

Cambridge IGCSE[™]

COMBINED SCIENCE

Paper 1 Multiple Choice (Core)

0653/13 May/June 2021 45 minutes

You must answer on the multiple choice answer sheet.

You will need: Multiple choice answer sheet Soft clean eraser Soft pencil (type B or HB is recommended)

INSTRUCTIONS

- There are forty questions on this paper. Answer all questions.
- For each question there are four possible answers **A**, **B**, **C** and **D**. Choose the **one** you consider correct and record your choice in soft pencil on the multiple choice answer sheet.
- Follow the instructions on the multiple choice answer sheet.
- Write in soft pencil.
- Write your name, centre number and candidate number on the multiple choice answer sheet in the spaces provided unless this has been done for you.
- Do **not** use correction fluid.
- Do **not** write on any bar codes.
- You may use a calculator.

INFORMATION

- The total mark for this paper is 40.
- Each correct answer will score one mark.
- Any rough working should be done on this question paper.
- The Periodic Table is printed in the question paper.

This document has 20 pages. Any blank pages are indicated.

1 The diagrams represent four similar animal cells immersed in blood plasma.

The black dots represent molecules of dissolved oxygen.

Which cell will have oxygen molecules diffusing into it most rapidly?

2 The table shows the results of some food tests carried out on one sample of food.

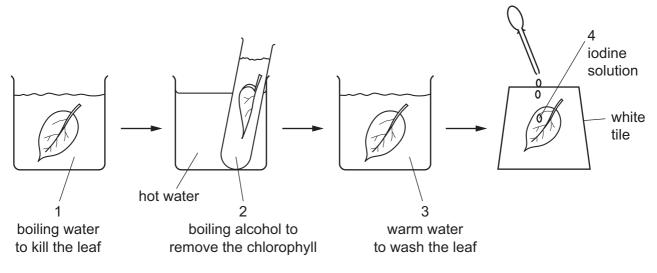

| food test reagent | colour at start of test | colour at end of test | |
|---------------------|----------------------------|--------------------------|--|
| Benedict's solution | blue | blue | |
| biuret reagent | blue | purple | |
| iodine solution | brown | blue/black | |

Which nutrients does the food sample contain?

- A protein and starch
- **B** protein and reducing sugar
- **C** starch only
- **D** starch and reducing sugar
- **3** Which row describes an enzyme?

| | type of molecule | function |
|---|------------------|--|
| A | carbohydrate | speeds up a reaction and is used up in the process |
| в | carbohydrate | speeds up a reaction and is not used up in the process |
| С | protein | speeds up a reaction and is used up in the process |
| D | protein | speeds up a reaction and is not used up in the process |

- 4 The flow diagram shows the stages in testing a green leaf for starch.
 - 1, 2, 3 and 4 are all liquids.

What are the colours of liquids 2 and 4 for a leaf that contains starch?

| | 2 | 4 | |
|---|-----------------------|------------|--|
| Α | green | blue/black | |
| в | colourless | brown | |
| С | colourless blue/black | | |
| D | green | brown | |

5 Most food molecules need to be digested to allow them to be absorbed into the blood.

Which row shows the type of digestion and the change needed to allow absorption to happen?

| | type of digestion | change to food molecules |
|---|-------------------|---|
| Α | chemical | large molecules to small, insoluble molecules |
| в | chemical | large molecules to small, soluble molecules |
| С | mechanical | large molecules to small, soluble molecules |
| D | mechanical | large molecules to small, insoluble molecules |

6 Which conditions cause the lowest rate of transpiration?

| | humidity | temperature | | |
|--------|----------|-------------|--|--|
| A high | | high | | |
| B high | | low | | |
| C low | | high | | |
| D | low | low | | |

7 The diagram shows the human gas exchange system.

What is the part labelled X?

