

## **Cambridge International Examinations**

Cambridge International General Certificate of Secondary Education

#### **COMBINED SCIENCE**

Paper 1 Multiple Choice (Core)

0653/13 May/June 2017 45 minutes

Additional Materials: Multiple Choice Answer Sheet Soft clean eraser Soft pencil (type B or HB is recommended)

## READ THESE INSTRUCTIONS FIRST

Write in soft pencil.

N

N

Do not use staples, paper clips, glue or correction fluid. Write your name, Centre number and candidate number on the Answer Sheet in the spaces provided unless this has been done for you. DO **NOT** WRITE IN ANY BARCODES.

There are **forty** questions on this paper. Answer **all** questions. For each question there are four possible answers **A**, **B**, **C** and **D**.

Choose the **one** you consider correct and record your choice in **soft pencil** on the separate Answer Sheet.

#### Read the instructions on the Answer Sheet very carefully.

Each correct answer will score one mark. A mark will not be deducted for a wrong answer. Any rough working should be done in this booklet. A copy of the Periodic Table is printed on page 20. Electronic calculators may be used.

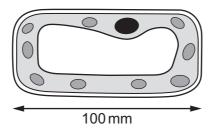

This document consists of 18 printed pages and 2 blank pages.

**1** A person moves their hand away from a hot object.

Which characteristic of living organisms is this?

- A growth
- **B** nutrition
- **C** reproduction
- D sensitivity
- 2 The diagram shows an image of a plant cell that has been magnified.

The magnification is  $\times$  200.

What is the length of the actual cell?

- **A** 0.2 mm **B** 0.5 mm **C** 2 mm **D** 20000 mm
- 3 Which statement about enzymes is correct?
  - A They are killed by high temperatures.
  - **B** They are made from amino acids.
  - **C** They are unaffected by pH.
  - **D** They are used up in biological reactions.

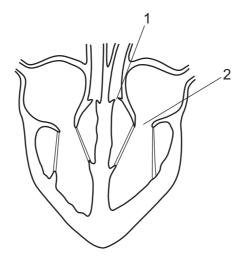

4 An unknown liquid is divided into three test-tubes and tested as shown in the table.

test-tube number	test solution added to mixture	final colour in test-tube
1	Benedict's solution	blue
2	biuret	violet
3	iodine solution	yellow

Which conclusion about the unknown liquid is correct?

- **A** It contains reducing sugar and starch.
- **B** It contains protein and a reducing sugar.
- **C** It only contains protein.
- **D** It only contains starch.
- 5 What are the products of photosynthesis?
  - A carbohydrates + oxygen
  - B carbohydrates + water
  - **C** carbon dioxide + oxygen
  - **D** carbon dioxide + water
- **6** What is transpiration?
  - **A** absorption of water by root hair cells
  - **B** evaporation of water at the surfaces of mesophyll cells
  - **C** loss of water vapour from the roots of plants
  - **D** transport of food substances in the phloem

7 The diagram shows a section through the heart.

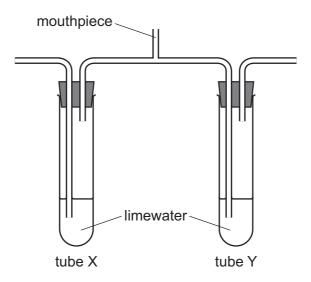

The ventricles contract and blood is forced into the arteries.

What is the state of valves 1 and 2 when this happens?

	valve 1	valve 2
Α	closed	closed
в	closed	open
С	open	closed
D	open	open

8 The diagram shows apparatus at the start of a breathing experiment.

A person breathes in and out through the mouthpiece for a short time.

