Mark Schemes for the Units

January 2010

H011/H411/MS/R/10J

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of pupils of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, OCR Nationals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by Examiners. It does not indicate the details of the discussions which took place at an Examiners' meeting before marking commenced.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the Report on the Examination.

OCR will not enter into any discussion or correspondence in connection with this mark scheme.

MARK SCHEMES FOR THE UNITS

Unit/Content	Page
F011 – Accounting Principles	1
F012 – Financial Accounting	7
F013 – Company Accounts and Interpretation	16
F014 – Management Accounting	23
Grade Thresholds	33

F011 – Accounting Principles

Quality of Written Communication

The rubric states:

** In these two questions/sub questions, you will be assessed on the quality of your written communication. In one of these questions, the focus will be on your ability to present numerical information legibly and in an appropriate accounting format. In the other, you will be assessed on the legibility and style of writing, the clarity and coherence of your arguments and the accuracy of your spelling, punctuation and grammar.*

4% of the paper marks are available for rewarding *Quality of Written Communication*.

Levels of Response for *Numerical Questions*

Level	Mark	Description
2	2	Almost all account headings, terms and balances are included appropriately and in line with accounting conventions. Figures are legible with effective use made of columns and sub-totals. Accounts are ruled off as appropriate.
1	1	Some account headings, terms and balances are included though not always adhered to accounting conventions. Most figures are legible. Some appropriate use is made of columns and sub-totals. Some accounts are ruled off as appropriate.
–	0	Responses which fail to achieve the standard required for Level 1.

Levels of Response for *Narrative Questions*

Level	Mark	Description
2	2	Ideas, some complex, are expressed clearly and quite fluently, using an appropriate style of writing. Arguments made are generally relevant and are constructed in a logical and coherent manner. There are few errors of spelling, punctuation and grammar, and those that are made are not intrusive and do not obscure meaning.
1	1	Relatively straightforward or simple ideas are expressed in a generally appropriate style of writing which sometimes lacks clarity or fluency. Arguments have some limited coherence and structure occasionally showing relevance to the main focus of the questions. There are errors of spelling, punctuation and grammar which are noticeable and sometimes intrusive but do not totally obscure meaning.
–	0	Responses which fail to achieve the standard required for Level 1.

2 (c) (i)	Trade discount – £400 (1)		
2 (c) (ii)	Cash discount – £32 (1)		
2 (c) (iii)	Total paid to supplier – £1,568 (1) or £1,560 (1of)	[3]	
2 (d)	Amount paid to supplier – £1,600 (1)	[1]	
2 (e)	<p>Dual aspect concept (2) + (1) for development</p> <p>Records transactions into two accounts (1), one being debited and the other credited (1). This allows the business to easily check for errors (1).</p> <p>Double-entry is a commonly understood accounting system (1) allowing book-keepers and accountants to prepare accounts using the same system for all kinds of organisations in different countries (1). This reduces confusion and promotes understanding of business financial information (1).</p> <p>Entries are made into individual ledger accounts which are balanced off regularly (1). This allows for control (1), for example; amounts due to creditors to be paid on time and debtors to be more easily monitored. This ensures continuity of supply and reduces the possibility of bad debts (1).</p> <p>Useful for preparation of the trial balance (1). If the trial balance doesn't balance errors can be investigated (1) and resolved before preparation of final accounts (1).</p> <p>Final accounts can be easily prepared (1). This allows for useful information to be provided for users (1) such as information on profits and asset values (1).</p> <p>There are some limitations to the double-entry system (1), e.g. errors that do not affect the balancing of the trial balance (1) leading to the incorrect assumption that the accounts are correct (1).</p>

Question	Expected Answer	Mark	Rationale/Additional Guidance
(d)*	<p>Advantages: There are no legal formalities which must be completed when setting up as a partnership. Additional specialist skills of partner. The workload and burden of responsibility can be shared between the partners. Easier to raise additional capital.</p> <p>Disadvantages: Profits have to be shared between partners. Partnership must be wound up if one partner dies; in a limited company the shares can be transferred to someone else. Possibility of disagreement with more partners.</p> <p>(4 x 2 marks) (1 for point plus up to 1 for development) QWC</p>	<p>[2] [10]</p>

	(b)*	Ordinary shareholders could be given shares as an alternative to the payment of a cash dividend. Issuing bonus shares will reduce the amount of cash outflows in dividend payments and would improve the liquidity of the company.																																																																																																	

F013

Mark Scheme

January 2010

Question	Expected Answers	Marks	Rationale
(b)*	<p>The ordinary shares do not reflect the asset value of the company and the capital and revenue reserves can be used to create extra shares. This would increase the number of equity shares on the balance sheet of the company.</p> <p>If the company creates more ordinary shares this will dilute the market share price of the share. The lower price of the shares may be more attractive to investors. The market in the shares might be increased because of the lower price.</p> <p>If the company has only given a small wage increase to employees then giving existing shareholders bonus shares instead of dividend payments may reduce unrest with the workforce.</p> <p>Share capital base increases and the company may achieve a bigger size in the eyes of investors.</p> <p>Shareholders regard a bonus issue as a strong indication that the prospects of the company have brightened and they can reasonably look forward to an increase in total dividend.</p> <p>It may improve the prospects of raising additional funds from banks in the form of loans.</p> <p>(3x max 3 marks – overall maximum 8 marks) (1 for point plus up to 2 for development)</p>	<p>(8) QWC (2) [10]</p>

F014

Mark Scheme

January 2010

Question	Expected Answers	Marks	Rationale
(b)*	<p>Payback is easy to calculate (1). Payback is useful in technological industries where a short payback is preferred(1). It uses cash flow (1) which is not subjective (1). It considers payback period only (1) and does not take future (1) cash flows into account. Timing (1) is not taken (1) into account.</p> <p>Net present value recognises the time value (1) of money and compares future cash flows with present cash flows (1). All cash flows (1) are taken into account. It uses cash flow (1) which is not subjective (1) Future rate of interest is likely to vary (1).</p> <p>Accounting rate of return can be compared to the profitability of the business (1). The full period (1) is taken into account but timing (1) is not considered (1). Profit is subjective and depends on policies adopted (1). This is the only method to use profit (1).</p> <p>(Each method 2 x 2 marks) (1 for point plus 1 for development)</p>	<p>(12) QWC (2) [14]</p>	
(c)	<p>The market research expenditure has already been spent, (1) it is irrelevant (1) It should be ignored (1) in the capital expenditure decision. It is a sunk cost (1)</p> <p>(3 x 1 mark)</p>	<p>[3]</p>

Grade Thresholds

Advanced GCE Accounting (H011 H0411)
January 2010 Examination Series

Unit Threshold Marks

Unit		Maximum Mark	A	B	C	D	E	U
F011	Raw	80	69	62	55	48	41	0
	UMS	80	64	56	48	40	32	0
F012	Raw	120	96	86	76	67	58	0
	UMS	120	96	84	72	60	48	0
F013	Raw	80	71	63	55	48	41	0
	UMS	80	64	56	48	40	32	0
F014	Raw	120	102	89	77	65	53	0
	UMS	120	96	84	72	60	48	0

Specification Aggregation Results

Overall threshold marks in UMS (ie after conversion of raw marks to uniform marks)

	Maximum Mark	A	B	C	D	E	U
H011	200	160	140	120	100	80	0

The cumulative percentage of candidates awarded each grade was as follows:

	A	B	C	D	E	U	Total Number of Candidates
H011	12.0	36.7	61.3	78.0	92.7	100.00	177

For a description of how UMS marks are calculated see:
