RECOGNISING ACHIEVEMENT

## Assumed Knowledge for GCE Mathematics

The GCE Mathematics specifications written for first teaching in September 2004 were designed at a time when GCSE Mathematics had three tiers: Foundation, Intermediate and Higher. The subject criteria for GCE Mathematics were designed with the assumption that students embarking on AS and Advanced GCE study in Mathematics were expected to have achieved at least grade C in GCSE Mathematics, or its equivalent, and to have covered all the material in the Intermediate Tier of GCSE Mathematics; Intermediate Tier of GCSE Mathematics allowed candidates to achieve up to grade B.

This document contains the content of a three-tier GCSE Mathematics specification in use in 2004. The document is laid out in double pages, so that pages 1 and 2 form one double-page spread. The assumed knowledge for GCE Mathematics can therefore be found on the odd-numbered pages, though there are relevant notes in the right-hand column of the even-numbered pages.

| AO2 Number and Algebra | NC <br> ref | Foundation Tier | NC ref | Intermediate Tier |
| :---: | :---: | :---: | :---: | :---: |
|  |  | pupils should be taught to: |  | pupils should be taught to: |
| Fractions | F2.2c | understand equivalent fractions, simplifying a fraction by cancelling all common factors; order fractions by rewriting them with a common denominator | H2.2c | ..... |
| Decimals | F2.2d | use decimal notation and recognise that each terminating decimal is a fraction (1); order decimals | H2.2d | ..... ; recognise that recurring decimals are exact fractions, and that some exact fractions are recurring decimals (2) |
| Percentages | F2.2e | understand that 'percentage' means 'number of parts per 100' and use this to compare proportions; interpret percentage as the operator 'so many hundredths of' (1); use percentage in real-life situations (2) | H2.2e | understand that 'percentage' means 'number of parts per 100' and interpret percentage as the operator 'so many hundredths of' (1) |
| Ratio | F2.2f | use ratio notation, including reduction to its simplest form and its various links to fraction notation (1) | H2.2f | ..... |
| 3. Calculations |  |  |  |  |
| Number operations and the relationships between them | F2.3a | add, subtract, multiply and divide integers and then any number; multiply or divide any number by powers of 10 , and any positive number by a number between 0 and 1 | H2.3a | multiply or divide any number by powers of 10 , and any positive number by a number between 0 and 1 ; find the prime factor decomposition of positive integers; understand 'reciprocal' as multiplicative inverse, knowing that any non-zero number multiplied by its reciprocal is 1 (and that zero has no reciprocal, because division by zero is not defined); multiply and divide by a negative number; use index laws to simplify and calculate the value of numerical expressions involving multiplication and division of integer powers; use inverse operations |
|  | F2.3b | use brackets and hierarchy of operations | H2.3b | ..... |
|  | F2.3c | calculate a given fraction of a given quantity, <br> (1) expressing the answer as a fraction; express a given number as a fraction of another; add and subtract fractions by writing them with a common denominator; perform short division to convert a simple fraction to a decimal | H2.3c | ..... ; distinguish between fractions with denominators that have only prime factors of 2 and 5 (which are represented by terminating decimals), and other fractions (which are represented by recurring decimals) |
|  | F2.3d | understand and use unit fractions as multiplicative inverses (1)(2); multiply and divide a fraction by an integer, and multiply a fraction by a unit fraction | H2.3d | ..... , and by a general fraction |
|  | F2.3e | convert simple fractions of a whole to percentages of the whole and vice versa (1) | H2.3e | ..... understand the multiplicative nature of percentages as operators (2); calculate an original amount when given the transformed amount after a percentage change; reverse percentage problems (3) |
|  | F2.3f | divide a quantity in a given ratio (1) | H2.3f | ..... |
| Mental methods | F2.3g | recall all positive integer complements to 100 (1); recall all multiplication facts to $10 \times 10$, and use them to derive quickly the corresponding division facts; recall the cubes of $2,3,4,5$ and 10 , and the fraction-to-decimal conversion of familiar simple fractions (2) | H2.3g | recall integer squares from $2 \times 2$ to $15 \times$ 15 and the corresponding square roots, the cubes of $2,3,4,5$ and 10 |

| NC ref | Higher Tier |  | Key Skills and notes |
| :---: | :---: | :---: | :---: |
|  | pupils should be taught to: |  |  |
| H2.2d | recognise that recurring decimals are exact fractions, and that some exact fractions are recurring decimals (2) |  | Foundation and Intermediate: (1)[for example, 0.137=137/1000] Intermediate and Higher : (2)[for example, $1 / 7=0.142857142857 . .$. |
|  |  | 88 | Foundation and Intermediate: (1)[for example, $10 \%$ means 10 parts per 100 and $15 \%$ of Y means $15 / 100 \times \mathrm{Y}$ ] <br> Foundation : (2)[for example, commerce and business, including rate of inflation, VAT and interest rates] <br> Foundation Tier : Financial capability |
| H2.2f | $\ldots$ |  | Foundation: (1) [for example, in maps and scale drawings, paper size and gears] |
| 3. Calculations |  |  |  |
| H2.3a | multiply or divide any number by a number between 0 and 1 ; find the prime factor decomposition of positive integers; understand 'reciprocal' as multiplicative inverse, knowing that any non-zero number multiplied by its reciprocal is 1 (and that zero has no reciprocal, because division by zero is not defined); multiply and divide by a negative number; use index laws to simplify and calculate the value of numerical expressions involving multiplication and division of integer, fractional and negative powers; use inverse operations, understanding that the inverse operation of raising a positive number to power $n$ is raising the result of this operation to power $1 / n$ | $-$ | N1.2, N2.2 |
| H2.3c | distinguish between fractions with denominators that have only prime factors of 2 and 5 (which are represented by recurring decimals); convert a recurring decimal to a fraction (2) |  | Foundation :(1) [for example, for scale drawings and construction of models, down payments, discounts] <br> Higher : (2)[for example, 0.142857142857... = 1/7] |
| H2.3d | multiply and divide a given fraction by a unit fraction and by a general fraction (2) |  | Foundation and Intermediate :(1) [for example, by thinking of multiplication by $1 / 5$ as division by 5 ] <br> Foundation , Intermediate and Higher :(2) for example, by thinking of multiplication by $6 / 7$ as multiplication by 6 followed by division by 7 (or vice versa)] |
| H2.3e | understand the multiplicative nature of percentages as operators (2); calculate an original amount when given the transformed amount after a percentage change; reverse percentage problems (3) |  | Foundation : (1)[for example, analysing diets, budgets or the costs of running, maintaining and owning a car] <br> Intermediate and Higher : (2)[for example, a $15 \%$ increase in value Y , followed by a $15 \%$ decrease is calculated as $1.15 \times 0.85 \times \mathrm{Y}]$; (3)[for <br> example, given that a meal in a restaurant costs $£ 36$ with VAT at $17.5 \%$, its price before VAT is calculated as $£ 36 / 1.175$ ] |
| H2.3f | ..... |  | Foundation : (1)[for example, share $£ 15$ in the ratio of 1:2] |
| H2.3g | ..... the fact that $n^{0}=1$ and $n^{-1}=1 / n$ for positive integers $n(2)$, the corresponding rule for negative numbers (3), $n^{1 / 2}=\sqrt{ } n$ and $n^{1 / 3}={ }^{3} \sqrt{n}$ for any positive number $n$ (4) |  | Foundation : (1)[for example, $37+63$ = 100]; (2)[for example, 1/2, $1 / 4,1 / 5,1 / 10,1 / 100,1 / 3,2 / 3,1 / 8]$ <br> Higher : (2) [for example, $\left.10^{0}=1 ; 9^{-1}=1 / 9\right]$, (3)[for example, $5^{-2}=$ $1 / 5^{2}=1 / 25$ ], (4)[for example, $25^{1 / 2}=5$ and $64^{1 / 3}=4$ ] |

| :---: | :---: | :---: | :---: | :---: |
|  |  | pupils should be taught to: |  | pupils should be taught to: |
|  | F2.3h | round to the nearest integer and to one significant figure; estimate answers to problems involving decimals | H2.3h | round to a given number of significant figures; develop a range of strategies for mental calculation; derive unknown facts from those they know; convert between ordinary and standard index form representations (1), converting to standard index form to make sensible estimates for calculations involving multiplication and/or division |
|  | F2.3i | develop a range of strategies for mental calculation; derive unknown facts from those they know (1) ; add and subtract mentally numbers with up to two decimal places (2); multiply and divide numbers with no more than one decimal digit (3), using the commutative, associative, and distributive laws and factorisation where possible, or place value adjustments |  |  |
| Written methods | F2.3j | use standard column procedures for addition and subtraction of integers and decimals |  |  |
|  | F2.3k | use standard column procedures for multiplication of integers and decimals, understand where to position the decimal point by considering what happens if they multiply equivalent fractions |  |  |
|  | F2.31 | use efficient methods to calculate with fractions, including cancelling common factors before carrying out the calculation, recognising that, in many cases, only a fraction can express the exact answer | H2.3i | ..... |
|  | F2.3m | solve simple percentage problems, including increase and decrease (1) | H2.3j | solve percentage problems, including percentage increase and decrease (2); and reverse percentages |
|  | F2.3n | solve word problems about ratio and proportion, including using informal strategies and the unitary method of solution (1) | H2.3k | represent repeated proportional change using a multiplier raised to a power (2) |
|  |  |  | H2.31 | calculate an unknown quantity from quantities that vary in direct proportion |
|  |  |  | H2.3m | calculate with standard index form (1) |
|  |  |  | H2.3n | use surds and $\pi$ in exact calculations, without a calculator |
| Calculator methods | F2.3o | use calculators effectively: know how to enter complex calculations and use function keys for reciprocals, squares and powers | H2.3o | use calculators effectively and efficiently, knowing how to enter complex calculations; use an extended range of function keys, including trigonometrical and statistical functions relevant across this programme of study |
|  | F2.3p | enter a range of calculations, including those involving measures (1) | H2.3p | understand the calculator display, knowing when to interpret the display, when the display has been rounded by the calculator, and not to round during the intermediate steps of a calculation |
|  | F2.3q | understand the calculator display (1), interpreting it correctly and knowing not to round during the intermediate steps of a calculation |  |  |
|  |  |  | H2.3r | use standard index form display and know how to enter numbers in standard index form |
|  |  |  | H2.3s | use calculators for reverse percentage calculations by doing an appropriate division |