Which row shows the results?

	limewater in tube X	limewater in tube Y
Α	stays clear	stays clear
в	stays clear	turns cloudy
С	turns cloudy	stays clear
D	turns cloudy	turns cloudy

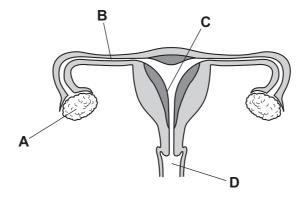

9 Which characteristics of living organisms does a plant show during a geotropism?

	growth	movement	sensitivity
Α	$\checkmark$	$\checkmark$	$\checkmark$
В	$\checkmark$	$\checkmark$	x
С	$\checkmark$	x	x
D	x	$\checkmark$	$\checkmark$

- 10 Which environmental factor is **not** a requirement for the germination of most seeds?
  - A light
  - B oxygen
  - C suitable temperature
  - **D** water

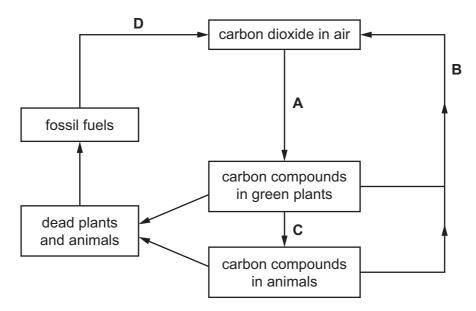

**11** The diagram shows the female reproductive system.

Where does implantation of the embryo normally occur?

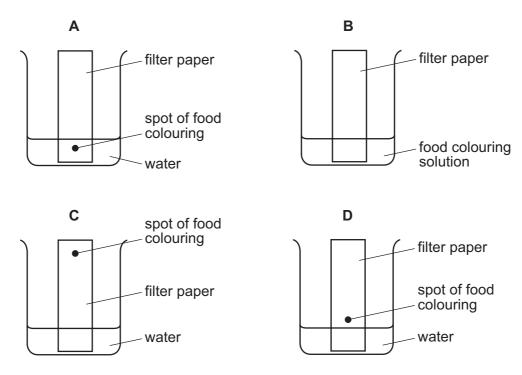

- **12** What is the correct name for organisms that get their energy by eating plants?
  - A carnivores
  - B herbivores
  - **C** producers
  - **D** secondary consumers
- **13** The diagram shows the carbon cycle.

Which arrow represents combustion?

14 Which diagram shows how a mixture of dyes in a food colouring are separated?

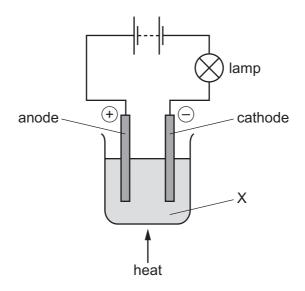

- **15** Which process is a physical change?
  - A adding zinc to dilute sulfuric acid
  - B bubbling carbon dioxide through limewater
  - C electrolysing molten lead bromide
  - **D** separating petroleum by fractional distillation
- **16** A neutral atom of chlorine contains 17 electrons and 18 neutrons.

What is the atomic (proton) number and what is the mass (nucleon) number of this atom?

	atomic number	mass number
Α	17	35
в	17	52
С	18	35
D	18	52

**17** A molten compound X is electrolysed as shown.

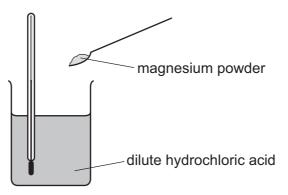

A brown gas is produced at the anode and a grey metal is produced at the cathode.

What is X?

- A aluminium oxide
- B copper chloride
- **C** lead(II) bromide
- D sodium chloride

**18** The diagram shows how the temperature change is measured when magnesium powder reacts with dilute hydrochloric acid.

Thermometer reading before adding magnesium powder = 20.6 °C

Thermometer reading after adding magnesium powder = 32.4 °C

Which statement is correct?

- **A** The reaction is endothermic and gives out heat.
- **B** The reaction is endothermic and takes in heat.
- **C** The reaction is exothermic and gives out heat.
- **D** The reaction is exothermic and takes in heat.
- **19** Magnesium ribbon reacts with dilute hydrochloric acid to form hydrogen gas.

Which change increases the rate of the reaction?

- **A** adding water to the mixture
- **B** trapping the hydrogen gas
- **C** using a lower temperature
- D using powdered magnesium
- 20 In which reactions is the <u>underlined</u> substance oxidised?
  - 1 <u>iron</u> when it rusts
  - 2 <u>methane</u> when it burns in air
  - 3 copper oxide when it reacts with carbon
  - A 1, 2 and 3 B 1 and 2 only C 1 and 3 only D 2 and 3 only

**21** Magnesium sulfate is a soluble solid produced by reacting excess solid magnesium oxide with dilute sulfuric acid.

Which processes produce pure magnesium sulfate crystals?

