MARK SCHEME

Maximum Mark: 100

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

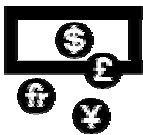

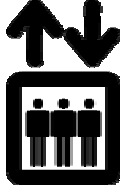

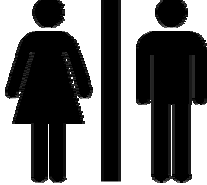

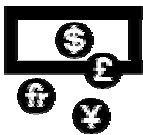

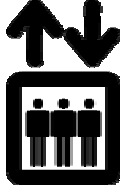

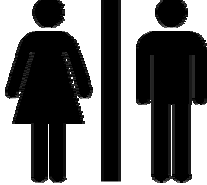

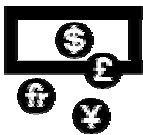

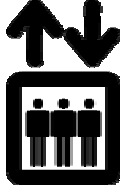

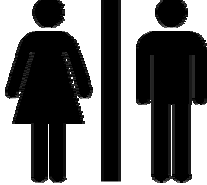

Cambridge is publishing the mark schemes for the May/June 2017 series for most Cambridge IGCSE[®], Cambridge International A and AS Level and Cambridge Pre-U components, and some Cambridge O Level components.

Better answers will have a reasoned conclusion</p> <p>The increasing costs of aviation fuel have led to airlines increasing their prices [L1]. The cost of the fuel has been passed on to the passenger through an increase in ticket prices, airlines have to ensure that all costs are covered to continue operating [L2]. In addition many governments added environmental taxes to air travel [L1] this tax has to be collected by the airline and passed onto the government, this is collected within the ticket price hence the increase in ticket price [L2]. The greatest increase in price has come from additional taxes such as the environmental tax [L3]</p>	6

3(e)	<p>Discuss how destinations can manage their carrying capacity.</p> <p>Indicative content:</p> <ul style="list-style-type: none"> • Scale down or withdraw promotion & marketing – limit demand • Open new attractions/destinations – to take pressure off other areas • Install physical barriers • Restrict access/flights/visas • Increase prices • Limit demand <p>Accept all reasonable visitor management strategies if in context</p> <p>Level 1 (1–2 marks) will identify up to two valid ways providing some detail within the context but will be mainly descriptive</p> <p>Level 2 (3–4 marks) can be awarded for an analysis clearly indicating how the ways help to manage the carrying capacity</p> <p>Level 3 (5–6 marks) can be awarded for evaluative comment about the significance/importance of the way. Better answers will have a reasoned conclusion.</p> <p>Credit all valid responses in context</p> <p>Destinations can limit their marketing/promotional activity [L1] appealing to less tourists and therefore limiting further demand and tourist numbers [L2]. Reduced tourists numbers will allow the destination to effectively manage the carrying capacity issues that they face due to less overcrowding, therefore securing the future of the destination and the future appeal of the destination [L3]. However, it will mean that they see a reduction in tourist numbers and tourist spending [L3]. Destinations can also build or scale up promotion of other attractions [L1] so that tourists are diverted to other areas, reducing the pressure/impacts on the honey pot sites [L2]. This, as a method, has the benefit of the destination still benefiting from the tourist numbers and spending whilst managing/spreading out tourist numbers throughout the destination [L3].</p>	6