| :---: | :---: | :---: | :---: | :---: |
|  |  | pupils should be taught to: |  | pupils should be taught to: |
|  |  |  |  |  |
| 4. Solving numerical problems |  |  |  |  |
|  | F2.4a | draw on their knowledge of the operations and the relationships between them, and of simple integer powers and their corresponding roots, to solve problems involving ratio and proportion, a range of measures, including speed, metric units, and conversion between metric and common imperial units, set in a variety of contexts | H2.4a | draw on their knowledge of operations and inverse operations (including powers and roots), and of methods of simplification (including factorisation and the use of the commutative, associative and distributive laws of addition, multiplication and factorisation) in order to select and use suitable strategies and techniques to solve problems and word problems, including those involving ratio and proportion, repeated proportional change, fractions, percentages and reverse percentages, surds, measures and conversion between measures, and compound measures defined within a particular situation |
|  | F2.4b | select appropriate operations, methods and strategies to solve number problems, including trial and improvement where a more efficient method to find the solution is not obvious |  |  |
|  | F2.4c | use a variety of checking procedures, including working the problem backwards, and considering whether a result is of the right order of magnitude |  |  |
|  | F2.4d | give solutions in the context of the problem to an appropriate degree of accuracy, interpreting the solution shown on a calculator display, and recognising limitations on the accuracy of data and measurements | H2.4b | check and estimate answers to problems; select and justify appropriate degrees of accuracy for answers to problems; recognise limitations on the accuracy of data and measurements |
| 5. Equations, formulae and identities |  |  |  |  |
| Use of symbols | F2.5a | distinguish the different roles played by letter symbols in algebra, knowing that letter symbols represent definite unknown numbers in equation (1), defined quantities or variables in formulae (2), general, unspecified and independent numbers in identities (3) and in functions they define new expressions or quantities by referring to known quantities (4) | H2.5a | distinguish the different roles played by letter symbols in algebra, using the correct notational conventions for multiplying or dividing by a given number, and knowing that letter symbols represent definite unknown numbers in equations (5), defined quantities or variables in formula (6), general, unspecified and independent numbers in identities (7), and in functions they define new expressions or quantities by referring to known quantities (8) |
|  | F2.5b | understand that the transformation of algebraic expressions obeys and generalises the rules of arithmetic; manipulate algebraic expressions by collecting like terms, by multiplying a single term over a bracket, and by taking out single term common factors (1) | H2.5b | understand that the transformation of algebraic entities obeys and generalises the well-defined rules of generalised arithmetic (2) expand the product of two linear expressions (3); manipulate algebraic expressions by collecting like terms, multiplying a single term over a bracket, taking out common factors (4), factorising quadratic expressions including the difference of two squares (5) and cancelling common factors in rational expressions (6) |
|  |  |  | H2.5c | know the meaning of and use the words 'equation', 'formula', 'identity' and 'expression’ |

| AO2 Number and Algebra | $\begin{aligned} & \text { NC } \\ & \text { ref } \end{aligned}$ | Foundation Tier | $\begin{aligned} & \text { NC } \\ & \text { ref } \end{aligned}$ | Intermediate Tier |
| :---: | :---: | :---: | :---: | :---: |
|  |  | pupils should be taught to: |  | pupils should be taught to: |
| Index notation | F2.5c | use index notation for simple integer powers, and substitute positive and negative numbers into expressions such as $3 x^{2}+4$ and $2 x^{3}$ | H2.5d | use index notation for simple integer powers, and simple instances of index laws (1); substitute positive and negative numbers into expressions such as $3 x^{2}+4$ and $2 x^{3}$ |
| Equations |  |  | H2.5e | set up simple equations (1); solve simple equations (2) by using inverse operation or by transforming both sides in the same way |
| Linear equations | F2.5e | solve linear equations, with integer coefficients, in which the unknown appears on either side or on both sides of the equation; solve linear equations that require prior simplification of brackets, including those that have negative signs occurring anywhere in the equation, and those with a negative solution | H2.5f | solve linear equations in one unknown, with integer or fractional coefficients, in which he unknown appears on either side or on both sides of the equation; solve linear equations that required prior simplification of brackets, including those that have negative signs occurring anywhere in the equation, and those with a negative solution |
| Formulae | F2.5f | use formulae from mathematics and other subjects expressed initially in words and then using letters and symbols (1); substitute numbers into a formula; derive a formula (2) | H2.5g | use formulae from mathematics and other subjects (3); substitute numbers into a formula; change the subject of a formula, including cases where the subject occurs twice, or where a power of the subject appears (4); generate a formula (5) |
| Direct and Inverse Proportion |  |  |  |  |
| Simultaneous linear equations |  |  | H2.5i | find the exact solution of two simultaneous equations in two unknowns by eliminating a variable, and interpret the equations as lines and their common solution as the point of intersection |
| Inequalities | F2.5d | solve simple linear inequalities in one variable, and represent the solution set on a number line | H2.5j | ..... solve several linear inequalities in two variables and find the solution set |
| Quadratic equations |  |  | H2.5k | solve quadratic equations by factorisation |
| Simultaneous linear and quadratic equations |  |  |  |  |
| Numerical methods |  |  | H2.5m | use systematic trial and improvement to find approximate solutions of equations where there is no simple analytical method of solving them (1) |

| NC ref | Higher Tier |  | Key Skills and notes |
| :---: | :---: | :---: | :---: |
|  | pupils should be taught to: |  |  |
| H2.5d | use simple instances of index laws (1) |  | Intermediate/Higher : (1)[for example, $x^{2} \times x^{3}=x^{5} ; x^{2} \div x^{3}=x^{-1}$; $\left.\left(x^{2}\right)^{3}=x^{6}\right]$; |
| H2.5e | ..... |  | Intermediate/Higher : (1)[for example, find the angle $a$ in a triangle with angles $a, a+10, a+20$ ]; (2)[for example, $5 x=7$; $11-4 x=2$; $\left.3(2 x+1)=8 ; 2(1-x)=6(2+x) ; 4 x^{2}=49 ; 3=12 / x\right]$ |
| H2.5f | solve linear equations in one unknown, with integer or fractional coefficients, in which the unknown appears on either side or on both sides of the equation |  |  |
| H2.5g | ..... | $\begin{aligned} & \infty \\ & 8 \\ & 80 \end{aligned}$ | Foundation : (1)[for example, formulae for the area of a triangle, the area enclosed by a circle, wage earned $=$ hours worked $\times$ rate per hour]; (2)[for example, convert temperatures between degrees Fahrenheit and degrees Celsius, find the perimeter of a rectangle given its area $A$ and length $l$ of one side] <br> Intermediate/Higher : (3)[for example, for area of a triangle or a parallelogram, area enclosed by a circle, volume of a prism, volume of a cone]; (4)[for example, find $r$ given that $A=\pi r^{2}$, find $x$ given $y=m x+c]$; (5)[for example, find the perimeter of a rectangle given its area $A$ and the length $l$ of one side] <br> N2.2, IT1.2, IT2.2 <br> Foundation Tier : Pupils could use a spreadsheet to construct formulae to model situations. <br> Intermediate/Higher Tiers: Pupils could use a spreadsheet or graphic calculator to construct and use formulae. |
| H2.5h | set up and use equations to solve word and other problems involving direct proportion or inverse proportion and relate algebraic solutions to graphical representation of the equations (1) |  | Higher : (1) [for example, $y \propto x, y \propto x^{2}, y \propto 1 / x, y \propto 1 / x^{2}$ ] |
| H2.5i | ..... |  |  |
| H2.5j | $\cdots$ |  |  |
| H2.5k | solve quadratic equations by factorisation, completing the square and using the quadratic formula |  |  |
| H2.5l | solve exactly, by elimination of an unknown, two simultaneous equations in two unknowns, one of which is linear in each unknown, and the other is linear in one unknown and quadratic in the other (1), or where the second is of the form $x^{2}+y^{2}=r^{2}$ |  | Higher : (1) [for example, $y=11 x-2$ and $y=5 x^{2}$ ] |
| H2.5m | ..... |  | Intermediate/Higher : (1) [for example, $\left.x^{3}=x-900\right]$ |

| AO2 Number and Algebra | $\begin{aligned} & \text { NC } \\ & \text { ref } \end{aligned}$ | Foundation Tier | $\begin{aligned} & \text { NC } \\ & \text { ref } \end{aligned}$ | Intermediate Tier |

|  |  | pupils should be taught to: |  | pupils should be taught to: |
| 6. Sequences, functions and graphs |  |  |  |  |
| Sequences | F2.6a | generate terms of a sequence using term-to term and position-to-term definitions of the sequence | H2.6a | generate common integer sequences (including sequences of odd or even integers, scuared integers, powers of 2 , powers of 10, squared integers, powers of 2 , powers of triangular numbers); senerate terms of a sequence using term-to-term and position-toexpressions to describ sect arithmetic sequence, justifying its form by reference to the activity or context from which it was generated |
| Graphs of linear functions | F2.6b | use the conventions for coordinates in the plane; plot points in all four quadrants; plot graphs of functions in which $y$ is given explicitly in terms of $x$ (1) or implicitly (2) | H2.6b | use conventions for coordinates in the plane; plot points in all four quadrants; recognise (when values are given for $m$ and $c$ ) that equations of the form $y=m x+c$ correspond to straight-line graphs in the coordinate plane; plot graphs of functions in which $y$ is given explicitly in terms of $x$ (1), or implicitly (2) |
|  | F2.6c | construct linear functions from real-life problems and plot their corresponding graphs; discuss and interpret graphs arising from real situations | H2.6c | find the gradient of lines given by equations of the form $y=m x+c$ (when values are given for $m$ and $c$ ); understand that the form $y=m x+c$ represents a straight line and that $m$ is the gradient of the line, and $c$ is the value of the $y$-intercept; explore the gradients of parallel lines (1) |
| Interpreting graphical information | F2.6e | interpret information presented in a range of linear and non-linear graphs (1) | H2.6d | construct linear functions and plot the corresponding graphs arising from real-life problems; discuss and interpret graphs modelling real situations (2) |
| Quadratic functions |  |  | H2.6e | generate points and plot graphs of simple quadratic functions(1), then more general quadratic functions (2); find approximate solutions of a quadratic equation from the graph of the corresponding quadratic function |
| Other functions |  |  | H2.6f | plot graphs of: simple cubic functions (1), the reciprocal function $y=1 / x$ with $x \neq 0$, using a spreadsheet or graph plotter as well as pencil and paper; recognise the characteristic shapes of all these functions |
| Transformation of functions |  |  |  |  |
| Loci |  |  | H2.6h | construct the graphs of simple loci |

| NC ref | Higher Tier |  | Key Skills and notes |
| :---: | :---: | :---: | :---: |
|  | pupils should be taught to: |  |  |
| 6. Sequences, functions and graphs |  |  |  |
| H2.6a | generate common integer sequences (including sequences of odd or even integers, squared integers, powers of 2 , powers of 10 , triangular numbers); use linear expressions to describe the $n$th term of an arithmetic sequence, justifying its form by reference to the activity or context from which it was generated |  |  |
| H2.6b | recognise (when values are given for $m$ and c) that equations of the form $y=m x+c$ correspond to straight-line graphs in the coordinate plane | 0 <br> 8 | Foundation/Intermediate : (1)[for example, $y=2 x+3$ ], (2) [for example, $x+y=7]$ <br> Foundation : Pupils could use a spreadsheet to calculate points and to draw graphs to explore the effects of varying $m$ and $c$ in the graph of $y=m x+c$. <br> Intermediate/Higher : Pupils could generate functions from plots of experimental data using simple curve fitting techniques on graphic calculators or with graphics software. <br> IT1.2, IT2. 2 |
| H2.6c | ..... and lines perpendicular to these lines (2) |  | Intermediate/Higher : (1)[for example, know that the lines represented by the equations $y=-5 x$ and $y=3-5 x$ are parallel, each having gradient (-5) and that (2) the line with equation $y=x / 5$ is perpendicular to these lines and has gradient $1 / 5$ ] |
| H2.6d | $\ldots$ | - | Foundation : (1) [for example, graphs describing trends, conversion graphs, distance-time graphs, graphs of height or weight against age, graphs of quantities that vary against time, such as employment] Intermediate/Higher : (2) [for example, distance-time graph for a particle moving with constant speed, the depth of water in a container as it empties, the velocity-time graph for a particle moving with constant acceleration] C1.2, N2. 1 |
| H2.6e | ..... find the intersection points of the graphs of a linear and quadratic function, knowing that these are the approximate solutions of the corresponding simultaneous equations representing the linear and quadratic functions |  | Intermediate/Higher : (1) [for example, $\left.y=x^{2} ; y=3 x^{2}+4\right]$, (2) [for example, $\left.y=x^{2}-2 x+1\right]$ |
| H2.6f | ..... plot graphs of: the exponential function $y=k^{x}$ for integer values of $x$ and simple positive values of $k$ (2), the circular functions $y=\sin x$ and $y=\cos x$, using a spreadsheet or graph plotter as well as pencil and paper; recognise the characteristic shapes of all these functions |  | Intermediate/Higher : (1) [for example, $y=x^{3}$ ], Higher : (2) [for example, $\left.y=2^{x} ; y=(1 / 2)^{x}\right]$ <br> IT1.1, IT1.2, IT2.2 |
| H2.6g | apply to the graph of $y=\mathrm{f}(x)$ the transformations $y=\mathrm{f}(x)+a, y=\mathrm{f}(a x)$, $y=\mathrm{f}(x+a), y=a \mathrm{f}(x)$ for linear, quadratic, sine and cosine functions $\mathrm{f}(x)$ |  | Higher : Pupils could use software to explore transformations of graphs. <br> IT2.2 |
| H2.6h | ..... including the circle $x^{2}+y^{2}=r^{2}$ for a circle of radius $r$ centred at the origin of coordinates; find graphically the intersection points of a given straight line with this circle and know that this corresponds to solving the two simultaneous equations representing the line and the circle |  |  |

| AO3 Shape, space and measures | NC ref | Foundation Tier | NC ref | Intermediate Tier |
| :---: | :---: | :---: | :---: | :---: |
|  |  | pupils should be taught to: |  | pupils should be taught to: |
| 1. Using and Applying shape, space and measures |  |  |  |  |
| Problem solving | F3.1a | select problem-solving strategies and resources, including ICT tools, to use in geometrical work, and monitor their effectiveness | H3.1a | select the problem-solving strategies to use in geometrical work, and consider and explain the extent to which the selections they made were appropriate |
|  | F3.1b | select and combine known facts and problem-solving strategies to solve complex problems | H3.1b | select and combine known facts and problem-solving strategies to solve more complex geometrical problems |
|  | F3.1c | identify what further information is needed to solve a geometrical problem; break complex problems down into a series of tasks | H3.1c | develop and follow alternative lines of enquiry |
| Communicating | F3.1d | interpret, discuss and synthesise geometrical information presented in a variety of forms | H3.1d | communicate mathematically, with emphasis on a critical examination of the presentation and organisation of results, and on effective use of symbols and geometrical diagrams |
|  | F3.1e | communicate mathematically, by presenting and organising results and explaining geometrical diagrams |  | review and justify their choices of mathematics presentation ; |
|  | F3.1f | use geometrical language appropriately |  |  |
| Reasoning | F3.1i | apply mathematical reasoning, explaining and justifying inferences and deductions | H3.1f | apply mathematical reasoning, progressing from brief mathematical explanations towards full justifications in more complex contexts |
|  |  |  | H3.1g | explore connections in geometry; pose conditional constraints of the type 'If ... then ...'; and ask questions 'What if ... ?' or 'Why?' |
|  | F3.1j | show step-by-step deduction in solving a geometrical problem | H3.1h | $\cdots \cdots$ |
|  |  |  | H3.1i | state constraints and give starting points when making deductions |
|  |  |  |  |  |
| 2. Geometrical reasoning |  |  |  |  |
| Angles | F3.2a | recall and use properties of angles at a point, angles on a straight line (including right angles), perpendicular lines, and opposite angles at a vertex |  |  |
|  | F3.2b | distinguish between acute, obtuse, reflex and right angles; estimate the size of an angle in degrees |  |  |
| Properties of triangles and other rectilinear shapes | F3.2c | use parallel lines, alternate angles and corresponding angles; understand the properties of parallelograms and a proof that the angle sum of a triangle is 180 degrees; understand a proof that the exterior angle of a triangle it at the other two vertices angles at | H3.2a | distinguish between lines and line segments; use parallel lines, alternate angles and corresponding angles; understand the consequent properties of parallelograms and a proof that the angle sum of a triangle is 180 degrees; understand a proof that the exterior angle of a triangle is equal to the sum of the interior angles at the other two vertices |