- A distilling the reaction mixture and leaving the distillate to crystallise
- **B** evaporating the water from the reaction mixture
- **C** filtering and drying the solid from the reaction mixture
- **D** filtering the reaction mixture and leaving the filtrate to crystallise
- 22 Substance X is warmed with aqueous sodium hydroxide and aluminium.

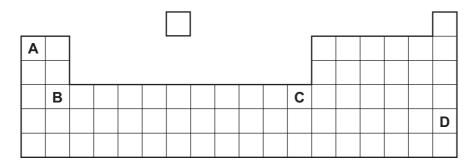

A gas is produced which turns damp red litmus paper blue.

Which anion is present in X?

- A carbonate
- B hydroxide
- **C** nitrate
- D sulfate
- 23 Part of the Periodic Table is shown.

The letters are **not** the symbols of the elements.

Which element is a non-metal?

### 24 What is an alloy?

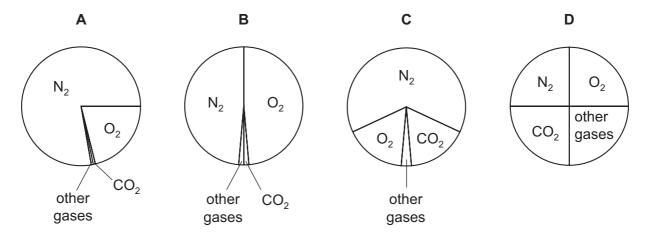

- A a compound containing two metallic elements
- **B** a compound containing two non-metallic elements
- C a mixture containing two metallic elements
- D a mixture containing two non-metallic elements

**25** A mixture of copper(II) oxide and substance Q is heated.

The reaction produces copper.

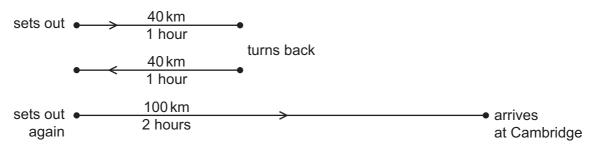

What is Q?

- A aluminium oxide
- B carbon
- C carbon dioxide
- D oxygen
- 26 Which pie chart shows the proportions of gases in clean air?

- 27 Which property of the compounds in petroleum is used to separate it into useful fractions?
  - **A** boiling point
  - B density
  - **C** melting point
  - **D** solubility

**28** A car driver sets out from home to travel to Cambridge. After 1 hour he is 40 km from home. He discovers that he must return home to collect his briefcase. This journey also takes him 1 hour. He sets off again immediately. He reaches Cambridge, 100 km from home, 2 hours later.

What is the average speed for the whole of his journey from leaving home the first time?

Α :	25 km/h	В	45 km/h	С	50 km/h	D	90 km/h
-----	---------	---	---------	---	---------	---	---------

29 Which row shows the unit for force, the unit for mass and the unit for weight?

	force	mass	weight				
Α	kg	kg	Ν				
в	kg	Ν	kg				
С	N	kg	Ν				
D	Ν	Ν	kg				

**30** A car uses petrol as fuel. The car has been parked overnight.

The engine is now started and the car is driven along a horizontal road at an increasing speed.

Which two forms of energy of the car both increase as the car moves?

- A chemical and gravitational
- B chemical and thermal
- **C** gravitational and kinetic
- D kinetic and thermal

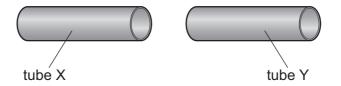

**31** Four different forces move an object by different distances in different times.

Which row shows the situation in which the greatest power is produced by the force?

	time taken / s	force /N	distance moved / m
Α	10	400	3.0
в	20	200	2.0
С	30	400	2.0
D	40	200	3.0

**32** The diagram shows two thin steel tubes X and Y. The tubes have identical dimensions at room temperature.

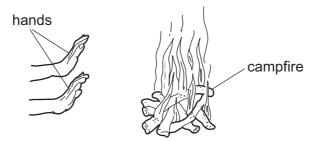

Tube X needs to be made to fit inside tube Y.

