Unit **F011**: Accounting Principles

Advanced Subsidiary GCE

Mark Scheme for June 2017

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

OCR will not enter into any discussion or correspondence in connection with this mark scheme.

(vi)	Machinery was disposed of at a loss. (1of)	1																					

Question	Answer	Mark	Guidance
(c)*	<p>Machinery Machinery is depreciated by the reducing balance method which implies that it loses more value in the earlier years of its life. Appropriate for machinery as it recognises more value will be lost in earlier years. As the machinery gets older the lower depreciation will be offset by increasing maintenance costs. This will ensure a more even charge each year in the accounts.</p> <p>Motor vans Straight line apports equal depreciation each year and not appropriate. Motor vans tend to lose value quicker in the earlier years of their life and also maintenance costs increase as they get older. Reducing balance method more appropriate because it recognises that motor vans lose more value in earlier years.</p> <p>Each method 4 marks (1 for appropriateness and max 3 marks for discussion)</p> <p style="text-align: right;">QWC 2</p>	10	
(d) (i)	<p>Going concern assumes that a business will carry on trading as normal for the foreseeable future and its accounts are prepared on that basis. Fixed assets are valued on the basis of continuing use in the business and depreciated accordingly. Depreciation is applied each year and total depreciation is deducted from cost will give a written down value on a going concern basis. If the business were about to cease trading, fixed assets would have to be valued on the basis of estimated sales value which for most fixed assets, with the exception of land, is likely to be lower than the net book value previously shown in the business balance sheet.</p> <p>(1 for concept explanation and max 4 marks for discussion of application)</p>	5	

Question	Answer	Mark	Guidance
(ii)	<p>The accruals/matching concept states that revenues earned during a financial year must be matched by expenses incurred in the same financial year, not when they are received or paid. The whole cost of a fixed asset is not charged to the profit and loss account in the year of purchase but instead depreciation is charged annually in the profit and loss account. Calculations are based on the expected useful life of the fixed asset and its estimated fall in value over the full period.</p> <p>As the benefits derived from the use of a fixed asset are spread over several accounting periods, depreciation attempts to match the benefits derived from use of the fixed assets in an accounting period with a fair proportion of the cost of the fixed asset consumed in the same period.</p> <p>(1 for concept explanation and max 4 marks for discussion of application)</p>	5