| 3. Transformations and coordinates |  |  |  |  |
| Specifying transformations | F3.3a | understand that rotations are specified by a centre and an (anticlockwise) angle; rotate a shape about the origin; measure the angle of rotation using right angles, simple fractions of a turn; understand that reflections are specified by a mirror line, at first using line parallel to an axis, understand that translations are specified by a distance and direction, and enlargements by a centre and positive scale factor | H3.3a | understand that rotations are specified by a centre and an (anticlockwise) angle; use any point as the centre of rotation; measure the angle of rotation, using right angles, fractions of a turn or degrees; understand that reflections are specified by a (mirror) line; understand that translations are specified by giving a distance and direction (or a vector), and enlargements by a centre and a positive scale factor |
| Properties of transformations | F3.3b | recognise and visualise rotations, reflections and translations, including reflection symmetry of 2-D and 3-D shapes, and rotation symmetry of 2-D shapes; transform triangles and other 2-D shapes by translation, rotation and reflection, recognising that these transformations preserve length and angle, so that any figure is congruent to its image under any of these transformations | H3.3b | recognise and visualise rotations, reflections and translations including reflection symmetry of 2-D and 3-D shapes, and rotation symmetry of 2-D shapes; transform triangles and other 2-D shapes by translation, rotation and reflection and combinations of these transformations; distinguish properties that are preserved under particular transformations |
|  | F3.3c | recognise, visualise and construct enlargements of objects using positive scale factors greater than one; understand from this that any two circles and any two squares are mathematically similar, while, in general, two rectangles are not | H3.3c | recognise, visualise and construct enlargements of objects; understand from this that any two circles and any two squares are mathematically similar, while, in general, two rectangles are not, then use positive fractional scale factors |
|  | F3.3d | recognise that enlargements preserve angle but not length; identify the scale factor of an enlargement as the ratio of the lengths of any two corresponding line segments and apply this to triangles; understand the implications of enlargement for perimeter; use and interpret maps and scale drawings | H3.3d | recognise that enlargements preserve angle but not length; identify the scale factor of an enlargement as the ratio of the lengths of any two corresponding line segments; understand the implications of enlargement for perimeter; use and interpret maps and scale drawings; understand the difference between formulae for perimeter, area and volume by considering dimensions |
| Coordinates | F3.3e | understand that one coordinate identifies a point on a number line, two coordinates identify a point in a plane and three coordinates identify a point in space, using the terms ' 1 -D', ' 2 -D' and ' 3 -D'; use axes and coordinates to specify points in all four quadrants; locate points with given coordinates; find the coordinates of points identified by geometrical information (1); find the coordinates of the midpoint of the line segment $A B$, given points $A$ and $B$ | H3.3e | ..... then calculate the length AB |
| Vectors |  |  | H3.3f | understand and use vector notation; |

| NC ref | Higher Tier |  | Key Skills and notes |
| :---: | :---: | :---: | :---: |
|  | pupils should be taught to: |  |  |
| 3. Transformations and coordinates |  |  |  |
| H3.3a | use any point as the centre of rotation; measure the angle of rotation, using fractions of a turn or degrees; understand that translations are specified by a vector |  |  |
| H3.3b | transform triangles and other 2-D shapes by combinations of translation, rotation and reflection; use congruence to show that translations, rotations and reflections preserve length and angle, so that any figure is congruent to its image under any of these transformations; distinguish properties that are preserved under particular transformations | $\overline{\boxed{3}}$ | Intermediate/Higher : Pupils could use software to explore transformations and their effects on properties of shapes. |
| H3.3c | use positive fractional and negative scale factors (for enlargement) |  |  |
| H3.3d | understand the difference between formulae for perimeter, area and volume by considering dimensions; understand and use the effect of enlargement on areas and volumes of shapes and solids |  |  |
| H3.3e | calculate the length $A B$ |  | Foundation : (1) [for example, find the coordinates of the fourth vertex of a parallelogram with vertices at $(2,1)(-7,3)$ and $(5,6)$ |
| H3.3f | ..... calculate, and represent graphically the sum of two vectors, the difference of two vectors and a scalar multiple of a vector; calculate the resultant of two vectors; understand and use the commutative and associative properties of vector addition; solve simple geometrical problems in 2-D using vector methods |  |  |

| 4. Measures and construction |  |  |  |  |
| Measures | F3.4a | interpret scales on a range of measuring instruments, including those for time and mass; convert measurements from one unit to another; know rough metric equivalents of pounds, feet, miles, pints and gallons; make sensible estimates of a range of measures in everyday settings | H3.4a | use angle measure (1); know that measurements using real numbers depend on the choice of unit; recognise that measurements given to the nearest whole unit may be inaccurate by up to one half in either direction; convert measurements from one unit to another; understand and use compound measures, including speed and density |
|  | F3.4b | understand angle measure using the associated language (1) |  |  |
|  | F3.4c | understand and use speed |  |  |
| Construction | F3.4d | measure and draw lines to the nearest millimetre, and angles to the nearest degree; draw triangles and other 2-D shapes using a ruler and protractor, given information about their side lengths and angles; understand, from their experience of constructing them, that triangles satisfying SSS, SAS, ASA and RHS are unique, but SSA triangles are not; construct cubes, regular tetrahedra, squarebased pyramids and other 3-D shapes from given information | H3.4b | draw approximate constructions of triangles and other 2-D shapes, using a ruler and protractor, given information about side lengths and angles; construct specified cubes, regular tetrahedra, square-based pyramids and other 3-D shapes |
|  | F3.4e | use straight edge and compasses to do standard constructions including an equilateral triangle with a given side | H3.4c | $\qquad$ the midpoint and perpendicular bisector of a line segment, the perpendicular from a point to a line, the perpendicular from a point on a line, and the bisector of an angle |
| Mensuration | F3.4f | find areas of rectangles, recalling the formula, understanding the connection to counting squares and how it extends this approach; recall and use the formulae for the area of a parallelogram and a triangle; find the surface area of simple shapes using the area formulae for triangles and rectangles; calculate perimeters and areas of shapes made from triangles and rectangles | H3.4d | find the surface area of simple shapes by using the formulae for the areas of triangles and rectangles; find volumes of cuboids, recalling the formula and understanding the connection to counting cubes and how it extends this approach; calculate volumes of right prisms and of shapes made from cubes and cuboids; convert between volume measures including $\mathrm{cm}^{3}$ and $\mathrm{m}^{3}$; find circumferences of circles and areas enclosed by circles, recalling relevant formulae |
|  | F3.4g | find volumes of cuboids, recalling the formula and understanding the connection to counting cubes and how it extends this approach; calculate volumes of shapes made from cubes and cuboids |  |  |
|  | F3.4h | find circumferences of circles and areas enclosed by circles recalling relevant formulae |  |  |
|  | F3.4i | convert between area measures, including square centimetres and square metres, and volume measures, including cubic centimetres and cubic metres |  |  |
| Loci |  |  | H3.4e | find loci, both by reasoning and by using ICT to produce shapes and paths (1) |