- A alveolus
- B bronchus
- C larynx
- D trachea

8 Which equation represents aerobic respiration?

- A carbon dioxide + glucose \rightarrow oxygen + water
- **B** carbon dioxide + water \rightarrow glucose + oxygen
- **C** glucose + oxygen \rightarrow carbon dioxide + water
- **D** glucose + water \rightarrow carbon dioxide + oxygen

9 A plant in a pot was placed on its side for four days.

Which row describes the gravitropic response in the root and shoot?

| | root | shoot | | |
|---------------------------|----------------------------|----------|--|--|
| A positive negat | | negative | | |
| B negative positiv | | positive | | |
| С | c negative negative | | | |
| D | positive | positive | | |

10 During human reproduction an egg fuses with a sperm.

Sometimes the zygote splits into two and produces twins.

Which row describes the formation of these twins?

| | original zygote produced by | twins | | |
|------------------------|-----------------------------|-----------------------|--|--|
| A asexual reproduction | | genetically identical | | |
| в | sexual reproduction | genetically identical | | |
| С | asexual reproduction | genetically different | | |
| D | sexual reproduction | genetically different | | |

11 Which diagram of the female reproductive system is correctly labelled?

В

D

12 The diagram shows a food web.

Which two organisms are both secondary consumers?

- A insect and spider
- B insect and toad
- **C** rabbit and stoat
- D spider and toad

- 13 Which process takes carbon dioxide out of the air?
 - A combustion
 - **B** decomposition
 - **C** photosynthesis
 - D plant respiration
- **14** The melting point and boiling point of oxygen and nitrogen are shown.

| | melting point /°C | boiling point /°C |
|----------|----------------------|----------------------|
| oxygen | -219 | -183 |
| nitrogen | -210 | -196 |

A sealed flask contains a mixture of oxygen and nitrogen.

Which diagram shows the arrangement of oxygen and nitrogen particles at -190 °C?

- 15 What is an example of a physical change?
 - A carbon dioxide turning limewater milky
 - **B** the crystallisation of copper(II) sulfate from solution
 - **C** the electrolysis of molten lead(II) bromide
 - D the thermal decomposition of calcium carbonate
- **16** Water has the chemical formula H_2O .

Which statement is correct?

- A Pure water is a mixture because it contains hydrogen and oxygen.
- **B** Pure water is an element because it contains only one type of molecule.
- **C** Salt water is a compound because it contains salt and water.
- **D** Salt water is a mixture because it contains salt and water.

17 What are the products of the electrolysis of concentrated aqueous sodium chloride using inert electrodes?

| | anode | cathode |
|---|-------------------|----------|
| Α | chlorine hydrogen | |
| В | chlorine | sodium |
| С | oxygen | hydrogen |
| D | oxygen | sodium |

18 Some calcium carbonate and dilute hydrochloric acid start to react. Water is then added to the reaction mixture.

What happens to the rate of the reaction?

- A It decreases.
- B It increases.
- **C** It stays the same.
- D It stops.
- **19** In six separate experiments, dilute sulfuric acid is added separately to the substances listed.
 - magnesium
 - magnesium oxide
 - magnesium carbonate
 - copper
 - copper oxide
 - copper carbonate

How many of these experiments produce a gas?

A 2 **B** 3 **C** 4 **D** 5

- 20 Which two substances form a white precipitate when they are mixed?
 - **A** barium chloride and hydrochloric acid
 - **B** barium chloride and nitric acid
 - **C** silver nitrate and hydrochloric acid
 - D silver nitrate and nitric acid

www.xtrapapers.com

- **21** How does the character of the elements change across a period of the Periodic Table from left to right?
 - A acidic to basic
 - B basic to acidic
 - **C** metallic to non-metallic
 - **D** non-metallic to metallic
- 22 Ruthenium is a transition element.

Which row describes ruthenium?

| | forms coloured compounds | can be used as a catalyst | |
|---|--------------------------|------------------------------|---------------|
| Α | X | X | key |
| в | X | \checkmark | √=yes |
| С | \checkmark | X | x = no |
| D | 1 | 1 | |

- 23 Which words describe a noble gas?
 - A compound, colourless, does not burn in air
 - B element, colourless, burns in air
 - **C** element, colourless, does not burn in air
 - D element, green, does not burn in air
- 24 A steam boiler is a container in which water is converted into steam.

