 2 |

| Question | Answer | Marks |
| :---: | :---: | :---: |
| 6(a) | $(26-23=) 3\left({ }^{\circ} \mathrm{C}\right)$ | 1 |
| 6(b) | any three from: <br> use metal pipe <br> paint black or use black pipe <br> use matt or dull (paint) <br> (place) reflector behind pipe <br> use long(er) pipe <br> use pipe with great(er) surface area <br> slow(er) flow rate <br> (place) glass/(clear) plastic cover over pipe | 3 |
| 6(c) | infra-red (radiation through space/air) | 1 |
|  | conduction through pipe | 1 |

| Question | Answer | Marks |
| :---: | :---: | :---: |
| 7(a)(i) | blue between indigo and green | 1 |
|  | yellow between green and orange | 1 |
| 7(a)(ii) | arrow pointing right $\longrightarrow$ | 1 |
| 7(b)(i) | ray(s) refracted down at first boundary (air/glass) | 1 |
|  | correct refraction for candidate's ray (in glass prism) | 1 |
| 7(b)(ii) | refraction | 1 |

| Question | Answer | Marks |
| :---: | :---: | :---: |
| 8(a)(i) | tape measure | 1 |
| 8(a)(ii) | reflection (of sound) | 1 |
| 8(b) | time for sound to travel to wall and back $=1.0 \mathrm{~s}$ | 1 |
|  | 340 m in 1.0 s | 1 |
|  | (speed =) 340 | 1 |
|  | $\mathrm{m} / \mathrm{s}$ | 1 |

| Question | Answer | Marks |
| :---: | :---: | :---: |
| 9(a)(i) | X-rays between gamma rays and ultraviolet | 1 |
|  | microwaves between infra-red and radio | 1 |
| 9(a)(ii) | ring drawn around radio on Fig.9.1 | 1 |
| 9(b) | any two from: <br> lead/metal apron <br> (use long) tongs <br> limit (time of) exposure point source away (from you) owtte | 2 |

| Question | Answer | Marks |
| :---: | :---: | :---: |
| 10(a) | resistor identified | 1 |
| 10(b) | quantity unit <br> current NOT amps ignore ammeter A/amps/amperes | 2 |
|  | quantity unit <br> potential difference or p.d. or emf V/volts ignore voltmeter | 2 |
| 10(c) | increasing (length) increases resistance owtte | 1 |
|  | increasing (diameter) decreases resistance owtte | 1 |

| Question | Answer | Marks |
| :---: | :---: | :---: |
| 11(a)(i) | cell and switch connected in series with any part of conductor (on Fig.11.1) | 1 |
|  | correct symbols used - (on Fig.11.1) | 1 |
| 11(a)(ii) | circular | 1 |
|  | around conductor/wire | 1 |
| 11(a)(iii) | no change/nothing | 1 |
| 11(b) | conductor/wire between the poles of a magnet | 1 |
|  | opposite poles facing each other | 1 |
|  | current in wire | 1 |
|  | wire moves/Flemings left hand rule indicated | 1 |

| Question | Answer | Marks |
| :---: | :---: | :---: |
| 12(a)(i) | $\alpha$ or alpha | 1 |
| 12(a)(ii) | $\alpha$ or alpha | 1 |
| 12(b)(i) | beta or $\beta$ | 1 |
|  | beta emission would be affected by the thickness of the metal owtte | 1 |
| 12(b)(ii) | (counter) reading higher | 1 |
| 12(b)(iii) | rollers move apart/provide less force/pressure owtte | 1 |
| 12(b)(iv) | 38 | 1 |