| $\mathrm{AO}$ Handling data | NC <br> ref | Foundation Tier | NC <br> ref | Intermediate Tier |
| :---: | :---: | :---: | :---: | :---: |
| pupils should be taught to: $\quad$ pupils should be taught |  |  |  |  |
| 1. Using and applying handling data |  |  |  |  |
| Problem solving | F4.1a | carry out each of the four aspects of the handling data cycle to solve problems: <br> (i) specify the problem and plan: formulate questions in terms of the data needed, and consider what inferences can be drawn from the data; decide what data to collect (including sample size and data format) and what statistical analysis is needed <br> (ii) collect data from a variety of suitable sources, including experiments and surveys, and primary and secondary sources <br> (iii) process and represent the data: turn the raw data into usable information that gives insight into the problem <br> (iv) interpret and discuss the data: answer the initial question by drawing conclusions from the data | H4.1a | $\ldots$ |
|  | F4.1b | identify what further information is needed to pursue a particular line of enquiry | H4.1b | select the problem-solving strategies to use in statistical work, and monitor their effectiveness (these strategies should address the scale and manageability of the tasks, and should consider whether the mathematics and approach used are delivering the most appropriate solutions) |
|  | F4.1c | select and organise the appropriate mathematics and resources to use for a task |  |  |
|  | F4.1d | review progress while working; check and evaluate solutions |  |  |
| Communicating | F4.1e | interpret, discuss and synthesise information presented in a variety of forms | H4.1c | communicate mathematically, with emphasis on the use of an increasing range of diagrams and related explanatory text, on the selection of their mathematical presentation, explaining its purpose and approach, and on the use of symbols to convey statistical meaning |
|  | F4.1f | communicate mathematically, including using ICT, making use of diagrams and related explanatory text |  |  |
| Reasoning | F4.1h | apply mathematical reasoning, explaining inferences and deductions | H4.1d | apply mathematical reasoning, explaining and justifying inferences and deductions, justifying arguments and solutions |
|  |  |  | H4.1e | identify exceptional or unexpected cases when solving statistical problems |
|  | F4.1i | explore connections in mathematics and look for cause and effect when analysing data | H4.1f | explore connections in mathematics and look for relationships between variables when analysing data |
|  |  |  | H4.1g | recognise the limitations of any assumptions and the effects that varying the assumptions could have on the conclusions drawn from data analysis |

| AO4 Handling data | NC <br> ref | Foundation Tier | NC <br> ref | Intermediate Tier |

|  |  | pupils should be taught to: |  | pupils should be taught to: |
| 2. Specifying the problem and planning |  |  |  |  |
|  | F4.2a | see that random processes are unpredictable | H4.2a | ..... |
|  | F4.2b | identify questions that can be addressed by statistical methods | H4.2b | identify key questions that can be addressed by statistical methods |
|  | F4.2c | discuss how data relate to a problem | H4.2c | ..... identify possible sources of bias and plan to minimise it |
|  | F4.2d | identify which primary data they need to collect and in what format, including grouped data, considering appropriate equal class intervals | H4.2d | ..... |
|  | F4.2e | design an experiment or survey; decide what secondary data to use | H4.2e | ..... |
| 3. Collecting data |  |  |  |  |
|  | F4.3a | design and use data-collection sheets for grouped discrete and continuous data; collect data using various methods, including observation, controlled experiment, data logging, questionnaires and surveys | H4.3a | collect data using various methods, including observation, controlled experiment, data logging, questionnaires and surveys |
|  | F4.3b | gather data from secondary sources, including printed tables and lists from ICTbased sources | H4.3b | ..... |
|  | F4.3c | design and use two-way tables for discrete and grouped data | H4.3c | ..... |
|  |  |  | H4.3d | deal with practical problems such as nonresponse or missing data |
| 4. Processing and representing data |  |  |  |  |
|  | F4.4a | draw and produce, using paper and ICT, pie charts for categorical data, and diagrams for continuous data, including line graphs for time series, scatter graphs, frequency diagrams and stem-and-leaf diagrams | H4.4a | draw and produce, using paper and ICT, pie charts for categorical data, and diagrams for continuous data, including line graphs (time series), scatter graphs, frequency diagrams, stem-and-leaf diagrams, cumulative frequency tables and diagrams and box plots |
|  | F4.4b | calculate mean, range and median of small data sets with discrete then continuous data; identify the modal class for grouped data | H4.4e | find the median, quartiles and interquartile range for large data sets and calculate the mean for large data sets with grouped data |
|  |  |  | H4.4f | calculate an appropriate moving average |
|  | F4.4h | draw lines of best fit by eye, understanding what these represent | H4.4i | ..... |
|  |  |  | H4.4j | use relevant statistical functions on a calculator or spreadsheet |
|  | F4.4c | understand and use the probability scale |  |  |
|  | F4.4d | understand and use estimates or measures of probability from theoretical models (including equally likely outcomes) | H4.4b | understand and use estimates or measures of probability from theoretical models, or from relative frequency |
|  | F4.4e | list all outcomes for single events, and for two successive events, in a systematic way | H4.4c | ..... |
|  | F4.4f | identify different mutually exclusive outcomes and know that the sum of the probabilities of all these outcomes is 1 | H4.4d | ..... |
|  |  |  | H4.4h | use tree diagrams to represent outcomes of compound events, recognising when events are independent |