The steam is used to turn turbines which generate electricity.

Which metal can be used to make a steam boiler?

- A calcium
- B copper
- C magnesium
- D zinc

25 An experiment is set up to investigate the rusting of iron nails.

In which test-tube does the iron nail **not** rust because a barrier method of rust prevention is used?

- 26 Which type of compound contains only carbon and hydrogen?
 - A carbohydrate
 - **B** carbonate
 - C hydrocarbon
 - D hydroxide
- 27 Which substance turns aqueous bromine colourless?
 - A an alkane
 - B an alkene
 - C a saturated hydrocarbon
 - **D** poly(ethene)

www.xtrapapers.com

28 Which speed-time graph represents an object that is moving with constant speed?

29 The diagrams show four solid blocks that each have a mass of 15800 kg.

The dimensions of each block are shown.

Iron has a density of 7900 kg/m^3 .

Which block is made of iron?

- 30 Which change cannot be caused by a force acting on an object?
 - A change of mass
 - **B** change of motion
 - **C** change of shape
 - D change of size

31 An object is lifted vertically upwards.

Which change results in the same quantity of work being done?

- A lifting a heavier object through a greater distance in the same time
- **B** lifting a lighter object through the same distance in a smaller time
- **C** lifting the same object through a greater distance in the same time
- **D** lifting the same object through the same distance in a greater time
- 32 Which source of energy is non-renewable?
 - A chemical energy stored in fossil fuels
 - B energy stored in waves
 - **C** energy stored in water behind a hydroelectric dam
 - **D** wind energy
- 33 Cold water evaporates as molecules leave it.

Which molecules leave the water and from which part of the water do they leave?

| | molecules thatwhere theyleave the waterleave from | | | |
|---|---|----------------------|--|--|
| Α | least energetic | the surface only | | |
| В | least energetic | throughout the water | | |
| С | most energetic the surface only | | | |
| D | most energetic | throughout the water | | |

34 Energy is transferred from the Sun to the Earth through the vacuum of space.

Which method of energy transfer is involved?

- A conduction
- **B** convection
- **C** evaporation
- **D** radiation

35 A navigation buoy floating on the sea oscillates up and down as a wave passes.

What is the frequency of the waves?

| Α | 0.050 Hz | В | 0.33 Hz | С | 3.0 Hz | D | 20 Hz |
|---|----------|---|---------|---|--------|---|-------|
|---|----------|---|---------|---|--------|---|-------|

36 Which diagram shows how a converging lens forms a real image at the point labelled I?

37 There is a current in a solid metal wire.

Which particles flow through the wire, and which instrument is used to measure a current?

| | particles | instrument |
|---|-----------|------------|
| Α | electrons | ammeter |
| в | electrons | voltmeter |
| С | ions | ammeter |
| D | ions | voltmeter |

38 The diagram represents a circuit that includes a battery, an ammeter, a voltmeter and a variable resistor.

What happens to the readings on the meters as the resistance of the variable resistor is increased?

| | ammeter reading | voltmeter reading |
|---|-----------------|-------------------|
| Α | decreases | decreases |
| в | decreases | stays constant |
| С | increases | decreases |
| D | increases | stays constant |

39 A 20Ω resistor and a 15Ω resistor are connected in parallel.

What is the combined resistance of the two resistors?

- **A** less than 15Ω
- **B** between 15Ω and 20Ω
- **C** 35Ω
- **D** greater than 35Ω
- 40 An air conditioner and a television are both connected to the same electrical circuit.

The current in the air conditioner is 9.0 A and the current in the television is 2.0 A.

Several different fuses are available.

Which fuse should be connected at X?

A 1A **B** 3A **C** 7A **D** 13A