How can this be done?

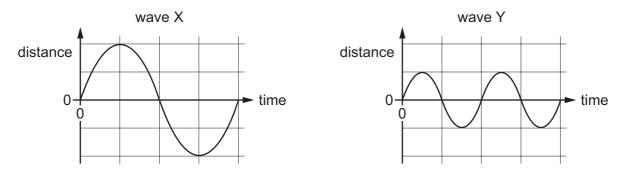

- **A** Cool both tubes to the same low temperature.
- **B** Cool tube X only, to a low temperature.
- **C** Heat both tubes to the same high temperature.
- **D** Heat tube X only, to a high temperature.

**33** On a cold night, a person stands near a campfire. He holds his hands out towards the fire. His hands are heated by the fire.

Which process is responsible for transferring thermal energy from the fire to his hands?

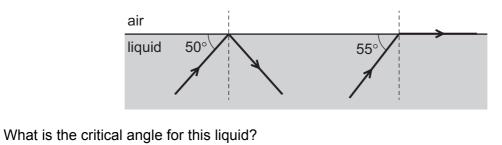

- **A** conduction
- **B** convection
- **C** evaporation
- **D** radiation
- 34 The diagrams represent two waves X and Y. The diagrams are drawn to the same scale.

From this information, which property must be greater for wave X, and which property must be greater for wave Y?

	greater for wave X	greater for wave Y
Α	amplitude	frequency
в	amplitude	wavelength
С	frequency	amplitude
D	frequency	wavelength

**35** The diagram represents the surface of a transparent liquid. Two rays of light are travelling within the liquid. They both reach the surface. The path of each ray is shown.

**A** 35° **B** 40° **C** 50° **D** 55°

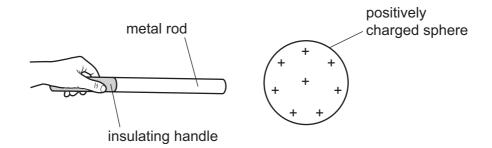

- **36** Which type of electromagnetic wave is used in airport security scanners?
  - A gamma-rays
  - **B** microwaves
  - **C** radio waves
  - D X-rays
- **37** An electronic circuit in a fire alarm makes a loudspeaker vibrate alternately at two different frequencies.

Which pair of frequencies is suitable to use in the alarm to alert people to the danger of fire?

- A 1.5 Hz and 15 Hz
- **B** 15 Hz and 150 000 Hz
- C 150 Hz and 15000 Hz
- **D** 150 000 Hz and 15 000 000 Hz

**38** An uncharged metal rod is held by an insulating handle.

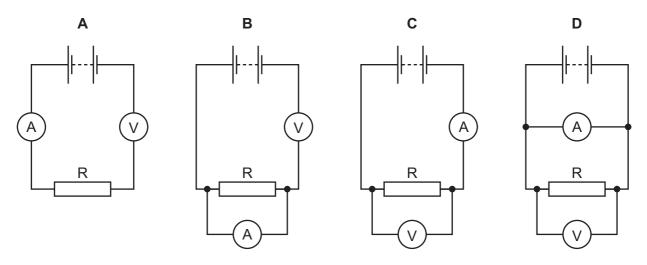

The rod is brought near to a positively charged sphere. This causes some particles in the rod to move.

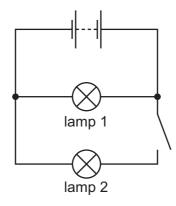

Which particles in the rod move and in which direction do the particles move?

	particles that move	direction of movement
Α	electrons	away from the sphere
в	electrons	towards the sphere
С	protons	away from the sphere
D	protons	towards the sphere

**39** Which circuit can be used when determining the resistance of resistor R?

**40** The circuit shown includes two identical lamps and an open switch.

The switch is now closed.

Which statement is now correct?

- **A** Lamp 1 is brighter than lamp 2.
- **B** The brightness of lamp 1 increases.
- **C** The p.d. across each lamp is the same.
- **D** The total resistance of the circuit is greater.