| NC ref | Higher Tier |  | Key Skills and notes |
| :---: | :---: | :---: | :---: |
|  | pupils should be taught to: |  |  |
| 2. Specifying the problem and planning |  |  |  |
|  |  |  |  |
|  |  |  |  |
| H4.2c | identify possible sources of bias and plan to minimise it | - | C1.1, C1.2 |
| H4.2d | select and justify a sampling scheme and a method to investigate a population, including random and stratified sampling |  |  |
| H4.2e | decide what primary and secondary data to use | $\cdots$ | IT1.1, IT1.2, N1.1 |
| 3. Collecting data |  |  |  |
|  |  |  |  |
|  |  | - | IT1.1, IT2.1, N1.1 |
|  |  |  |  |
| H4.3d | $\cdots$ |  |  |
| 4. Processing and representing data |  |  |  |
| H4.4a | draw and produce, using paper and ICT, cumulative frequency tables and diagrams, box plots and histograms for grouped continuous data | $\bullet$ | N1.3, N2.3, IT1.2, IT2.3 |
| H4.4e | $\cdots$ | $\rightleftharpoons$ | N1.2, N2.2 |
| H4.4f | $\cdots$ |  |  |
| H4.4i | $\cdots$ |  |  |

| 5. Interpreting and discussing results |  |  |  |  |
|  | F4.5a | relate summarised data to the initial questions | H4.5a | ..... |
|  | F4.5b | interpret a wide range of graphs and diagrams and draw conclusions | H4.5b | interpret a wide range of graphs and diagrams and draw conclusions; identify seasonality and trends in time series |
|  | F4.5c | look at data to find patterns and exceptions | H4.5c | $\ldots$ |
|  | F4.5d | compare distributions and make inferences, using the shapes of distributions and measures of average and range | H4.5d | compare distributions and make inferences, using shapes of distributions and measures of average and spread, including median and quartiles |
|  | F4.5e | consider and check results and modify their approach if necessary | H4.5e | ..... |
|  | F4.5f | have a basic understanding of correlation as a measure of the strength of the association between two variables; identify correlation or no correlation using lines of best fit | H4.5f | appreciate that correlation is a measure of the strength of the association between two variables; distinguish between positive, negative and zero correlation using lines of best fit; appreciate that zero correlation does not necessarily imply 'no relationship' but merely 'no linear relationship' |
|  | F4.5g | use the vocabulary of probability to interpret results involving uncertainty and prediction | H4.5g | ..... (1) |
|  | F4.5h | compare experimental data and theoretical probabilities | H4.5h | ..... |
|  | F4.5i | understand that if they repeat an experiment, they may - and usually will - get different outcomes, and that increasing sample size generally leads to better estimates of probability and population characteristics | H4.5i | ..... |
|  | F4.5j | discuss implications of findings in the context of the problem |  |  |
|  | F4.5k | interpret social statistics including index numbers (1); time series (2); and survey data (3) |  |  |

## Breadth of Study (Foundation)

During the key stage, pupils should be taught the Knowledge, skills and understanding through:
a) extending mental and written calculation strategies and using efficient procedures confidently to calculate with integers, fractions, decimals, percentages, ratio and proportion
b) solving a range of familiar and unfamiliar problems, including those drawn from real-life contexts and other areas of the curriculum
c) activities that provide frequent opportunities to discuss their work, to develop reasoning and understanding and to explain their reasoning and strategies
d) activities focused on developing short chains of deductive reasoning and correct use of the ' $=$ ' sign
e) activities in which they do practical work with geometrical objects, visualise them and work with them mentally
f) practical work in which they draw inferences from data, consider how statistics are used in real life to make informed decisions, and recognise the difference between meaningful and misleading representations of data
g) activities focused on the major ideas of statistics, including using appropriate populations and representative samples, using different measurement scales, using probability as a measure of uncertainty, using randomness and variability, reducing bias in sampling and measuring, and using inference to make decisions
h) substantial use of tasks focused on using appropriate ICT [for example, spreadsheets, databases, geometry or graphic packages], using calculators correctly and efficiently, and knowing when not to use a calculator.

## Breadth of Study (Intermediate and Higher)

During the key stage, pupils should be taught the Knowledge, skills and understanding through:
a) activities that ensure they become familiar with and confident using standard procedures for the range of calculations appropriate to this level of study
b) solving familiar and unfamiliar problems in a range of numerical, algebraic and graphical contexts and in open-ended and closed form
c) using standard notations for decimals, fractions, percentages, ratio and indices
d) activities that show how algebra, as an extension of number using symbols, gives precise form to mathematical relationships and calculations
e) activities in which they progress from using definitions and short chains of reasoning to understanding and formulating proofs in algebra and geometry
f) a sequence of practical activities that address increasingly demanding statistical problems in which they draw inferences from data and consider the uses of statistics in society
g) choosing appropriate ICT tools and using these to solve numerical and graphical problems, to represent and manipulate geometrical configurations and to present and analyse data.
