Centre Number Candidate Number Name WANN, PAPAC CAMBridge, COM

## UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS International General Certificate of Secondary Education

## **CO-ORDINATED SCIENCES**

0654/02

Paper 2 Core

May/June 2006

2 hours

Candidates answer on the Question Paper. No Additional Materials are required.

## **READ THESE INSTRUCTIONS FIRST**

Write your Centre number, candidate number and name on all the work you hand in. Write in dark blue or black pen.

Do not use staples, paper clips, highlighters, glue or correction fluid.

Answer all questions.

You may use a pencil for any diagrams, graphs, tables or rough working.

A copy of the Periodic Table is printed on page 20.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [ ] at the end of each question or part question.

Www. PapaCambridge.com (c) The elements taken up by growing crops are present in the soil as compounds. In industry, nitrogen from air is used to make ammonia. Ammonia is used to ammonium nitrate, ammonium phosphate and urea, which are added to soil used growing crops. (i) Explain briefly why uncombined nitrogen molecules cannot be used by most growing crops. (ii) Name the other element which reacts with nitrogen to form ammonia. (iii) The chemical formula of urea is N<sub>2</sub>H<sub>4</sub>CO. State the total number of atoms which are combined in one molecule of urea. (d) Explain why lime might be added to certain types of soil in order to make it suitable for growing crops. (e) Soils contain compounds which have been formed by the weathering of rocks. Describe **one** way by which the weathering of rocks occurs.

10 Big-horn sheep live on rocky mountain sides in Canada. The males have very large The size of their horns is caused by their genes.

| (a) | Sta  | ate <b>one</b> feature shown in the photograph that is found only in mammals.                                |     |
|-----|------|--|-----|
|     |      | [  | [1] |
| (b) | (i)  | Name the part of a cell that contains the genes.   |     |
|     |      |  | [1] |
|     | (ii) | In which cells in the big-horn sheep's body will the gene for horn size be present?                          | ,   |
|     |      | [  | [1] |
| (c) |      | summer, it may be very hot in the mountains, but in winter it is very cold. Big-ho                           | orn |
|     | (i)  | Explain why the cells of the sheep can function better if the temperature arou them does not go up too high. | nd  |
|     |      |  |     |
|     |      |  |     |

helps [2] (ii) Respiration inside the cells of the sheep produces heat energy that helps them warm in cold weather. Write the word equation for respiration. (iii) Explain why the sheep have to eat more food when it is cold.

[2]

**11** Electricity is generated in a power station using a turbine and generator. (a) Complete the sentence below to describe the energy changes which take place in generator. energy is changed into energy **(b)** The voltage of the electricity generated is increased using transformers for transmission through power lines to the users. Explain why this is done. (c) The electrical supply to a house is at a voltage of 220 V. An electric kettle is plugged into the supply. The current flowing through the heating element of the kettle is 10 A. (i) Calculate the power taken by the kettle. Show your working and state the formula that you use. formula used working [2] (ii) Calculate the resistance of the heating element. Show your working and state the formula that you use. formula used working ohms

For Examiner's Use

**17** 

(d) Some power stations use fossil fuels as a source of energy.(i) What is meant by the term fossil fuel?

[2]

(ii) Name one fossil fuel.

[4]

WWW. Papa Cambridge. com (b) Petroleum (crude oil) is a black liquid mixture of hydrocarbons which is refined process of fractional distillation.

Fig. 12.1 shows a diagram of industrial apparatus used for fractional distillation.

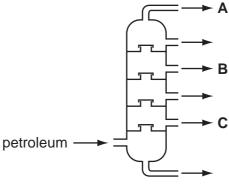

Fig. 12.1

|     |       | 3  |
|-----|-------|--|
|     | (i)   | Name the <b>two</b> main elements which are bonded together in the majority of molecules found in petroleum.   |
|     |       | [1]  |
|     | (ii)  | State $one$ difference in the properties of the materials coming out of the apparatus at points $\bf A$ and $\bf C$ .  |
|     |       |  |
|     |       | [1]  |
| (c) | cra   | me of the material coming out of the apparatus at point <b>B</b> in Fig. 12.1 undergoes cking on the surface of a catalyst. This produces a mixture of saturated and aturated hydrocarbons. The catalyst is in the form of very small particles. |
|     | (i)   | Describe briefly how an unsaturated hydrocarbon differs from a saturated hydrocarbon.  |
|     |       |  |
|     |       | [1]  |
|     | (ii)  | Explain the meaning of the term catalyst.  |
|     |       |  |
|     |       | [2]  |
|     | (iii) | Suggest why the catalyst is used in the form of very small particles.  |
|     |       |  |
|     |       | [1]  |
